NEW HOSPITAL.
Lexington Avenue and 55th Street.

STATEMENT OF FACTS.

First.—The Hospital's income is largely dependent upon public charity, and therefore it needs *regular* subscribers. Its aim is to increase the number of these subscribers year by year. *WILL YOU LEND YOUR AID?*

Last year the total number of subscribers, both occasional and regular, was 921. We hope this year to increase this number, and would ask you to become interested, with your friends, in our work among the babies of the poor.

Second.—The class of patients we treat comes from the poorest in the city. Our receipts from those who can afford to pay equals only *one-seventieth* part of the amount of money which we must expend to support them.

Third.—It is therefore of utmost importance that everyone who is interested in the welfare of the poor babies of this City, should send us at least what they can afford, however small, in support of our work.

Every dollar given is carefully and economically used, and goes directly to benefit the unfortunate condition of some child.

Remittances by check should be drawn to the order of The Babies' Hospital. If for the support of the Hospital, they should be sent to Mrs. John B. Calvert, Treasurer, No. 15 East 57th Street, New York.

If for investment, (income only to be used), checks should be sent to Mr. Henry R. Kunhardt, Treasurer Permanent Fund, No. 10 Battery Place, New York.

We desire to notify the public that no collectors are employed for soliciting funds.

The Hospital property is free and clear from all debt.

BOARD OF DIRECTORS.

President,
OLIVER G. JENNINGS.

Vice-President,
WILLIAM F. HAVEMEYER.

Treas. Current Funds,	MRS. JOHN B. CALVERT,	15 East 57th Street.

FIFTEENTH ANNUAL REPORT

OF THE

DIRECTORS OF THE BABIES' HOSPITAL OF THE CITY OF NEW YORK,

FROM OCTOBER 1, 1902, TO SEPTEMBER 30, 1903.

We have closed the first year in our new building, and we hope our friends will feel repaid for the generosity which they have shown to our Institution.

The Women's Board of Managers to which the success of the Hospital is so largely due, continues its earnest and intelligent supervision of our work. They are from time to time improving our organization, for which they should receive due credit, and it may be said that without their efficient aid, the maintenance of the Institution, for efficient work would be difficult if not impossible.

The Out-Patient Department has developed wonderfully by reason of the improved facilities in our new quarters, and the increase in revenue of same of nearly 200 per cent. speaks for itself without referring to details found elsewhere in this report.

The Summer Committee of ladies under the active leadership of Mrs. Ira Barrows, has continued its good work in the care of the Hospital's Branch at Oceanic and has given valuable aid as well in helping to secure funds.

The Cribside Committee is another organization which continues its interest in the Hospital and it is hard to estimate the amount of good work done for the Hospital through the enthusiasm of the young women constituting this Committee.

Through the generosity of Mrs. John Sherman Hoyt it has been possible for us to retain the services of Dr. Emelyn L. Coolidge as Visiting Physician. This has proved a most valuable gift we think, as may be appreciated by reading the results of Dr. Coolidge's work appearing elsewhere in this report. We express gratitude for generous gifts of the late Mrs. J. H. Hamersley and Mr. Mortimer L. Schiff, providing the necessary funds to enable us to make repairs to buildings at Oceanic.

We also desire to express our appreciation and thanks to the generous friends of our institution who have helped us the past year, as follows :

To Mr. Thornall, for his gift of \$150, as represented by certain valuable legal aid.

To Mrs. Woerishoefer, for her special gift of \$500.

To Mrs. L. E. Holt, for her thoughtfulness and generosity in contributing several days a month throughout the year, the services of a cleaner at the Hospital.

To Mrs. H. G. Trevor, for the continuation of her yearly payments of \$250 towards the endowment of a bed in perpetuity.

To Mr. Otto H. Kahn, for his generous and special gift of \$250, and finally, to all those generous and charitably inclined ladies, who by their financial and personal support of The Bridge Whist Tournament, enabled Mrs. E. N. Van Ingen to send us last Winter her check for \$1,120.25, the proceeds of that most helpful entertainment.

Due to the generosity of our friends for which we are most grateful, we are happy to say that our new building is free from debt and though with altogether too small an endowment, we have succeeded in closing our first year within our revenues.

Our expenses the past year have been about \$7,500 more than the previous year. Of this increase something like \$3,800 is in the salary and wages account, which could not be avoided with our larger facilities. The increase of some \$1,800 in the cost of provisions and supplies follows naturally with the former and is even greater by reason of the well known higher cost of such articles the past year.

Our Fuel and Light account increased nearly \$2,800, due largely to high cost of coal and the natural expense in heating and lighting such a building. This item, however, is one receiving especial attention and we hope to materially decrease it in the future. It is proper in this connection to say that during the past Summer our entire Hospital here was kept open continually for business, something never attempted before, and it may be safe to say that at least \$3,000 of our added expenses was due to this, but the greater good accomplished observed by the reader of this report will, we think, justify the management in so doing. We feel that in the future we would like to continue this work in the Summer with a larger force, even though at greater additional cost, so important do we consider the results achieved.

We refer the reader to the Treasurer's reports for fuller details as to our income and disbursements. We trust they will observe to what an alarming extent we must depend upon the yearly gifts of our friends. It is hoped that there

will be here and there among them one or two who may feel inclined to help us in the building up of our endowment and in the number of those who will agree to support beds. This latter form of aid is particularly appreciated by the management.

Our permanent fund has been increased the past year by the following gifts :

Mrs. H. C. Conger, In memory of.....\$1,000.00

James Loeb, Contribution..... 1,000.00

Mr. and Mrs. William E. Dodge, In memory of Grace

Osborn..... 5,000.00

Elizabeth C. Lockwood..... 500.00

H. P. Wertheim, In memory of Clara W. Wertheim. 5,000.00

for all of which we are duly grateful.

In closing our report for the first year in our new building, we wish to extend a hearty invitation to all persons interested in our work, to visit us and see just what is going on. Such visits mean much and constitute a form of helpfulness and encouragement not otherwise obtained.

SUMMER BRANCH.

REPORT OF THE SUMMER COMMITTEE.

The Summer Committee of the Babies' Hospital at Oceanic report with pleasure a season of faithful service on the part of officers and employees, and uninterrupted harmony of feeling and action among its own members. The amount of money secured from summer contributors was not quite so large as in some other years, but this decrease cannot be attributed to lack of interest. A Sewing Society was organized which proved useful not only in the good accomplished in the making of needed garments for the babies, but in bringing into the circle some of those who had never before come into close touch with the Hospital. The character of the work at this branch of the Hospital during the past summer while not less important was different, materially, from that of other seasons. Heretofore all babies received at the Hospital in New York, no matter how hopeless the case, had been sent to Oceanic, frequently in a dying state. Since the new Hospital has been in operation it has been determined to keep several wards open throughout the summer and to send to Oceanic only convalescents and such cases as from the nature of the trouble would do better in country air. This plan has proved highly successful and demonstrated beyond question the advisability of such a course. With facilities for treating nearly twice the number of babies, the expense was only about half again what it would have been with one branch in operation. A Fair was held by some children at Monmouth Beach in July, and the sum of \$400 was raised. The following is the list of those to whom credit is due: The Misses Hazen Symington, Margaret Hamilton, Eleanor Prentice, Catherine Shaw, Helene Demerest, Clara Fargo, Ruth Adams, Doris Porter, Anna Catherine Stimson, Martha Leshner, the Masters Fritz Barbour and James Symington. This is the second time that this little group of children has put forth its energies in behalf of the Babies' Hospital, and we remember them gratefully. Later in the season an entertainment was held at the Monmouth Beach Casino under the auspices of the Committee, with the net result of \$839. The Chairman of the Summer Committee desires to thank all who in any way contributed to the season's success, and confidently relies upon their coöperation in the coming year.

CECILIA FITLER BARROWS, *Chairman.*

MEDICAL REPORT.

TO THE BOARD OF DIRECTORS OF THE BABIES' HOSPITAL:

The present report covers really only about ten months' actual work, since the new Hospital building was not opened for active service until about December 1st. From this date until October 1st, 1903, there was done nearly twice as much work in the Hospital as ever in the same period previously.

It was expected that two or three years would elapse before the work would grow up to the capacity of the new Hospital building, but instead it has been barely as many months before it was filled. Almost before our doors were opened, applications for admission poured in upon us, and during some of the active winter months as many as one hundred children were received. Not only has the number of patients greatly increased, but the proportion of very sick children has been larger, as it has come to be known throughout the city by other institutions and by the public, that a modern hospital properly equipped for the care of this peculiar and exacting class of patients had come into existence. This enlarged service has increased the medical work and the sick nursing of the Hospital far more than we had anticipated and a number of changes on our medical and nursing staff have been required. A Resident Physician, Dr. Dorothy Reed from Johns Hopkins, was added January 1st, 1903, and there is now the greater part of the time, much more than a single person can well carry on. A permanent experienced nurse in each of the wards has become a necessity, the pupil nursery maids not being capable of taking much responsibility in cases of very sick infants. These nurses have been recruited from the ranks of our graduates and are proving most efficient.

Emergency Cases.—In no way are the needs of the community for such a hospital better shown than by the number of emergency cases which are admitted. This was especially true of the summer. Then, scarcely a night passed without applications, and children were occasionally brought in the small hours of the morning. All of these children were desperately ill and often brought as a last resource. Had they been turned away it is probable that many of them would have died in the streets in their parent's arms. During the summer months not less than 20 such cases were admitted which did not live twenty-four hours after reaching the Hospital, and there were 10 others who did not live forty-

eight hours. A few examples of these emergency cases may not be uninteresting as illustrating the scope of the work.

One little child eighteen months old was brought in midsummer at 2.30 A. M. The mother had been in a State Hospital for Insanity for eight months and the father had placed the child out to board with relatives. Through bad management the child became ill. The father was employed as a driver for an express company and his hours of work in the summer were long. For three nights after coming from his work, he had taken the baby to one of the recreation piers, and there had sat all night with the child in his arms hoping to benefit him by the fresh air. While there one night, a woman who had noticed the child's appearance advised the father to take it to the Babies' Hospital, saying that her own had been taken there when she thought it dying and had been returned to her cured. The advice was taken at once but the child was suffering from a severe form of gastro-intestinal disease together with nephritis and lived only forty-eight hours after admission.

Another child of fourteen months old was brought to the Hospital in convulsions and seemed to be dying. It was learned that the mother had given him shortly before, some bologna sausage. He was promptly admitted to the Hospital and medical attention given and after almost unremitting attention for a day and a night, the convulsions ceased and the symptoms passed off permanently and at the end of another day the child was out of danger. He was then sent to Oceanic and after two weeks' stay was returned to the mother in such splendid health that she scarcely recognized him.

A baby twelve months old was admitted with general convulsions which had lasted 12 hours and nothing had been done to relieve it; when brought to the Hospital the temperature was 108° and violent convulsions were still present. In spite of all efforts the child died after 36 hours. The convulsions in this case were distinctly traceable to improper food given by the parents.

Such are many of the emergency cases. Unless immediate attention can be given a fatal result is almost inevitable.

City Work During the Summer.—For the first time since the Hospital was organized an active service has been continued during the entire summer. On account of the increased expense occasioned by running both the Country and the City Branches, the Board of Directors decided to close part of the wards, so that twenty-two beds represented the capacity for patients during the summer months. In these beds scarcely a vacancy for a day existed, and not infrequently we had more patients than beds. The summer service was of the most acute kind and included a variety of cases which previously we had not been able to receive, since these patients were too acutely ill to bear transportation to Oceanic.

Not only were there many cases of severe diarrhoeal disease, but pneumonia, meningitis, tuberculosis, convulsions, etc. The service during the summer was in charge of Drs. Kerley and LaFetra, Assistant Physicians to the Hospital.

This work is quite as important as our winter service, and the experience of the past year has shown how great is the demand of the public upon the Hospital for this service. All of this work done in the city has in nowise interfered with the work done at Oceanic, but rather has supplemented it.

The Summer Work.—One hundred and thirty-three patients were sent to Oceanic, which is about the average number sent in recent years, although considerably larger than the previous season. During the months of June and July a greater number than ever before were transferred, and this increase would doubtless have been continued but for an epidemic of contagious disease in the latter part of July and August, which greatly restricted admissions during the latter part of the summer.

Cases were transferred only twice instead of three times a week as formerly, a larger number of children, however, being sent at a single trip. This has made the work of transfer much easier, and with the wards of the City Hospital open, the children could easily be kept here for a day or two longer until a suitable time came. On the whole, although the keeping of the two branches of the Hospital open during the summer has increased our expenses, it has increased our efficiency to a greater degree, and next summer the Hospital should certainly be open and run to its full capacity.

The Need of Wet-nurses.—During the last season an experiment has been tried of seeing how much could be accomplished by the use of wet-nurses to give a start to these very young infants with marasmus, so many of whom find their way to our doors. Artificial feeding in many of these cases presents great difficulties, and with the larger proportion of those who are under three months old, it is impossible to succeed by any method. For the last eight months the experiment has been tried of having one wet-nurse continually in the house. She was admitted with her own child, who has been kept in the Hospital; and she has partly nursed beside this, usually two other children. The plan followed has been to use the wet-nurse for cases otherwise hopeless, to nurse them entirely for a few days until a decided improvement was accomplished, after which they were nursed and fed alternately. This plan has been followed with great success during the past summer, and by this single wet-nurse we have saved fifteen infants, while her own child has thrived on part nursing and part feeding, and has remained well throughout the summer. This experience indicates how much can be accomplished in this direction. We should have on hand at all times not one, but three wet-nurses, and in this way it is safe to say that in a year at least sev-

enty-five children could be saved which otherwise would be lost. We have found that it is not necessary to nurse these children very long, nor entirely. When once the first decided gain or improvement has been made, artificial feeding can in most cases be carried on successfully and without great difficulty.

The Work of the Visiting Physician for Out-patients —Through the generosity of Mr. and Mrs. John S. Hoyt, Dr. Coolidge, long connected with the Hospital has devoted a considerable part of her time to this work. This department has been a most important addition and fills a long felt want. Not only have many cases of infant feeding been followed up in their homes to secure permanent results, but many others where circumstances have necessitated removal of children from the Hospital while still acutely ill ; such, for instance, as was the case of a child admitted with pneumonia who turned out to have whooping cough also, and for the safety of the other patients had to be sent home. A more detailed account of this work is found in Dr. Coolidge's report elsewhere.

The laboratory work has been carried on during the year in charge of Dr. Wollstein and with the new equipment this has been much more efficient than previously. A work of research has also been prosecuted during the year. As in previous years, the clinical teaching has been given twice a week to fourth year students of the College of Physicians and Surgeons. With ampler accommodations and better facilities, this has also been more satisfactory.

The following is a brief summary of the year's work :

- 623 patients treated in the Hospital.
- 10,353 days Hospital treatment furnished.
- 1,212 new patients treated in the outdoor department.
- 5,761 visits made to the outdoor department.
- 133 children treated at the summer branch, Oceanic.
- 197 visits made by the out-patient physician.

The above really represents ten months' work. Further details are given in the statistical report.

L. EMMETT HOLT, M. D.

REPORT

OF THE

VISITING PHYSICIAN TO THE OUT-PATIENT DEPARTMENT.

From the time that the work was begun on January 20th, 1903, to October 1st, 1903, 197 calls were made. Patients admitted to the Babies' Hospital came from all parts of Manhattan and the Bronx; the distances to be covered are often very great. It has not been at all unusual to make a call in the upper part of the Bronx and directly after that go down to Attorney Street. If a visit includes, as it often does, teaching a mother how to prepare the food, a bathing lesson given, two such calls easily consume the greater part of one day. Many more calls could be made within a given time if the patients were not so scattered. In order to be thorough and have the mother really grasp the instructions given, it is usually necessary to remain nearly an hour and sometimes much longer at each house.

The appreciation which the mothers have shown, their endeavors to carry out directions and their pride in their success have been a source of great encouragement in this work. The following reports illustrate some of its more important phases and indicate its general scope.

While some of the patients when convalescent, were sent to Oceanic during the summer, they have often needed care on their return to their city homes, and the hot months have been very busy ones for the doctor. The vital importance of cool sponge baths, plenty of cool water to drink, outings in the cool of the day, and above all, proper food, have been the chief things taught the mothers this past summer. It is most encouraging to have the mother realize the importance of little things in connection with their babies' health. There have been many calls this past summer from patients who were visited after they left the Hospital during the winter, so that by prompt attention to trifling ills many serious cases of sickness have been prevented.

An interesting case is that of Tommie W. who was in the Hospital last winter for a mastoid operation, and then visited by the doctor at his home. Early in the summer he contracted measles, which was closely followed by pneumonia and entero-colitis. He was really too ill to be taken care of at home, but could not be sent to the Babies' Hospital while he had the measles, and his mother

would not hear of having him sent to any other, so for three weeks usually two visits a day were made while the baby was so desperately ill. The help of a Settlement nurse was also secured who went twice daily. There was therefore an intelligent person to care for Tommie most of the time until, when all danger of infection was over, he was sent back to the Babies' Hospital.

Baby Poggio, a little Italian who was operated on in the Hospital for abscess of the neck and then visited at home, is now one of the plumpest healthiest babies imaginable. He was a little skeleton during his stay in the Hospital, and for some time after, but at last, good care began to tell, and his father was persuaded to take him into the country ; all summer long the father has either called on or written the doctor every week or two, and the baby's food has been strengthened little by little, until he is now taking what any normal baby of his age should take. A few days ago the happy father brought him to town to show the doctor what a fine specimen he was.

EMELYN L. COOLIDGE,
Visiting Physician.

THE ANNUAL REPORT

OF THE

CRIBSIDE COMMITTEE OF THE BABIES' HOSPITAL FOR THE YEAR 1902-1903.

During the winter of 1902-1903 the regular monthly meetings of the Crib-side Committee of the Babies' Hospital were held at the new Hospital, No. 657 Lexington Avenue, on the second Wednesday of every month at 12 o'clock.

At the November meeting the following officers were elected :

President	Mrs. BRYCE GRAY
Vice-President	Miss ELLEN LOUISE ADEE
Treasurer	Miss MAUDE H. CURTISS
Secretary	Miss CAROLINE L. MORGAN

Miss Annie Willetts resigned her position as Secretary, to the regret of the Committee, who much appreciated her faithful work.

The membership in May counted 43 active members, 12 associate members and 22 honorary members.

The following Committees were formed for the winter work :

Committee	}	MISS HONE	Chairman
on			
Admissions	}	MISS HUNGERFORD	
Editorial	}	MISS WILLETTS	Chairman
		MISS HONE	
Committee		MISS HUNGERFORD	

The usual Thursday Afternoon Sewing Class during Lent was organized under special Committees and was held at different houses offered to the class. The number of garments made were 394 and 66 sheets.

The proposition of raising a permanent fund of \$2,500, the interest on which to be used for the maintenance of the ward already furnished by the Cribside Committee, was brought before the Board of Directors at their meeting on March 17, and was accepted. It was suggested by a member of the Cribside that each member of the Committee be responsible for raising \$50 during the summer for this purpose.

It was also decided to have the Cribside Committee vote with the majority of the Hospital, as to the position of the tablet recording the name of the bed endowed in perpetuity by the Cribside, and also have a written record of same.

A cake sale took place on April 18, at the residence of the Secretary, and the sum of \$245.72 was realized and added to the fund for the maintenance of the ward.

The Cribside paper was abandoned and it was decided that quarterly reports of the work and needs of the Hospital should be issued.

Good work was done by the Clothing Committee of the Hospital under Miss Adee and a number of volunteer workers from the Cribside.

Visiting at the Hospital was done throughout the winter by different members appointed at the monthly meetings.

Some resignations were sent in during the winter, but also quite a number of members were added to the Cribside. Altogether some good work was done by the various Committees during the season.

The Treasurer reported at the last meeting in May, a balance of \$409.65 in the bank.

Respectfully submitted,

CAROLINE L. MORGAN,

Secretary.

LIST OF MEMBERS

OF

CRIBSIDE COMMITTEE.

ACTIVE MEMBERS.

Miss Ellen Louise Adee	Miss Margherita S. Hungerford	Miss F. Ethel Wickham
Miss Zoe E. Banks	Miss Edith V. C. Gray	Miss Annie Willetts

REPORT

OF

SCHOOL FOR INFANTS' NURSES OF THE BABIES' HOSPITAL.

During the past year 160 application blanks for the training school were given out ; 71 of these were filled and returned. Of this number 47 candidates were admitted to the Hospital on probation, and 28 were accepted. Of those rejected, 19 did not meet our requirements, or were not suited for the work. One proved not strong enough to complete the course, and one other was obliged to return home for family reasons.

During the past year, the number of nurses has been increased from 18 to 24 ; two of these are head nurses, so that we now have a permanent corps of three head nurses, one for each floor, two night nurses, one diet kitchen nurse, and 18 nurses in training. While, to many these numbers may seem large, it really is not so when one considers the helplessness of our little patients ; they are all sick, and the majority are under one year of age. Then, too, the demand for nurses is very large. Estimating the record of calls, kept for the last two months, we have over 1,200 inquiries for our nurses a year, while we are able to train only from 22 to 24. The 23 graduates came from the following places : From New York City, 7 ; from surrounding country, 4 ; North Ireland, 3 ; Ireland, 2 ; Germany, 3 ; Scotland, 1 ; Denmark, 1 ; Sweden, 1 ; England, 1. They have been placed as follows : In New York City in private families, 16 ; private families, mostly in the suburbs, 5 ; remaining in the Hospital, 2, one as diet kitchen nurse and one as head nurse.

For the past year we have had Miss Smillie with us as assistant superintendent, and she has had charge of the training during the summer months.

As both the City Hospital and the country branch were kept open this summer, it was necessary to separate the nursing corps ; fourteen were sent to Oceanic in Miss Smillie's care, five were kept in the city with two volunteer nurses who were willing to give their services for the experience.

From June first to October first we were most fortunate in having the valuable assistance of an experienced volunteer worker, formerly a trained nurse. As the service in the City Hospital during the summer was much larger than anticipated, her excellent and faithful work was greatly appreciated.

SPECIAL MINUTE ON THE DEATH

OF

MRS. CHAS. H. HARTMAN,

Vice-President of the Women's Board.

At a meeting of the Summer Committee of The Babies' Hospital, held at Oceanic, on June 9th, announcement was made of the death of Mrs. Charles Harvey Hartman, First Vice-President of the Board of Women Managers of this Hospital.

Eulogistic mention was made of her many generous deeds in connection with the work, and of her untiring and long continued devotion to its interests.

A committee was appointed consisting of Mrs. Bryce Gray, Mrs. John Jay Knox, and Mrs. R. B. Kimball, to draft resolutions to be spread upon the minutes, and a copy of same to be forwarded to the family.

The following preamble and resolutions were offered and adopted :

WHEREAS, It has pleased God to remove from a sphere of benevolent and religious activity our friend and associate, Mrs. Charles Harvey Hartman,

RESOLVED, That in her death The Babies' Hospital has been deprived of one of its earliest and truest supporters. That we, the members of the Board, do mourn the loss of a faithful officer and a consistent and generous co-worker. That, in every relation, both social and official, her intercourse with her associates was characterized by rare unselfishness and sweetness of nature. That we, the members of the Board, shall ever hold her in affectionate remembrance.

Miss Hines' Infant Class, St. Thomas' Church Flowers.

Mrs. Jefferson Hogan

1 box of baby clothes; 22 paper hats; 5 afghans; 7 prs. gloves; 6 dresses; 5 prs. socks; 1 pr. blankets; 1 coat; 3 prs. leggins; 1 pr. bed shoes; 1 pr. slippers; 10 prs. stockings; 5 flannel night gowns; 8 prs. drawers; 5 flannel skirts; 17 shirts; 8 bands; 2 sacks.

Mrs. J. M. Hoxsey

1 bassinet.

Mrs. E. C. Hoyt

1 small counterpane; toy horse and wagon.

Miss Gertrude Hoyt

\$25 for special purpose.

Miss Gertrude R. and Joe N. Hoyt, Jr.

Rocking horse; toys and 14 prs. stockings.

Dr. Jaeger Sanitary Woolen Co.

49 prs. stockings; 71 bands.

Mrs. O. G. Jennings

21 jars of strawberry jam; 11 raspberry jam; 4 cherry; 48 currant jelly; 17 doz. eggs.

Mrs. Eastman Johnson, The Knickerbocker Sewing Society

7 short flannel skirts.

Mrs. J. A. Jones

Books.

Mrs. J. P. Kellogg

Toys and flowers; box baby clothes; bath tub and clothes horse; afghans.

Dr. Theron W. Kilmer

1 perforator.

King's Daughters, East Marion, L. I.

24 pillow cases; 55 stuffed animals and dolls for Christmas.

Mrs. H. K. Knapp

3 petticoats; 3 shirt waists; 12 prs. shoes; 4 prs. stockings; 2 prs. gloves; toys; 1 sack; 7 dresses; 11 bibs; 2 bands; 3 flannel petticoats; 1 flannel night gown; 1 pr. flannel drawers; 1 afghan; 1 shawl; 1 pr. rubbers; 2 prs. slippers; 4 prs. bed slippers; 10 waistcoats.

Mrs. John J. Knox, Jr.

1 dress; 6 sacks; 1 coat; 8 prs. stockings.

Mrs. Milton H. Kohn

4 Morris chairs; 2 tables; 2 pl. chairs; toys; 3 small steamer chairs.

Master Stuart Landstreet

11 prs. slippers; 4 slips; 3 bands; 4 skirts; 4 wrappers; 4 prs. socks; 6 dresses; 4 caps; 2 bonnets; 4 prs. flannel drawers; 2 prs. bed shoes; 1 pr. shoes; 2 bottle bags; 2 prs. stockings; box of toys; 1 pr. gloves; 1 afghan; 2 blankets.

- Messrs. Lewis & Conger
3 bowls.
- Mrs. Ezra Litch
5 dresses; 2 skirts; 2 shirts.
- Misses Lock
Hemming $1\frac{1}{2}$ doz. diapers.
- Mrs. Henry P. Loomis
2 boxes of flowers, "In memory of little Henry Loomis"
- Mrs. T. MacCarter
2 dresses; 5 sacks; 2 wrappers.
- Dorothy and Augusta Macready
2 bundles of toys.
- Mrs. Ballard McCall
8 slips.
- Mrs. James Malcolm
4 prs. stockings.
- Mrs. Edward T. Martin
1 afghan.
- Miss Marzolf
2 afghans.
- Mrs. Roswell Miller
3 doz. glass towels; 3 doz. kitchen towels; 2 doz. nurses' towels; 2 doz. roller towels; 2 doz. servants' towels; 65 bed spreads; 1 doz. bath towels; 4 doz. napkins; 1 doz. physicians' towels; 1 doz. table cloths; 162 baby towels; 1 bonnet; 8 dresses; 2 parasols; 23 diapers; 2 afghans; toys and baby basket.
- Mrs. J. M. Mitchell
Box of afghans.
- Mrs. William Moir
Flowers; 15 barrie coats; 13 short flannel skirts; 1 short white mus. in skirt; 8 prs. socks; 2 prs. stockings; 3 sacks; 1 pr. shoes; 43 feeding bibs; 6 flannel jackets; 1 knitted jacket; 6 shirts; 5 bands; 10 flannel petticoats; 2 white dresses; 1 flannel band.
- The Morgan Envelope Co.
Box of toilet paper and fixtures.

- Mrs. J. H. Town
Box of baby clothes, 121 articles.
- Mrs. S. A. Tucker
2 prs. rubbers; 1 pr. shoes; 1 afghan; 1 pr. overalls; books; 1 bonnet; 1 coat.
- Messrs. A. A. Vantine & Co.
3 doz. fans.
- Mrs. F. W. Wallace
1 cap; 3 prs. flannel drawers; 1 pr. muslin drawers; 6 shirts; 5 prs. stockings.
- Mrs. William Seward Webb
Easter lily.

THE "CHILDREN'S CHARITY."

This is a Society formed for the purpose of interesting children in the practical work of the Hospital. The method of securing this co-operation is attained: First, by inviting any children to join the Society and pay the yearly dues of \$1.00 each. Second, by asking the members to interest themselves in any practical work or unselfish way for the benefit of the babies. This can be done in more ways than one. Some little self-denial or the saving of pennies, remembering the babies at Christmas time, etc., etc.

The proceeds from this year's dues, \$153, has been turned over to the Treasurer, and disbursed for the actual needs of the babies, being all expended in nursery necessities, for warmth, comfort, etc.

Each child can feel that his or her dollar goes, as it were, directly to help clothe or comfort some less fortunate one.

An invitation is extended to all children, whose parents or friends have the Hospital's interests at heart, to join the "Children's Charity," communicating with Mrs. E. K. Beddall, 335 West Seventy-seventh Street, for this purpose, to whom also the yearly dues may be sent and by whom they will be acknowledged.

The following members are enrolled under the present year:

Adams, Ruth	Chappell, Louise Riker
Alley, Isabel Lord	Chappell, Walter Franklin
Auchincloss, Hulbert	Chisolm, Barbara Muhlenberg (in memory of)
Auchincloss, William Stuart	Chisolm, Dorothy Rogers

GENERAL RULES.

1.—The beds of the Hospital are free to the needy poor. Persons in better circumstances are charged, according to their means, from \$2 to \$5 a week for board. Private patients pay from \$7 to \$10 a week.

2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.

3.—Applications for admission should be made at the Hospital during the morning hours, from 9 to 12, although emergency cases are received at any time.

4.—During the summer, patients are received for transfer to the Country Branch on Mondays, Wednesdays and Fridays, from 9 to 10 a. m. For emergency cases a ward is kept open during the entire summer in the city Hospital.

5.—The Out-Patient Department is open daily throughout the year, from 2 to 3 p. m., excepting on Sundays and holidays.

6.—Visiting day, for friends of patients, is Thursday, from 11 a. m. to 1 p. m.

7.—Visitors to the Hospital are welcome any afternoon between 3 and 5.

New Hospital	3
------------------------	---

NEW HOSPITAL.
Lexington Avenue and 55th Street.

STATEMENT OF FACTS.

First.—The income of The Babies' Hospital is in a large measure dependent upon the receipts from its contributors, and it therefore asks you to keep up your interest by giving it financial aid each year.

The number of contributors this year is about the same as that of last year. It is our aim, however, to increase the number annually. If you have any friends who are particularly interested in babies, please say a good word for us.

The Babies' Hospital has been established for sixteen years, and during all that time it has kept before it the one aim of never refusing a case because it could not pay.

Second.—The class of patients that applies for admission is from the poorest in the city. Only a comparatively few of the number treated can afford to pay for services rendered. The amount of money, therefore, received, compared with what is paid out, is very small. If you know of the unfortunate condition of any poor child, telephone to us and communicate with the Superintendent, and we will do the very best we can for the patient.

Third.—If you are sending a check to us, toward the general expense fund, kindly make it to the order of The Babies' Hospital, and mail it to Mrs. John B. Calvert, 15 East 57th Street, and if for our permanent fund, mail it to Henry R. Kunhardt, 17 Battery Place.

All our business is done by mail or through our friends, and we are not in debt.
WE DO NOT EMPLOY COLLECTORS.

THE SIXTEENTH ANNUAL REPORT

OF THE

DIRECTORS OF THE BABIES' HOSPITAL OF THE CITY OF NEW YORK.

FROM OCTOBER 1ST, 1903, TO SEPTEMBER 30TH, 1904.

The Directors take pleasure in submitting to their friends the Sixteenth Annual Report of The Babies' Hospital, having completed another year of usefulness, for which grateful appreciation is extended to generous friends.

There has been a notable decrease in the death rate this year, owing, probably, to the hygienic conditions under which patients have been treated, and this is most gratifying.

The details of work done in the different departments are itemized in the various reports submitted herewith, and it is hoped that our earnest solicitation for the continuance of aid will be heeded, believing that much relief and valuable results can be rendered in our Hospital, the construction of which we have aimed to make as perfect as possible.

The facts regarding the medical work are fully set forth by our Attending Physician, and, as will be noticed, there is an increase of 27 per cent. in the number of Hospital days' treatment; from 11,021 in 1903 to 15,078 in 1904.

The average stay of each patient in the Hospital last year was 18 days; this year it is 16 days, which leads us to believe that the medical treatment has been more effective.

The average number of patients in the Hospital each day throughout the year was 41; last year, 30.

A feature of this year's work is that done by the Visiting Physician, Dr. Emelyn L. Coolidge, who made 294 visits to the homes of patients. We believe that much good is done by this home treatment, much more, in fact, than could be accomplished through any other channel. For the carrying on of it we are indebted to the generosity of Mr. and Mrs. John Sherman Hoyt, who have paid Dr. Coolidge's salary for the entire year.

The general cost of operating the Hospital for the twelve months ending

October 1st, 1904, has been \$30,227.17, exceeding that of last year by \$118.58, all departments having been opened the entire year for the first time in the history of our Hospital, and that the expenses have not been much larger in view of the increased number of patients and service is directly due to the care exercised by the various Committees and the Superintendent, who have been watchful of the expenditures in the different departments.

The work of the Out-Patient Department shows a slight increase in the number of patients—from 5,761 last year to 5,864 this—and the physicians in charge have taken the usual precautions so that free treatment should not be furnished to those able to pay. In a measure this department is self-supporting.

The Summer Committee at Oceanic, New Jersey, has managed that part of the work with a marked degree of excellence and careful oversight, and they have raised, from entertainments given during the Summer, \$1,013.50 for current expenses.

The reader is referred to the interesting report of the Chairman, Mrs. John Jay Knox, President of the Women's Board.

Through the Pathological Laboratory much valuable information has been obtained as to the cause of diseases, and the results of the year's investigation will no doubt interest many who are concerned in the scientific part of these researches.

The Report of the School for Infants' Nurses shows the number of graduates to be about the same as last year, and the demand for them greater than usual. Two thousand applications have been received through the twelve months ending October 1st, from persons wishing the services of Nursery Maids. This speaks in unmistakable terms of the value placed by the public on the work of this department.

We wish to record with grateful appreciation the gift of \$5,000 from Mr. and Mrs. George Arents, in memory of George Arents Brown, to endow a bed in perpetuity, and by the will of Mrs. Charles Harvey Hartman the receipt of \$4,750 on account of a bed in perpetuity.

The number of supported beds has increased to twenty, which is four more than the year previous.

The usefulness and real value of our various Boards and Committees has been apparent throughout the year, and we wish particularly to commend the work of the Women's Board of Managers and the faithfulness of the physicians and the active workers of the Institution, who by their conscientious and painstaking efforts have caused the Hospital to merit the aid received by it from the people of our city

O. G. JENNINGS, *President*.

B. OGDEN CHISOLM, *Secretary*.

REPORT OF BOARD OF MANAGERS.

TO THE BOARD OF DIRECTORS OF THE BABIES' HOSPITAL:

GENTLEMEN: In its life of sixteen years the Babies' Hospital of New York has passed through many and varied phases of existence; but in no one of them all has the work been so fruitful in good results and so full of interest, alike to the management and the general public, as the year just ended. To appreciate this statement, one need only compare the report of the attending physician and that of the Treasurer for this year with those of preceding years. It will be seen that more babies have been received without a corresponding increase in the expense account, and that a greater number have been discharged as cured or improved. It will also be seen that there have been more individual contributors to the fund. All important items in the summing up of a successful Hospital year.

When the present building was opened, in October, 1902, it was thought to have a capacity adequate to any demand which might be made upon it for some years to come; but to-day there are applications for admission from twice as many as can be accommodated. The plant is so admirably organized that it is believed arrangements might be made by which at least fifty (50) per cent. more infants could be cared for at an increase in expense of not more than fifteen (15) per cent. Such a plan would contemplate the lease of a small house somewhere in the immediate vicinity, where some of the nurses and practically all of the servants might be housed, which would leave the space now occupied by them free for use as wards.

Desirable as such extension of the work might seem to be, it is neither the purpose nor the policy of the management to make at this time any special appeal for funds in furtherance thereof. It would seem hardly fair to put to any further test the generosity of those friends whose large gifts have made it possible so recently to erect and equip the present building. It is reasonably certain that the desired end may be attained by a conservative course.

The Babies' Hospital, as a charity, has always appealed to the community at large; but its great value as an educational factor has only recently been fully recognized. Hundreds of babies in this city die every year through unskilful treatment, or from an entire lack of care at home. One is naturally led to inquire what proportion of such number might have been saved with specialized treatment, or if

the mothers had possessed some knowledge of the simple, sanitary conditions necessary to infant life. It may not be known to all that the hospital keeps in touch with cases discharged, and for a certain time thereafter such cases are visited and kept under observation by Dr. Coolidge, the hospital *externe*, who instructs the mothers in general hygienic and dietetic rules. This system is found to be productive of excellent results. It is earnestly hoped that in the near future some plan may be developed by which classes can be formed and instructions given by Miss Wheeler to mothers.

The Training School graduates each year from eighteen to twenty young women who, having received eight months training, are considered competent to take service as nursery maids. No medical skill is claimed for them. They are taught to give an infant intelligent care, to prepare the food and in the event of simple forms of illness to carry out the directions of the physician. They are nursery maids—not trained nurses—and are supposed to be subject to the same regulations which govern other domestic employees.

The Hospital at Oceanic was well filled during the three months of its occupancy, from June first to September first. The Summer Committee secured funds to the amount of two thousand dollars—nearly enough to defray the entire expenses of the season. One half of this sum represented the proceeds of two entertainments given at Monmouth Beach and Seabright.

The work of the Hospital has taken a firm hold upon the sympathies of the summer residents of these two resorts, and its support by them in the future is practically assured.

The Board of Women Managers desire to express their appreciation of faithful service and commendable zeal on the part of every officer and employee connected with the Babies' Hospital.

MRS. JOHN JAY KNOX, *Chairman*.

MEDICAL REPORT.

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

It is gratifying to record the continued growth of the work of the Hospital for the past year. The enlarging demands made upon our facilities indicate better than anything else could do the appreciation of this work by the general public.

The total number of patients admitted to the wards during the twelve months was 929, against 600 for the preceding year, an increase therefore of over 50 per cent. In addition to these ward patients 25 children were admitted to private rooms and 17 were remaining in the Hospital at the date of the last report, making a total of 971 patients treated during the year.

The death rate of this year is 27.7 against 30 per cent. the previous year. To one unfamiliar with the class of patients admitted this may seem high, but it only emphasizes the very grave condition in which a large number of children are found when they are brought to us, and the high mortality everywhere observed in early infancy from all acute diseases. It is a rule of the Hospital never to refuse any serious case, no matter how desperate, provided we have room.

Some unusual factors have contributed to the mortality of the past year. One is the large number of premature infants, 30, which were received. Of these, in spite of the most unremitting care and constant attention, including a new and improved incubator, only one child survived. The great majority of them, however, were not brought to the Hospital until they were several days old and then in such a condition that they were hopeless.

The epidemic of cerebro-spinal meningitis which visited the city during last spring and early summer, furnished us with 18 patients, only two of which recovered. These were most distressing cases not only on account of the severity of the illness, but its protracted character, many children dying after ten or twelve weeks of constant suffering. One entire ward was given up to these cases for several months.

To give one an idea of how seriously ill are many of the other children when brought to the Hospital, I need only state that more than one-third of the total deaths occurred within forty-eight hours after admission, and the majority of these within the first twenty-four hours.

July, as always, was the busiest month in the year, the admissions being 148, or an average of nearly five a day, and fully as many more children were refused for lack of room. Every bed at the Oceanic Branch, as well as in the city Hospital, was full, and besides filling the isolation room there were often two or three children in baskets.

A very noteworthy improvement is now evident in the results of cases of infant feeding over those obtained in our old building. Excellent results were also obtained in cases of pneumonia and other acute respiratory diseases.

The Work at Oceanic.—The Country Branch was open from June 1st to September 1st and was kept well filled during this period, 118 children being sent to the country. It was not often found practicable to transfer those most acutely ill or the very youngest infants, since these were unfortunately often in such condition that they were not able to bear the trip. The medical work here was on the whole very satisfactory on account of freedom from outbreaks of contagious diseases and many other embarrassments which in former years have interfered with the service. Striking improvement was seen in many children who had been doing badly in the City, as soon as they were transferred to the country. This was particularly true in the case of those over a year old. With the youngest infants the difference did not seem to be as great as might have been expected.

Outpatient Department.—The work of the dispensary has increased almost as much as that in the wards, 1,477 new patients being registered, an increase of 20 per cent. over the preceding year. The capacity of our dispensary rooms has been very nearly reached and further growth of the service will necessitate the opening of the dispensary in the morning as well as in the afternoon.

The Laboratory.—The demands upon this indispensable branch of the Hospital service have multiplied with the size and activity of the general work of the Hospital. Besides the routine work of the examination of the discharges from patients and the examination of pathological specimens, Dr. Wollstein has held as on the previous year a Fellowship from the Rockefeller Institute for Medical Research. Under these auspices an important study has been carried on on the Bacteriology of Acute Dysentery in Children. She is now conducting an investigation into the cause of whooping cough.

Private Patients.—The three private rooms have been occupied the greater part of the time. Most of the patients admitted have come from a distance, although there have been a goodly number from New York and vicinity received. The value to our nurses of experience with private patients has been very great, in fact it has come to be one of the most important parts of their course of training. A number of patients with grave acute disease have been admitted, but probably the

largest number have been cases for infant feeding, but several infants have been brought in for weaning or training, where conditions have been such that the problem at home became well nigh an insoluble one. The history of one of these cases of training is introduced as an illustration of the sort we meet. Several others equally as striking have been received.

A Case for Weaning and Training.—A child twenty-two months old living out of the city had been nursed by its mother until two months previously. The first child having died about the weaning period, the mother was very anxious about this one and decided to nurse her through the second summer. In the autumn she concluded to wean the baby. All nursing was stopped and a diet of pure cow's milk substituted. Result—at the end of twenty-four hours a severe attack of acute indigestion with repeated attacks of vomiting; so the child was put back upon the breast. After one week another attempt to wean was made, this time no milk being given, but potato, oatmeal, eggs and other solid food were tried in succession. Result—more indigestion, vomiting and diarrhoea. For two months these experiments were continued with every known infant food which could be suggested by friends. Some of these were vomited, but most of them were refused.

The child finally became so demoralized that it was difficult to make her take anything. The plan followed had been to attempt some kind of feeding for twenty-four hours, then as the child had taken nothing it was given the breast. Almost constant screaming resulted, partly from hunger, partly from nervousness and indigestion. Floor walking was then instituted. The parents alternated in this exercise, which was continued throughout the night. They were also ably seconded by the self-sacrificing aunt who volunteered her assistance. For a period of two months this situation had existed, during which time the child had lost nearly five pounds in weight and had the appearance really of being quite seriously ill. Now neither by coaxing, urging or force could it be induced to take anything but the breast. The mother's milk had now nearly disappeared and the situation was a grave one.

The father, who had read something of the Hospital in the papers, decided to bring the child for treatment and placed it in a private room, although a man of moderate means. No further nursing was permitted. During the first day in the Hospital the mother remained with the child, who screamed almost constantly and refused everything, even water. The second day the mother, fortunately for the child, was taken ill with tonsilitis and had to remain at home. This day the child took only two or three mouthfuls of milk and gruel, screaming as before from hunger, temper and excitement, and as stubborn as possible, the little mouth being

tightly shut and the teeth set whenever any one approached with food. Inasmuch as there were no signs of exhaustion it was decided to fight it out.

On the morning of the third day when the nurse entered the room with a cup of milk, the child smilingly reached out her hands for it and drank the whole eagerly, and from that time there was no further trouble in feeding. The first week she gained one pound in weight; and improvement continued up to the date of discharge. The father, in handing his check for payment, said that he had never paid any bill more cheerfully. On returning home there was no further trouble, and a report six months afterwards was that the child was in the very best of health.

Resident Medical Staff.—The resident medical staff has now been regularly organized with a house physician and an assistant, the former being permanent, the latter with a term of service for one year. There is now more than enough work to occupy the entire time of two physicians. In the summer, as neither of them could be spared for Oceanic, the services of an additional assistant were secured. Besides, during the summer months two advanced medical students assisted in the work of the wards mornings. The work of teaching has been continued during the last year, the entire Fourth Year Class of the College of Physicians and Surgeons receiving instruction in the clinic room during the fall and winter months.

In closing this medical report I wish to express my appreciation of the devotion of Dr. Dorothy Reed and her assistants, Dr. Anna Von Sholly and Dr. Louise Hutchensen, for their services during the year, which have been rendered in a most earnest and efficient manner.

The detailed report, giving the statistics of the number of patients treated, the character of their ailments and the results, will be found elsewhere.

Respectfully submitted,

L. EMMETT HOLT, M.D.

REPORT

OF THE

VISITING PHYSICIAN TO THE OUT-PATIENT DEPARTMENT.

TO THE BOARD OF DIRECTORS OF THE BABIES' HOSPITAL :

From October first, 1903, to October first, 1904, 294 visits were made at the homes of patients. While the greater number of patients have been feeding cases, numerous others have been visited and the treatment begun in the Hospital carried on at home. When absolutely necessary a mother will frequently be willing to part with her child long enough for an operation to be performed in the Hospital, but as soon as the operation is over she wants him at home to convalesce; many such cases have been cared for by the Visiting Physician during the past year.

Baby G. was operated on in the Hospital for empyema. She was then taken home and for six weeks her wound was dressed there.

Baby W. had a wound in her leg that had been so badly neglected that all hope was abandoned shortly after she was admitted to the Hospital. The mother, when told there was no hope for the child's recovery, refused to be separated from her longer and took her home. Every day for weeks the doctor called and dressed the wound until, much to everyone's surprise, it completely healed.

Baby D. was an interesting feeding case. The mother, a very ignorant woman, had lost several children because she had fed them so badly and otherwise neglected them. She finally took her last little girl to the Hospital, where treatment was begun. The child was then sent home and several calls were made at the house. The mother was given free milk tickets and carefully taught by means of object lessons exactly how to prepare the child's food, how to bathe her, clothe and give her fresh air. The mother became thoroughly interested and the child's improvement was very marked. Some months later when another baby arrived the mother sent for the doctor, saying: "I wanted you to show me how to fix the food for *this* baby, doctor, so he could get the right start and not die on me like the condensed milk babies did." She proudly exhibited the doctor's former little patient who was sitting in a clothes basket, clean, plump and smiling, saying: "See what you done fer her, doctor; when you first took holt of her her little chest looked just like me scrub board—you could see her ribs that plain—and now she has cushions of fat all over."

The father of another feeding case wrote to the doctor after the family had moved to another city, saying: "Every day I see the baby get more nice, bigger and stronger. These things altogether I have to thank you for it, and you can be very sure that we both together shall always be very, very grateful for your heartily treatment. Hoping you are well as this leaves us the same, I am yours most respectfully."

Last Christmas Mrs. J. S. Hoyt asked the doctor to collect eight of the most needy children and bring them to her house for a Christmas party. Some desperately poor children were chosen and taken to Mrs. Hoyt's own home, where her little boys exhibited a wonderful tree and gave the children presents and a feast such as they had never even dreamed of. They were surely the happiest children in all New York.

The doctor's book is full of interesting cases, but the above will serve to give an idea of this past year's work.

EMELYN L. COOLIDGE, M.D.,

Visiting Physician to the Out-Patient Dept.

The following extracts have been taken from a recent issue of the Archives of Pediatrics:

"For the past year and a half, over two hundred cases belonging to The Babies' Hospital have been closely followed at home and the results carefully noted. In some instances the patients have been treated in the Hospital for a short time, then discharged and the treatment continued at home, while in other cases all the work has been done in the tenements.

In treating these cases the following plan has been used:

First, and perhaps the most important of all, the mother of each case has had an object lesson in the preparation of the food and care of bottles and nipples. She has been made to stand by and look on while what kitchen utensils she had, necessary to prepare the baby's food, together with the bottles and nipples, were being thoroughly cleaned.

If directions are simply given to the mother, either written or verbal, they many times be like Greek to her. It is surprising how many absurd mistakes these women make. One woman actually strained the barley water, threw away the part strained and used the lumps remaining in the sieve to add to the milk! . . .

. . . It has been repeatedly demonstrated in the Out-Patient Department of The Babies' Hospital that babies of the poor do better on plain milk mixtures.

The following two cases will show what the results of Dr. Coolidge's work have been :

Case 1. E. R., aged three weeks, first seen on October 13th, 1903; weighed $8\frac{1}{2}$ pounds. After proper treatment and instruction given to the mother, on December 29th, weighed $13\frac{1}{2}$ pounds, a gain of 5 pounds in about $2\frac{1}{2}$ months.

Case 2. W. G., aged $2\frac{1}{2}$ months. Seen first on December 22d; weighed $13\frac{3}{4}$ pounds. Child had been losing weight and very ill. Through proper treatment gained quite steadily and on February 12th weighed $15\frac{3}{4}$ pounds. Many other cases of this kind could be cited.

THE ANNUAL REPORT

OF THE

CRIBSIDE COMMITTEE OF THE BABIES' HOSPITAL FOR THE YEAR 1903-1904.

TO THE BOARD OF DIRECTORS :

During the season of 1903 the Cribside Committee of The Babies' Hospital held regular monthly meetings at the Hospital, 657 Lexington Avenue, on the second Wednesday of every month at 12 o'clock.

At the November meeting the following officers were re-elected for the coming year :

MRS. BRYCE GRAY,	President.
MISS E. L. ADEE,	Vice-President.
MISS MAUDE H. CURTISS,	Treasurer.
MISS C. L. MORGAN,	Secretary.

A number of the old members resigned, but quite a few names were added to the list of managers during the Winter.

Visiting was done regularly, members being appointed for that purpose at the meetings every month.

The usual Thursday Sewing Class was held during Lent, the meetings taking place in the mornings. They were fairly well attended, and 411 garments were completed.

Special committees were organized to carry on the work of the class, sending out the notices, etc.

On March 26 a Summer Sale was held at the Hospital and many friends of the Cribside attended it. The proceeds from the Sale amounted to about \$325.

At the April meeting it was decided to ask each member to hold herself responsible in raising \$10 during the summer season for the work of the Cribside.

The Treasurer reported at last meeting in May a balance in the bank of \$898.20.

Respectfully submitted,

CAROLINE L. MORGAN,

Secretary.

REPORT OF SCHOOL FOR INFANTS' NURSES OF THE BABIES' HOSPITAL.

TO THE BOARD OF DIRECTORS:

The appreciation of the work of our Training School can be in a measure determined by the demand for our nurses. During the last year there were over two thousand calls for nurse maids, and there has never been a time during the year that we have not had a list of from ten to thirty names of people waiting for any of the old graduates that might chance to leave their places and report at the Hospital; and for the past five years there has not been a time when the nurses in training have not been engaged ahead from six to eight months, before it was time for them to leave the Hospital. The course of training covers a period of eight months, and a large part of the instruction consists in practical demonstration, such as bathing, dressing, feeding, etc. It is our aim to teach simple, fundamental truths relating to the care and general hygienic rules by which a healthy baby is to be kept well and a delicate child made strong. Informal talks are given by the Superintendent to the nurses, not only on the topics mentioned in the schedule of instruction, but also the nurse's duties in the household, responsibility, obedience and other topics of equal importance connected with the technical training. The kindergarten instruction which is given once a week by a competent teacher is also intended to increase the nurses' interest in her work. The managers of the Hospital are most careful in selecting the candidates for admission, also in investigating their references. References of less than one year's continuous satisfactory service are not accepted.

SCHEDULE OF INSTRUCTION.

- I. Infant feeding.—The care of milk; milk sterilization; care of bottles; preparation of food, with rules as to quantity and frequency.
- II. Bathing.—Daily Bath; the use of hot, cold, bran and mustard baths.
- III. Hygiene of Skin: care of mouth, eyes, ears and nose.
- IV. Nursery hygiene.—Ventilation, temperature, cleanliness, care of napkins, etc.
- V. Training of children in proper bodily habits.
- VI. Miscellaneous.—Use of clinical thermometer; making of poultices; giving of enemata; gavage feeding.
- VII. Simple means of treatment in nursery emergencies.
- VIII. The rudiments of kindergarten work.

7 prs. socks; 3 prs. stockings; 3 sacks; 1 bottle
bag.

Wilson, Mrs. William G.,

39 bands.

Wiggins, Mrs. Halsey,

Toys.

THE "CHILDREN'S CHARITY."

This is a Society formed for the purpose of interesting children in the practical work of the Hospital. The method of securing this co-operation is attained: First, by inviting any children to join the Society and pay the yearly dues of \$1 each. Second, by asking the members to interest themselves in any practical work or unselfish way for the benefit of the babies. This can be done in more ways than one. Some little self-denial or the saving of pennies, remembering the babies at Christmas time, etc.

The proceeds from this year's dues, \$177.20, has been turned over to the Treasurer and disbursed for the actual needs of the babies, being all expended in nursery necessities, for warmth, comfort, etc.

Each child can feel that his or her dollar goes, as it were, directly to help clothe or comfort some less fortunate one.

An invitation is extended to all children whose parents or friends have the Hospital's interests at heart to join the "Children's Charity," communicating with Mrs. E. K. Beddall, 335 West Seventy-seventh street, for this purpose, to whom also the yearly dues may be sent and by whom they will be acknowledged.

The following members are enrolled under the present year:

GENERAL RULES.

1.—The beds of the Hospital are free to the needy poor. Others are charged, according to their means, from \$2 to \$7 a week for board.

2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.

3.—Applications for admission should be made at the Hospital during the morning hours, from 9 to 12, although emergency cases are received at any time.

4.—The Out-Patient Department is open daily throughout the year, from 2 to 3 P. M., excepting on Sundays and holidays.

5.—Visiting day, for friends of patients, is Thursday, from 11 A. M. to 1 P. M.

6.—Visitors to the Hospital are welcome any afternoon between 3 and 5.

HOSPITAL CALENDAR.

ANNUAL BOARD AND CORPORATION MEETING, third Tuesday in January.

REGULAR BOARD OF DIRECTORS MEETINGS, third Tuesday in October, January and April.

EXECUTIVE COMMITTEE, third Tuesday in November, December, February, March and May.

ANNUAL MEETING OF THE WOMEN'S BOARD, second Tuesday in December.

Seventeenth Annual Report
From October 1st, 1904, to September 30th, 1905

1117

"The Officers of The Babies' Hospital regret extremely the late issue of this Report. The matter, which was all ready for the press some months ago, has been held up and delayed through the strike of the printers, and the publishers have used their best efforts to hurry it along without any great measure of success. It is hoped that all typographical errors noticed in this Report will be overlooked by the friends of the Hospital, in view of the difficulty which the officers and publishers have had in getting it ready for presentation to the public."

------------------------	---

HOSPITAL BUILDING, LEXINGTON AVENUE AND 55th STREET.

The building on Lexington Avenue, to the north of the Hospital shown on the left side of the picture, has been purchased by us during the past year and we hope to enlarge our accommodations shortly by an addition to our new building.

THE NEW YORK
PUBLIC LIBRARY

ASTOR, LENOX AND
TILDEN FOUNDATIONS.

STATEMENT OF FACTS.

First.—This hospital has been established seventeen years and is the only Hospital in New York which cares only for babies. It is carefully and economically managed and besides the city work it has a Summer branch at Oceanic, N. J., established some eight years ago. Altogether, over 7,000 babies have been admitted in our wards.

Second.—The support of this Hospital is derived chiefly from its subscribers, to whom it appeals each year for a renewal of contributions.

In sending us a check for the Expense Account, kindly make it to the order of The Babies' Hospital, and mail it to Mrs. John B. Calvert, 14 West 54th Street.

All our business is done by mail or through our friends.
WE DO NOT EMPLOY COLLECTORS.

THE SEVENTEENTH ANNUAL REPORT

OF THE

DIRECTORS OF THE BABIES' HOSPITAL OF THE CITY OF NEW YORK.

From October 1st, 1904 to September 30th, 1905.

The Babies' Hospital has completed the Seventeenth year of its work exclusively for babies in this great city. The results obtained have been on the whole satisfactory. During the period named we have treated over 7,000 babies, and we are pleased to state that we have never refused a case because of inability to pay.

There have been times when our wards have been over-crowded both in the city and at Oceanic, and at such times we have had to refuse treatment.

The care of babies is so very exacting and requires so much detail that we have sometimes been alarmed at the expense incurred. It is not always understood by people that the cost for the care of babies in hospitals is far greater per capita than for adults. One nurse cannot properly care for many babies, especially as nearly all of the patients coming to us are dangerously ill.

Since we have moved into our new Hospital there has been a notable decrease in the death rate most satisfactory to the management, attributable, of course, to improved hygienic conditions and more breathing space per patient.

There has been much good work done during the year, the details of which will be found in the various Reports. Our Visiting Physician has accomplished even more than last year, but the real result can hardly be estimated.

The Medical Board have been most earnest in their attention at the Hospital, giving each case careful consideration, the general results of which have been most satisfactory. The facts regarding the medical work are fully set forth by our Attending Physician on Page 13.

The Women Managers have combined their efforts in many ways during the past year, one beneficial result being the entertainment held during the summer at Oceanic, which largely increased the revenue for the year.

The work of the Out-Patient Department shows a slight increase over the past year, and still our efforts are confined to treating only the worthy cases.

The Summer Committee, in charge of Mrs. John J. Knox, Chairman, has done faithful work in behalf of the Hospital at the Summer Branch, Oceanic, N. J., The report of that Committee, found on Page 35, will prove of interest.

The Cribside Committee is rendering its usual valuable assistance in various ways, notably through the entertainment which the members organized, known as the "Hackett Benefit," proceeds of which were over \$1,000.

The Laboratory has been instrumental in obtaining results which, from a medical point of view, were most useful in the work carried on.

The total receipts on account of income for the year have been \$37,072.63, somewhat greater than last year, and well within the expenses, which were \$33,812.-82.

The officers feel that they have reason to be congratulated on the satisfactory showing in the finances.

Every department has been carefully managed, but, notwithstanding that, owing to the somewhat larger force, the amounts paid out for salaries and provision, and for fuel and light, were larger.

During the year the Hospital purchased No. 661 Lexington Avenue out of moneys especially subscribed for that purpose. The cost of the property was \$23,500, and a total amount of some \$28,000 was given, which was sufficient to make the necessary repairs and alter the main Hospital to accommodate the additional number of patients. The full list of the contributors to this fund will be found on Pages 36 to 54.

We wish to record with grateful appreciation the following special gifts:

The late Mrs. J. Henry Lane	\$5,000
To endow a bed in perpetuity.	
Mrs. Daniel S. Lamont	5,000
To endow Julia Lamont bed in perpetuity.	
Miss Emily A. Watson	10,000
Mrs. William Seward Webb	2,500
Mrs. Oliver G. Jennings	1,000
Otto H. Kahn	1,000
Mortimer L. Schiff	1,000
George R. Sheldon	1,000
and others of smaller amounts.	

Towards purchase of No. 661 Lexington Avenue.

Other gifts of smaller amounts were duly received and likewise appreciated.

It is particularly gratifying to note how deeply interested all our friends are in the work which we have in hand. There certainly is behind it all a reason for sympathy, owing not only to the helpless condition of the babies, but to the extreme poverty of the majority of the parents who bring their children to us.

We wish to extend our thanks to the physicians and others who have helped us, to the members of the Women's Board, who have so cheerfully lent their aid, and to all the House Officers, who, in the faithful performance of their duties, have done so much to make possible the results accomplished.

O. G. JENNINGS, *President.*

B. OGDEN CHISOLM, *Secretary.*

MEDICAL REPORT.

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

On October 1, 1905 the Babies' Hospital completed its sixteenth year of work and the third year in its new building.

This has been much the most active year in the history of the Hospital and a steady growth has been seen in all departments. The Hospital in the City was open throughout the summer in all its wards, the work being interrupted only by painting and necessary repairs. The Country Branch at Oceanic was in operation for three months and the service here was more active than it has been for several years. The Dispensary has shown a very continuous increase, both in numbers of new patients and in daily visits.

The total number of ward patients admitted was 1000 as against 946 for the previous year. With our number of beds (50), one can see how active this service has become. An average of 20 patients occupied each bed during the year.

The total number of hospital days, which represents better even than the number of admissions the actual work performed, was 17,371, an increase of 13 per cent. over last year. The number of deaths was 289. It is gratifying to note that there has been a slightly diminishing death rate for the last few years; two years ago it was 30 per cent, last year 27.7 per cent, and for the year just closed 27.1 per cent. Considering the large number of very sick infants, who were brought for treatment, this is encouraging. As in previous years the principal factors in the hospital mortality have been marasmus, acute pneumonia, tuberculosis, cerebro-spinal meningitis and prematurity.

Thirty-six cases of cerebro-spinal meningitis were treated last year. During the height of the epidemic, from February until June, two entire wards were filled with these patients. The type of the disease seen in the hospital was the most severe form, and no child under one year recovered, although seven complete recoveries were seen in those who were older. On account of the prolonged course of the disease and the distressing symptoms, these children cannot be treated in their homes, and all who applied to us were received, even though the outlook was hopeless from the start. The epidemic was virtually over by the early summer, and while a few cases have been received since then, the indications are that the present year will not see as many as last year.

Few people have any idea of the prevalence of tuberculosis among infants and young children. Last year 40 cases of tuberculosis were admitted; 19 of these being

tuberculous meningitis, this being one of the most frequent forms of the infection seen in infants. The disease is very common among the infants of the poorer classes. A direct house infection could be traced in many instances, and in several the mother was suffering from the disease. Infants seem more liable than older children to contract tuberculosis from the fact that they are always inmates of the house, they come in close contact with the parents or other invalids, and are constantly on the floor, where tuberculous dust is most often present.

Acute pneumonia furnished 173 cases. Of this number 130 were examples of acute broncho-pneumonia with 40 deaths, and 33 lobar pneumonia with 9 deaths. The mortality of the latter is generally not high in children, and of the fatal cases several were moribund on admission. Nearly all who were admitted in good condition recovered.

The winter of 1904 and 1905 was a remarkable one for the prevalence of pneumonia throughout the city. Little children are peculiarly susceptible to this disease. In spite of all our precautions, from time to time cases developed in the wards. The disease seems especially likely to spread when associated with influenza, which was the case in a large number of children. In no other class of patients is it more important that scrupulous cleanliness in the wards, sufficient amount of cubic feet of air space, and the best hygienic conditions should be afforded.

The number of premature infants admitted continues to be large and steadily increasing year by year; 43 of these patients were received during the past year; of which 24 were so small or so feeble that they survived but a short time, 11 dying on the day of admission and 7 on the following day. Of 19 who may be considered fair subjects for treatment, 10 were saved, although 2 of these subsequently died from some acute disease after they had reached average weight; one, from erysipelas, one from pneumonia. The smallest infant saved weighed 3 lbs. 2 oz. on admission. Our wet nurses proved of the greatest assistance in rearing premature infants. In the treatment of these cases during the past year we have had rather striking success with the electric pad used for the purpose of maintaining the body heat, and have found it quite as efficient as the incubator, without the dangers which inhere in the latter. By this means the premature infants have been kept in the wards with the other patients.

The Dispensary during the past year has shown a steady increase in its service and the number of patients has now become so large that the Medical Board has decided that it was necessary to open the Dispensary for a morning as well as an afternoon class. This new arrangement will begin on January 1st, 1906.

The work of the visiting physician to the Out-patient Department, Dr. Coolidge, has been large during the year and has been of the greatest assistance

in following up acute cases discharged or removed from the hospital, and also many of the cases of infant feeding.

The work in the Laboratory has been conducted as heretofore by Dr. Wollstein assisted by Dr. Reed. Work has been carried on here during the Winter and Spring under the two commissions appointed by the New York Health Department, one for pneumonia and one for cerebro-spinal meningitis, and many of the most important results in the work of these commissions have been made possible through the use of our laboratory and the clinical cases of the service. During the present year Dr. Wollstein holds as heretofore a fellowship from the Rockefeller Institute of Medical Research, and she is at present working upon the problem of pneumonia and influenza.

Two clinical lectures a week have been continued during the winter given to the fourth year students of the College of Physicians and Surgeons

The Medical Board has been increased during the year by the appointment of Dr. Arthur B. Duel as Otologist. Diseases of the ear are so common among infants, that his work has been of great assistance.

Some changes have been made in the internal medical organization. The staff now consists of a House Physician, a position which is to be somewhat permanent, and two Assistants, each of whom serves for one year.

On the whole the medical work of the past year has been more satisfactory than that of any year previously. I cannot close this report without expressing my appreciation of the very valuable service of the Resident Physician, Dr. Reed, and her Assistants, Drs. Hutchensen and Finch.

L. EMMETT HOLT.

REPORT

OF THE

VISITING PHYSICIAN TO THE OUT-PATIENT DEPARTMENT.

TO THE BOARD OF DIRECTORS OF THE BABIES' HOSPITAL:

FROM OCTOBER 1ST, 1904, TO OCTOBER 1ST, 1905.

During the past year 301 visits have been made at the homes of patients. The majority of families visited have been new ones, but some few have been visited ever since the work began, as each year brings a little newcomer who needs to be started on the proper food. Such a family is that of the O D's. whose third baby in as many years, the doctor is now visiting. The mother of this family is now quite an expert in the actual preparation of the food, but she always wants the doctor to "give 'em a right start," as she calls prescribing the especial formula best suited to the individual child. She was most grateful for a baby carriage which the doctor begged from a friend, and now nearly every day the two youngest babies may be seen taking an airing in the carriage, which is pushed by one of the older children, while the three year old baby takes hold of the handle of the carriage and has an occasional ride sandwiched in between the two smaller ones. There is really nothing that the doctor so much needs in this work as baby carriages or go-carts. The very poor can seldom afford to buy these even on the installment plan, and when the mother must work and has a large family of very young children the older ones must take the babies out if they are to get any fresh air at all, and it makes one's heart ache to see the "little mothers" bending over under the burden of one heavy baby while a child scarcely able to toddle clings to her skirts.

Baby K., a little two-year girl with a very bad form of heart disease, has been visited regularly for many months. While there is no cure for this unfortunate child, much can be done to make her more comfortable and to prevent bed sores, etc. She lives in one of the worst Jewish quarters of the city; no sunlight ever enters the two miserable little rooms on the ground floor, which are occupied by this poor child, her parents and three brothers and sisters. She has been literally kept alive by a preparation of beef peptonoids taken to her, as she has such a very poor appetite she will eat scarcely anything.

Arthur D. has been in the Hospital several times with pneumonia and been treated at home for some time between. His mother is a very hard working little woman but very delicate. While she was ill last winter and in a hospital the father,

who is a hopeless epileptic, beat one of the children most cruelly; he was finally arrested and made to serve some time in prison.

Baby B. has a mother who thinks she knows a great deal about medicine. The other day when the doctor made a call on the baby, the mother exclaimed, "I know what ails this child, doctor, it's gasteritis." "Does the baby throw up his food?" the doctor asked. "Oh no, doctor, but I can just feel the gas rolling around in his little insides, so of course he must have gasteritis," the mother gravely replied.

Mrs. J. S. Hoyt gave another Christmas party for some of the poorest children visited and it was a great success. The large tree lighted by many electric lights was truly wonderful to the children, many of whom had never seen a Christmas tree before. One little guest gazed in amazement at the open wood fire in the room; he then turned to Mrs. Hoyt and said: "Say, them sort of fires ain't the style now; *we* always has *our* fire in a *stove*."

EMELYN LINCOLN COOLIDGE, M.D.,
Visiting Physician to the Out-Patient Dept.

THE ANNUAL REPORT

OF THE

CRIBSIDE COMMITTEE OF THE BABIES' HOSPITAL FOR THE YEAR 1904-1905.

TO THE BOARD OF DIRECTORS:

The regular monthly meetings of the Cribside Committee of the Babies' Hospital were held during the season of 1904-5 on the second Wednesday of every month at 12 o'clock, at the Hospital, 657 Lexington Avenue.

At the November meeting the following officers were elected.

MRS. BRYCE GRAY,	President.
MISS E. L. ADEE,	Vice-President.
MISS MAUDE H. CURTISS,	Treasurer.
MISS S. E. LANGDON,	Secretary.

Visiting at the Hospital was done regularly during the winter, committees being appointed at the monthly meetings for that purpose.

Through the courtesy of Mrs. Doremus, the author, and Mr. Hackett and his company, a performance of "Fortunes of the King", was held at the Lyric Theatre on December 21 and a large sum was netted for the benefit of the Cribside Committee.

The Sewing Class was held as usual on Thursday mornings during Lent. The attendance was good and an unusually large number of garments were completed.

At the May meeting, the Treasurer reported a balance in the bank of \$1,831.27.

Respectfully submitted,

SOPHIE E. LANGDON.

Secretary.

LIST OF MEMBERS OF CRIBSIDE COMMITTEE.

ACTIVE MEMBERS.

Miss Ellen L. Adee,
Miss Zeo E. Banks,
Miss Louise Barnard,
Mrs. J. Morris Butler, Jr.,
Miss Emily Coddington,
Miss Maude H. Curtiss,
Miss M. Dinsmore,
Miss Dows,
Miss H. G. Ferguson,
Mrs. Bryce Gray,
Miss May Hadden,
Miss H. Hawley,
Miss Ruth L. Hoe,
Miss Holbrook,
Miss Hester G. Hone,
Miss Frances Howland,
Miss Fannie Irvine,
Miss M. M. Kemp,

Miss Adelaide Knox,
Mrs. Eugene Lentilhon,
Miss Katharine Lockwood,
Mrs. R. Hall McCormick, Jr.,
Miss Caroline Morgan,
Miss Sophie E. Langdon,
Miss Mary Mortimer,
Miss Louisa Nairn,
Miss Elizabeth Nicholas,
Miss Elizabeth Oakley,
Mrs. W. C. Peet,
Miss Elizabeth Perkins,
Miss Genevieve Robbins,
Miss M. Therése Smith,
Miss H. M. Stuart,
Miss Stüger,
Miss Edith C. Thompson,
Miss Ethel Turnbull,

Miss Tremain.

ASSOCIATE MEMBERS.

REPORT

OF

SCHOOL FOR INFANTS' NURSES OF THE BABIES' HOSPITAL.

TO THE BOARD OF DIRECTORS:

GENTLEMEN: Another year has passed and the work in our Training School is progressing.

Never before has there been such a demand for our nursery maids, there being from six to ten calls a day for them, from out of the city as well as in it; and from Florida to Maine, showing we are well known over the country.

This year the capacity of our Hospital was increased to sixty-five beds, necessitating an increase in our Training School.

We now have thirty-four nursery maids, who have practical training each day in the wards, as to the proper method of lifting and holding a baby, bathing, caring for the mouth, eyes, etc., also regular class work each week.

The routine work was continued at Oceanic during the summer. We have tried to make our school a model one, and our nurses seem to take a personal interest in the work.

The Kindergarten instruction continues each week throughout the winter, and the nurses amuse the children with the games and finger plays.

SCHEDULE OF INSTRUCTION.

- I. Infant feeding.—The care of milk; milk sterilization; care of bottles; preparation of food, with rules as to quantity and frequency.
- II. Bathing.—Daily Bath; the use of hot, cold, bran and mustard baths.
- III. Hygiene of Skin: care of mouth, eyes, ears and nose.
- IV. Nursery hygiene.—Ventilation, temperature, cleanliness, care of napkins, etc.
- V. Training of children in proper bodily habits.
- VI. Miscellaneous.—Use of clinical thermometer; making of poultices; giving of enemata; gavage feeding.
- VII. Simple means of treatment in nursery emergencies.
- VIII. The rudiments of kindergarten work.

\$29,238.41

EXPENDITURES.

1905. Oct. 1. By Balance on hand in Fifth Ave. Trust Co.	\$29,238.41
---	-------------

\$29,238.41

NOTE: \$7,750. of the above contributions were received prior to May 1, 1905, by Henry R. Kunhardt, treasurer of the Permanent Fund, which amount, with interest, (\$25.13) was transferred to Mrs. Calvert, treasurer, May 3, 1905, under authority of the Board of Directors.

REPORT OF SUMMER COMMITTEE.

TO THE BOARD OF DIRECTORS OF THE BABIES' HOSPITAL:

GENTLEMEN: As Chairman of the Summer Committee, Babies' Hospital, Oceanic, I beg to submit the following:

The officers and employees gave to the work excellent attention; the medical work was equal in all respects to that of the preceding year, while the domestic management was beyond question the best and most economical we have ever had.

Miss Smillie had been led to believe that her salary would be increased from April 1st of this year, when she was put in charge of the training of the nurses. She feels that it should be at the rate of \$1,000 per year from June 1 to November 1, and from that date at the rate of \$1,200. This is really a just claim. I *know* that during the summer Miss Smillie was offered another position in Hospital work at \$100 per month, but refused to desert us in mid-summer.

Dr. Kimball, who was each day at the Hospital, says: "Her services were invaluable". The Women's Board were practically unanimous in the opinion that this increase should be made, but I assured them that it would be impolitic, if not actually an infraction of the rules, to do so without the sanction of the Executive Committee of the Board of Directors.

The wind-mill was destroyed about a week before the closing of the Summer Buildings. A severe wind storm caused considerable damage throughout that section. There is some necessary painting to be done to the tin work and canvas flooring at the main building. I enclose an estimate which I had made. I did not, of course, authorize the work, but would suggest that it be not delayed too long.

The Nurses' Home and the Hamersley Cottage have both settled very badly. They are built on posts and ought to have immediate attention. I got a very reliable builder, Mr. Williams, of Prichard & Williams, Sea Bright, to estimate upon the cost of substituting brick piers for the posts (laid in cement) and to wall up in brick between the piers.

To do the Nurses' Home will cost from \$500 to \$550. To get at the exact cost of the same work at the Hamersley is impossible, at it will be necessary first to take up the flooring of the porches and take out the beams, which are rotten, so as to see in what condition the present supports are.

I hope that a committee may be appointed to determine how much work should be done. If there had been time on Tuesday afternoon I could have stated these facts far more briefly.

Most sincerely yours,
CAROLINE E. G. KNOX.

- Worcester, Master James Blaine,
Box of flowers.
- Zinn, Mrs. A. T.,
10 petticoats; 12 wrappers.

THE "CHILDREN'S CHARITY."

This is a Society formed for the purpose of interesting children in the practical work of the Hospital. We desire to secure the co-operation of as many children as possible and for this purpose we have formed the League known as the "Children's Charity."

First—We ask you to pay the annual dues of \$1.

Second—We want you to interest yourselves in the practical work of the Hospital. This can be done in many ways. The contents of your savings bank will help purchase many useful articles for the babies.

The proceeds from the dues and other receipts this year from the members of the "Children's Charity" have been turned over to the Treasurer and disbursed for actual needs of the babies, to furnish them with clothing and other necessities. If you will join this League, you may feel that every penny that is contributed will go directly to help some less fortunate one than yourself.

Send all money intended for the "Children's Charity" to Mrs. E. K. Beddall, 335 West Seventy-seventh Street, who will gratefully acknowledge the same.

The following members are enrolled under the present year:

GENERAL RULES.

- 1.—The beds of the Hospital are free to the needy poor. Others are charged, according to their means, from \$2 to \$7 a week for board.
- 2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.
- 3.—Applications for admission should be made at the Hospital during the morning hours, from 9 to 12, although emergency cases are received at any time.
- 4.—The Out-Patient Department is open daily throughout the year, from 2 to 3 P. M., excepting on Sundays and holidays.
- 5.—Visiting day, for friends of patients, is Thursday, from 11 A. M. to 1 P. M.
- 6.—Visitors to the Hospital are welcome any afternoon between 3 and 5.

HOSPITAL CALENDAR.

- ANNUAL BOARD AND CORPORATION MEETING, third Tuesday in January.
- REGULAR BOARD OF DIRECTORS MEETINGS, third Tuesday in October, January and April.

------------------------	---

HOSPITAL BUILDING, LEXINGTON AVENUE AND 55th STREET.

The building on Lexington Avenue, to the north of the Hospital shown on the left side of the picture, has been purchased by us during the past year and we hope to enlarge our accommodations shortly by an addition to our new building.

1571

STATEMENT OF FACTS

This hospital has been established eighteen years and is the only Hospital in New York which cares only for infants and young children. It is carefully and economically managed and besides the city work it has a Summer branch at Oceanic, N. J. Altogether, over 8,000 babies have been admitted. In the last year 1076 children were treated in the wards, and 2130 in the out-patient department.

The support of this Hospital is derived chiefly from its voluntary subscribers, to whom it appeals each year for a renewal of contributions.

In sending us a check for the current expenses, kindly make it to the order of The Babies' Hospital, and mail it to Mrs. John B. Calvert, 135 E. 55 St.

THE HOSPITAL EMPLOYS NO COLLECTORS.

REPORT OF THE DIRECTORS.

The Babies' Hospital has again completed its year of usefulness.

One of the most important incidents of the past year has been the retirement of Miss Wheeler as Superintendent, after fifteen years of faithful and valuable service, and the coming of Miss Mary Agnes Smith to this position.

We have not, unfortunately, received any important large gifts of money this year which could be added to an endowment in which the institution is so lacking. Our friends who so generously remember us by yearly subscriptions have, for the most part, continued their interest, and without their aid this great and good charity could not exist.

To all of these good friends the Board tenders its most hearty thanks.

We found demands increasing so rapidly upon us that in the Spring of 1905, the officers found it wise and necessary to purchase the dwelling house next adjoining the Hospital upon Lexington Avenue. Through the generosity of friends we were able to make this purchase without incurring debt.

We have been in occupation of these additional quarters practically all this past year. We also found it necessary, this year for the first time, to keep the Hospital open through the summer, working at its full capacity, in addition to the Summer home at Oceanic the same as formerly.

In consequence of having this adjoining house, so positively needed, and running open with a full force of attendants both here and in Oceanic, our salary and wage accounts, and, naturally, food supplies, made so great an increase over former years, that comparisons of our expense account cannot properly be made. A study of the various detailed reports which follow will, however, tell the increased amount of work the institution has done, as well as its better quality. The per capita cost will, however, remain greater than it should, until we are able to secure enough funds to erect a new building upon the adjoining site on Lexington Avenue before referred to.

In the meantime, we wish to assure our kind and generous friends that we believe all of us, both men and women, actively interested in this work, are constantly and conscientiously striving for the best results in this most interesting, and we think, one of the most valuable educational and charitable institutions of the City.

We take this opportunity of again thanking the various Committees, Women's Board, physicians, officers, and all others who have given of their time and skill for the betterment of infantkind.

O. G. JENNINGS, President.

REPORT OF THE BOARD OF WOMEN MANAGERS.

The comprehensive reports of Dr. Holt, and the various officers of the Babies' Hospital cover almost completely the field of work accomplished during the current year, and in no better way can one estimate the amount of good that has been done than by a careful study of them. Certainly in no surer way will one reach the conclusion that the work must be extended, thereby securing increased space for the accommodation of more infants and enlarged facilities for improved methods of treatment.

In October, 1902 the present building was opened, and so continuous were the demands upon its capacity that in the autumn of 1904, two years later, the necessity for increased accommodations was forced upon the management. It was decided to purchase the adjoining house, with a frontage of twenty feet, and generous friends contributed the necessary sum. It was believed then that by utilizing the space so gained for sleeping rooms that some years might elapse before we should ask any further aid in this direction. It has now become obvious to all however, that in order to give the public the full benefit of our efficient staff and perfectly equipped plant, we must yet again extend the boundaries of our building, and to carry out the plan effectively, the sum of \$75,000 will be needed. Never in the history of the Hospital has it been found that friends or funds have been wanting to further any project which met the endorsement of our Board of Directors, and in making a third appeal, within so brief a period, we feel confident there will be a sufficient number of philanthropic men and women ready to heed the call. Many there are who have not already given of their abundance, and others, who, having given, are ready and anxious to see the Hospital's usefulness extended by means of additional gifts.

During the year the House Committee under the guidance of the very efficient chairman, Miss Evans, has instituted many changes in the domestic arrangement of affairs, in all of which it has had the hearty co-operation of the Superintendent, Miss Mary Agnes Smith. In nearly every instance such change has effected an economy and has proved beneficial to interests of the Hospital.

To those who have been interested in following the recent discussion of the importance and advantage of a system of uniform hospital accounting, the sum expended annually for a given number of patients treated in our Hospital may, by comparison, seem extravagant. Certain conditions incident to the care of infants should, however, subject the Babies' Hospital in a great measure to more individual treatment. The necessity of almost unremitting attendance upon infants, the excess of laundry work for them over that of adults, the greater

number of individual meals to be prepared—these, and a variety of kindred demands, call for disbursements not set forth in an ordinary accounting in hospitals where adults are treated.

The Hospital at Oceanic made a new record for itself in economy of management and its resultant financial showing. Special thanks are due to the women who comprise the Summer Committee for their interest and zeal manifested throughout the season. In this connection should be mentioned an entertainment entitled, "An Hour with the Old Masters," consisting of twelve beautiful tableaux, representing principally portraits by celebrated artists. The entire entertainment was planned and carried out under the personal supervision of Mr. and Mrs. John W. Alexander. It was both socially and artistically a pronounced success, and netted the Hospital more than \$1,800. For their generous gift of time and services, the Hospital Management records its grateful appreciation.

The summer treasury shows total receipts of \$3,000, sufficient to meet the expenses of the three months' service at Oceanic.

In conclusion the Board of Managers desire to express to the officers and employees an earnest appreciation of their untiring efforts throughout the past year for the best interests of the Hospital.

CAROLINE E. G. KNOX,
President of the Board of Women Managers.

MEDICAL REPORT

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

The Babies' Hospital has now been in existence for eighteen years. It is fitting, therefore, to inquire what has been accomplished during this period, by this and other agencies working along similar lines, for the relief of infants and young children. Have there been any striking results that can be measured? Everyone knows how hard it is to estimate the value of work of this kind. There is, however, one definite way it ought to be evident, viz.: by a comparison of the death rate among children now and eighteen years ago. It would seem that in this way, more accurately than in any other, can the effect of such work be shown.

WHAT HAS BEEN ACCOMPLISHED IN EIGHTEEN YEARS

From the records of the Health Department, the following comparisons are made:

In the year 1888, out of every 1000 children under one year of age, 242 died.

In the year 1905, out of every 1000 children under one year of age, only 170 died.

The estimated population of the City under one year is 62,596.

The saving of 70 lives per 1000 would mean a yearly saving of 4,375 infants.

Still more striking is the improvement when we consider all children under five years of age. The mortality has fallen in eighteen years from 101 per 1,000, to 55 per 1,000, a reduction of almost one-half. This represents an annual saving of the lives of 12,604 children under five years in the City of Greater New York.

In 1905 there were actually 93 fewer deaths among infants under one year, and 2,201 fewer deaths among children under five years, than in 1888, despite the great increase in the City's population during this period.

Such a record of life saving is without a parallel in our history. It should be understood that this is not an apparent gain made by comparing a very unfavorable year with a very favorable year; the improvement indicated by these figures has been a gradual one, each year showing, almost without a single exception, a gain over the previous year.

Many agencies have been at work, each of which has contributed something toward this beneficent result. Of these may be mentioned, the introduction of diphtheria antitoxin; a more efficient system of tenement house inspection; supervision of the milk supply by the Health Department; the work of the Straus milk

depots, and of the diet kitchens in furnishing pure milk to many infants in the summer; the increased provision for summer outings for children, both by daily excursions and for longer periods at country homes. But, more important than any of the above, is the better knowledge of the care of infants in health and their treatment in illness, and a wider diffusion of such knowledge both among the rich and poor. To this, it is not too much to say, that the Babies' Hospital has contributed no small part.

Eighteen years ago, many had their misgivings regarding the wisdom of establishing a separate hospital for the treatment of infants and young children. The existence of such a hospital has been amply justified by the results, and the officers of this institution and the friends who have generously contributed to its support, may feel a pardonable pride in what has been accomplished.

The beginning of improvement in any problem in hygiene or medicine must be an accurate knowledge of the difficulties to be met. How great the difficulties in connection with the care of infants in large cities are, no one knows better than those who have labored in the Babies' Hospital. How far we still are from a satisfactory solution of the problems connected with the hygiene of young children and their treatment in disease, is shown by the fact that in the year 1905 there were in New York no fewer than 24,539 deaths in children under five years, these forming over one-third of the total deaths of the City.

These facts give one some idea of the scope of the work for infants and young children, and indicate what has been accomplished thus far. It is certainly most gratifying and most encouraging, and inspires us with new hope for the future.

While the purpose of the Hospital is, primarily, philanthropic in the care of the sick who are brought to our doors, it has another function which, I believe, to be much broader, viz.: as an educational institution. Through a careful study of the few, problems in feeding, hygiene, etc., are worked out, by which a thousand times as many as are received into our wards may be benefited.

In the Babies' Hospital this work is carried out through the physicians connected with the Hospital, who number, including the resident staff, and those at work in the Out-Patient Department, 35. Last year 35 nursery-maid graduates were sent out to spread the influence of the Hospital training. In addition, it might be mentioned that during the past eighteen years no less than six books upon subjects connected with infants and young children have been written by those connected with the Hospital, and many articles upon these subjects have appeared in medical and popular current literature. In all these ways has the experience gained in the Babies' Hospital been made available for the city and the

country. More important than any one of these is, perhaps, the training of medical students, who now, for the first time in the history of medical education in New York, have ample opportunities to study sick infants. Last year 155 fourth-year medical students were instructed in the Hospital.

THE WORK OF THE PAST YEAR

Turning now to the particular work of the past year, there are many interesting phases to which attention might be called.

The amount of the work in the wards exceeds that of any previous year, as will be shown from the statistical report which follows. The number of patients admitted was 1,031, an increase over the previous year of 31. The number of Hospital days was 20,221, as compared with 17,371 for the year ending one year ago, an increase of 16 per cent. The general mortality of the patients treated was 30 per cent., a slightly higher rate than the preceding year. This difference is almost entirely due to the unusual number of cases of tuberculosis, especially tubercular meningitis, which were admitted.

We have now reached the limit of our capacity and the work cannot grow further unless greatly increased facilities are afforded. In fact, the amount of work done last year is somewhat more than the normal capacity of our wards; as there is a constant temptation, when the pressure to admit patients is great, to overcrowd the wards and to overwork the nurses. From the medical point of view, it is believed that with our present resources the greatest good would be accomplished not by endeavoring to increase the number of admissions, but by giving the best possible care and thus affording the best chances of recovery to those whom we do receive.

The opening of the adjoining house for our nurses has relieved to some degree the overcrowding of the main building. But this house is not large enough for present needs. And, with the work which is now being done, every department is taxed to its utmost. The need of additional room is keenly felt. This would easily be afforded by erecting upon the lot purchased two years ago, a building of the same height and in style similar to our present Hospital. Such an addition would furnish, besides, a separate ward greatly needed for premature infants, a roof-garden which would be an invaluable aid to our work in summer and more room for quarantine, the need of which is imperative.

TUBERCULOSIS

Eighty-three patients, or eight per cent. of all those admitted, were suffering from tuberculosis, and thirteen per cent. of the deaths were due to that disease.

Thirty-three children had tuberculosis of the lungs, all but three of these being under two years of age. It is of interest to note that in twelve of these, there was tuberculosis in the home, generally in one or other parent. During the year there were admitted thirty cases of tubercular meningitis, a disease, which in our experience, has been invariably fatal. This number exceeds anything in the history of the Hospital, and is more than twice as great as the previous year.

It is, perhaps, not fair to say that tuberculosis in infants is greatly upon the increase in our city, but it is certainly true that its great frequency has only recently been appreciated; this being largely due to the opportunities now afforded in the hospitals for the study of these cases. Formerly, tuberculosis in infancy was often unrecognized. Such facts as those mentioned emphasize the necessity of measures of prevention, the treatment of tuberculosis in these infants being extremely unsatisfactory.

Of other forms of acute meningitis there were thirty-one cases, making in all a total of sixty-one during the year. The number of cerebro-spinal meningitis cases is less than last year, the epidemic which has prevailed in New York for the past two and a half years having now practically subsided.

PREMATURE INFANTS

The care of these helpless ones becomes a constantly increasing concern in the service of the Hospital. The number admitted during the year was fifty, and eighteen of these were so small or so feeble that they died on the day of admission. Of the remaining thirty-two, twelve were saved. No children whose weight on admission was less than three pounds survived. Among those who were saved was an interesting group of triplets whose combined weight was twelve and three-quarter pounds, one of these was taken home by the mother at the end of the fourth week, and the others at nine and ten weeks respectively. They were visited by Dr. Coolidge several months after they left the Hospital and found to be thriving.

To save premature infants without the aid of wet nurses we have found to be well nigh impossible. We have been fortunate in having one, and sometimes two in the wards during the past year for these patients. One nurse in a period of five months nursed six different premature babies, five of whom were saved, besides partly nursing twelve other infants. Unfortunately our resources have not made it possible for us to keep the premature infants entirely upon the wet nurse as long as we would wish. Frequently on account of the imperative needs of the next comer, part bottle feeding must often be begun after the second or third week.

The problems connected with the care of premature infants are many. They need the closest kind of attention and special treatment in many particulars. To do justice by them a special ward constructed to meet their peculiar needs is required. Let us hope that we may soon have it.

OTHER DISEASES TREATED

The other diseases that have furnished the larger number of cases will be briefly mentioned, as they form an idea of how active the Hospital service has been, and how many acutely ill children are brought to us.

There were treated one hundred and forty cases of acute pneumonia with forty-six deaths. Considering the age and previous conditions of most of these patients, the results seem very satisfactory. There were eighteen cases of empyema with three deaths.

There were admitted two hundred and eighteen children suffering from acute diarrhoeal diseases, with seventy-four deaths.

The number of children admitted suffering from malnutrition, most frequently the result of neglect or bad feeding, was very large. In a large proportion of all patients who are admitted for acute disease also, the problem of feeding becomes a very serious one. In fact, this question of infant nutrition in health and disease far transcends in importance every other in a hospital for infants.

It has been our policy to purchase a good grade of certified milk—as a rule, this is given raw in winter and pasteurized at 155° F. in summer; and in our experience such milk, properly modified to meet the needs of the individual child, has given better results than anything else, except breast feeding, which has been possible in but a small proportion of the cases. Improvements are constantly being made in the adaptation of milk to the need of the infant with corresponding improvement in the results.

THE OUT-PATIENT DEPARTMENT

As noted in the report of last year, the afternoon out-patient clinic has outgrown the ability of a single group of physicians to take care of it. As the rooms do not afford an opportunity to increase the medical staff, it has been thought best to open the out-patient department in the morning as well as in the afternoon. On the advice of the Medical Board this change was begun in January last, so that now the rooms are in use from ten to twelve o'clock in the morning and from two to four o'clock in the afternoon, and a new staff of out-patient physicians has been appointed for the mornings. Already the advantage of this

has been apparent, in a reduction of the afternoon class to a practicable size, and furnishing opportunities for those who formerly could not attend in the afternoon.

The attendance in the out-patient department in the past three years has nearly doubled. Last year there were 2,130 new patients treated, and 8,358 visits made to the Hospital.

A great amount of valuable work is done in this department, very largely in the direction of infant feeding. A campaign of education is being conducted, by means of personal instruction, by the use of printed slips of directions and many demonstrations of the preparation of milk for infant feeding. Most satisfactory results are obtained, such as a few years ago would have been deemed impossible. It is a common belief that artificial feeding among the poor is seldom practised. Such is not the case. While a much larger proportion of mothers among the poor than among the well-to-do, nurse their infants, there is now a constantly increasing necessity, even in the former class, to resort to artificial feeding. In the aggregate the number of children living in tenements who are artificially fed is very great. These mothers get but little assistance from the physicians who practice among them; and without the guidance of the Hospital or the Dispensary, they depend upon the advice of friends and neighbors, and their usual resort is to condensed milk or proprietary foods. The results with both of these are, in their hands, equally unsatisfactory, and this sort of feeding is responsible for a large part of the illness among infants. To teach the mothers living in the tenements how to care for cow's milk and prepare it for their infants, is our constant aim, and constitutes our great problem.

WORK AT THE SUMMER BRANCH

The Summer Branch at Oceanic was opened June 4, and closed September 6. In all 163 children were sent to the country. There were five deaths. The largest number treated at any one time was forty-nine, and the average number, thirty-five. The work was in charge of Dr. Kimball, with Dr. Finch and afterwards Dr. Hempstead as resident physician.

The most marked improvement was seen in the pulmonary cases sent from the City Hospital. Nine children were transferred who had been operated upon for empyema, and a number who had suffered from pneumonia and who had been very slow in convalescing.

The empyema cases in which the discharge had continued in some instances for weeks without any tendency to improve, showed an almost immediate change

for the better when they reached the country. The wounds often closed in two or three weeks and children who had been stationary, or losing in weight, showed the effect of the change by their rapid gain in weight, in appetite and improvement in vigor.

The history of Francis D. is a typical one. The child was first admitted in March 1906 with empyema of the left lung, for which the chest was opened a few days later. The child was removed by the parents after ten days, the wound still discharging. Nothing more was heard from the case until June 12, when he was returned with a cough, high fever every afternoon, losing in weight, and the wound in his chest still discharging. His weight was only twenty-two pounds, although he was now nearly three and one-half years old. He was immediately transferred to Oceanic and his improvement was a little short of marvelous. During the following two months he gained five pounds in weight; the wound in the chest entirely closed, and he was discharged in August in excellent condition; cheeks red, active, very lively, and lungs free from any signs of disease.

Of the cases of pneumonia that were transferred, there were many that had been very slow in resolving, and for weeks in a condition practically stationary. The improvement seen in them was quite as marked as in the cases of empyema.

In rather striking contrast to the above were the cases of bronchitis. The dampness and humidity of the climate seriously interfered with improvement in these cases and they did so poorly that in the latter part of the season we stopped sending them to the country.

Also disappointing were the results with very young infants, i. e., those under four months old, suffering from acute diarrhoeal diseases. The fatigue of the trip seemed to more than counterbalance any change in their surroundings, and we have practically discontinued transferring these desperately sick young infants. So also, the feeding cases in very young infants were found to do very little, if any, better in the country than in the city.

On the whole the most striking gains were seen in the children over nine months old, especially those just recovering from some previous acute disease. In the wards of the city, convalescence is always slow and relapses exceedingly common, but once in the country these children nearly all showed immediate improvement, gaining in appetite and in color, and often as much as a pound a week in weight.

While, therefore, the work of the Country Branch is a most valuable adjunct to that of the City, it is important that great discrimination be made in the kind of cases transferred, in order to secure the greatest benefit.

A VISITING NURSE

It is gratifying to be able to state that the Hospital is to have for the coming year the entire time of a visiting trained nurse. For the past three years a considerable amount of work of visiting patients in their homes has been done by Dr. Coolidge, who resigned last July, on account of the pressure of other duties. Half of the expense of a visiting nurse has been provided by Mr. and Mrs. John Sherman Hoyt, and the balance by other friends.

The services of a visiting nurse will be invaluable in out-patient work, especially in infant feeding. She can herself go once or twice into the homes and give practical demonstration to the mothers in the preparation of the food. Another important service which she can render is to follow to their homes, children with such contagious diseases as are not received into hospitals; such, for instance, as whooping-cough and its complications. No hospital in New York receives such patients. They often apply to us for admission, suffering from pneumonia or severe bronchitis, but cannot be received; nor can they be treated at the Dispensary. At present, they form a much neglected class. They must be cared for, if at all, in their homes.

Besides these two groups of cases, the services of a nurse can be utilized to great advantage in following up to their homes many children discharged from the Hospital, and thereby continuing the good results which have been obtained while inmates of the Institution.

The resident staff of the Hospital is now efficiently organized with a resident physician, who serves for a period of years, and two assistants, each of whom serves for one year; the term of service for the latter begins March 1st and September 1st.

In closing this report, I desire to express the appreciation of the attending physicians and surgeons of the splendid work of Dr. Hemenway, the resident physician, and the efficient co-operation of her assistants during the past year, and of the invaluable aid to the service in the wards given by Dr. Wollstein in the Pathological Laboratory.

L. EMMETT HOLT.

REPORT OF THE CRIBSIDE COMMITTEE.

TO THE BOARD OF DIRECTORS:

The Cribside Committee of The Babies' Hospital held its regular monthly meetings during the season of 1905-6 at the Hospital, 135 East 55th Street. The day of meeting was changed from the second to the first Wednesday of every month at 12 o'clock, in order that a report might be read at the Managers' Meeting.

The following officers were elected:

MRS. BRYCE GRAY,	. . .	Temporary Chairman.
MISS FRANCES HOWLAND,	. . .	Vice-Chairman.
MISS MARGARET D. GARDINER,	. . .	Treasurer.
MISS SOPHIE E. LANGDON,	. . .	Secretary.

Mrs. Bryce Gray kindly consented to act as Chairman until her successor could be chosen.

At the regular meetings, members were appointed to visit the Hospital during the month and mend the clothes used in the wards.

The Committee furnished a cake table, afternoon tea and ice cream at the Bazaar, which was held at the Waldorf-Astoria by The Babies' Hospital, on December 13; and on March 20th, the Committee held a sale of hats and fancy articles, the proceeds of which amounted to \$344.80.

The usual sewing class was held on Thursday mornings during Lent, and a number of garments—604—were made.

There were some resignations sent in during the winter, but a number of new members were enrolled, and in every way the season of 1905-6 was a most successful one for The Cribside Committee.

At the May meeting, the Treasurer reported a balance in the bank of \$2,179.55.

Respectfully submitted,

SOPHIE E. LANGDON,

Secretary.

REPORT

OF

TRAINING SCHOOL FOR NURSERY MAIDS.

The present year completes the sixteenth of our Training School for Nursery Maids, and we begin our seventeenth with all the nurses in good condition, ready and much in earnest to do the work before them.

During the past year the ward work has greatly increased, owing to the large number of very acute cases admitted, and we now have two graduate nurses from New York Hospital, one in charge of each of the main floors. This of course is a great relief to the Superintendent of Nurses, as she has so many demands on her time, and with such excellent help everything possible is done for the comfort of the patients.

There are now twenty-seven pupils in the school, and four of our own graduates in special departments; the diet kitchen, private rooms and on night duty.

Class talks have been given weekly throughout the year, except during the summer, when they were given bi-weekly. In these, besides giving the regular routine instructions, we have endeavored to impress upon the nurses the responsibility that rests on them in the homes to which they go from the Hospital, and their general conduct in the household. Besides this, the nurses have had practical training each day in the wards for the eight months of the course. Instruction in kindergarten was also given each week, from October 1st to June 1st, by a competent teacher, Miss Snell. This part of the course is very much appreciated by the nurses, for it adds real pleasure to them while in the Hospital, and increases their usefulness after they leave us.

We have had applications for our nurses not only from all parts of the United States, but from Canada and Europe as well, averaging ten a day. Answering these calls, and interviewing people consumes an immense amount of valuable time, but it is a necessary part of the work, and these personal attentions make many friends for the Training School and the Hospital.

The Superintendent of Nurses may be consulted, regarding nursery maids, Tuesday mornings from ten to eleven o'clock, or by written appointment.

SCHEDULE OF INSTRUCTION.

- I. Infant feeding.—The care of milk; modification, sterilization and pasteurization; care of bottles; preparation of food; with rules as to quantity and frequency.

- II. Bathing.—Daily bath; the use of hot, cold, bran and mustard baths.
- III. Hygiene of skin; care of mouth, eyes, ears, and nose.
- IV.—Nursery hygiene.—Ventilation, temperature, cleanliness, care of napkins, flannels, etc.
- V. Training of children in proper bodily habits.
- VI. Miscellaneous.—Use of clinical thermometer; mustard paste; giving of enemata; gavage feeding.
- VII. Simple means of treatment in nursery emergencies.
- VIII. The rudiments of kindergarten work.

"THREE OF A KIND."
*The Triplets Mentioned in
 Dr. Holl's Report.*

THE CHILDREN'S CHARITY.

This is a Society formed for the purpose of interesting children in the practical work of the Hospital. We desire to secure the co-operation of as many children as possible, and for this purpose we have formed the League known as the "Children's Charity."

First—We ask you to pay the annual dues of \$1.

Second—We want you to interest yourselves in the practical work of the Hospital. This can be done in many ways. The contents of your savings bank will help purchase many useful articles for the babies.

The proceeds from the dues and other receipts this year from the members of the "Children's Charity" have been turned over to the Treasurer, and disbursed for actual needs of the babies, to furnish them with clothing and other necessities. If you will join this League, you may feel that every penny that is contributed will go directly to help some less fortunate one than yourself.

Send all money intended for the "Children's Charity" to Mrs. E. K. Beddall, 335 West Seventy-seventh Street, New York City, who will gratefully acknowledge the same.

ONE OF OUR LAST YEAR'S MARASMUS CASES.

Weight at Nine Months, 12 Pounds;

Present Weight, 31 Pounds.

GENERAL RULES.

1.—The beds of the Hospital are free to the needy poor. Others are charged, according to their means, from \$2 to \$7 a week for board.

2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.

3.—Applications for admission should be made at the Hospital during the morning hours, from 9 to 12, although emergency cases are received at any time.

4.—The Out-Patient Department is open daily throughout the year, from 10 to 11 A. M., and from 2 to 3 P. M., excepting on Sundays and holidays.

5.—Visiting day, for friends of patients, is Thursday, from 9 A. M. to 3 P. M.

6.—Visitors to the Hospital are welcome any afternoon, between 3 and 5.

------------------------	---

HOSPITAL BUILDING, LEXINGTON AVENUE AND 55th STREET

The building on Lexington Avenue, to the north of the Hospital shown on the left side of the picture, has recently been purchased by us and we hope to enlarge our accommodations shortly by an addition to our new building.

STATEMENT OF FACTS

This Hospital has been established twenty years and is the only one in New York which cares solely for infants and young children. It is carefully and economically managed and besides the city work it has a Summer Branch at Oceanic, N. J. Altogether over 9,000 babies have been admitted. In the last year 979 children were treated in the wards, and 2,250 in the out-patient department.

The support of this Hospital is derived chiefly from its voluntary subscribers, to whom it appeals each year for a renewal of contributions.

In sending us a check for the current expenses, kindly make it to the order of The Babies' Hospital, and mail it to Mrs. John B. Calvert, Treasurer, 135 East Fifty-fifth Street.

THE HOSPITAL EMPLOYS NO COLLECTORS.

Mrs. KNIGHT D. CHENEY, JR., Chairman, 158 East 37th St.

REPORT OF THE DIRECTORS

The field covered by The Babies' Hospital during the past twelve months has been one of special interest to those closely connected with the work as it progressed, efforts having been made to show better results in all departments wherever opportunity for such seemed possible.

We have been able to continue the work of the Visiting Nurse, Miss Turner, through the generous gift of \$500 towards her salary, donated by Mr. and Mrs. John Sherman Hoyt, and additional substantial sums from other friends.

The broad character of this work seems to appeal to all who understand the fulness of its purpose and the beneficent results that have accrued therefrom. These visits to the homes of the needy and incompetent mothers are not only human in their purpose but educational as well, making the results reach further than this generation can estimate. Their tendency is to dispel ignorance combined with prejudice, a foe met with so frequently among the poor.

An effort to keep expenses down so that they should not exceed our current income has been successful and in doing this we have endeavored to reduce the cost per capita, but owing to the high cost of living and other necessities, each patient has cost us slightly more this year than last. It will be of interest to note, nevertheless, as seen by our Current Treasurer's Report, that we have been able to manage everything well within our income, and it is this condition that we have been successful in maintaining, which makes us feel that we are worthy of public support.

If our friends will aid us in an effort to raise a sum sufficient to enlarge our hospital by building upon the north portion of our property known as 661 Lexington Avenue, purchased last year, we would then have enough space to accommodate our nurses, some additional wards and room for placing supplemental machinery necessary for the proper operation of our plant, which is at present congested and therefore not operated to the best advantage.

It should be borne in mind that the care and nursing of babies entails far greater service than that given to adults, so that a comparison with the cost of each patient in other hospitals is not a fair criterion by which to judge our work.

We record with pleasure and grateful appreciation the gift from Mrs. Elizabeth Chamberlin Lockwood, \$1,000, completing the bed in perpetuity, \$5,000, in memory of Emily Beaver Chamberlin; and from the Cribside Committee, toward

endowing a second bed in perpetuity, \$2,500; also ten newly supported beds, at \$250 annually, as detailed elsewhere in this Report.

It is this form of support which constitutes the most valuable means for maintaining the work of the Hospital—because nearly every bed established is created in memory of some child or for a sufficient reason to keep alive the interest of the donor.

Much encouragement has been given to us during the past summer by the residents of Sea Bright and vicinity, by constant visits and gifts of money to our Summer branch at Oceanic, which was quite full of convalescent babies from June 5th to September 6th. The Directors are grateful to all the members of the Committee for their sympathetic co-operation so freely extended and to the officers in charge of the work who have labored day and night in trying to do everything possible to give comfort to the 158 little patients treated. The report of Mrs. Knox, Chairman of the Committee, will give details of the work accomplished.

Our Ways and Means Committee report that they have put forth their efforts this year to secure additional subscribers, with the result that 257 new names have been added to our list. A special form of gift that the Committee would like to commend to persons anxious to do something definite and who may not feel able to support a bed at \$250 is that of a "Furnished Crib" at \$25. This money given each year is sufficient to provide the necessary material for a crib for twelve months' use, and on that account the donor is entitled to name such crib, but with such privilege we do not extend any right to send a baby to occupy the crib and be maintained at the expense of the Hospital.

The Medical Report presented by Dr. Holt is full of interesting facts pertaining to the inside working of the Hospital and constitutes a sort of diary of the many patients treated, and we hope that our friends will read it carefully, because in that way they will obtain the general knowledge of what the Hospital has been doing during the past year.

The Directors in closing desire to thank all the Committees for their help in maintaining the work of the Hospital and in furnishing advice and co-operation which has proved so valuable.

To the physicians, officers and all others who have aided in accomplishing the results secured—the grateful appreciation of the Directors is extended.

B. OGDEN CHISOLM,
Secretary.

WILLIAM F. HAVEMEYER,
President.

REPORT OF THE BOARD OF WOMEN MANAGERS

The branch of The Babies' Hospital at Oceanic, New Jersey, was kept open in the season of 1907 from June 5th to September 6th, during which time all available space was occupied.

While there were many cases of serious illness the greater proportion of patients were convalescents who had been treated in New York, but who needed the fresh air and quiet of the country to complete the cure.

Experience having shown that in many instances the fatigue of even the short journey from New York to Oceanic more than counter-balanced the benefit to be derived from such change, great care was exercised in selecting the cases to be sent to the country.

The results have been highly satisfactory and have demonstrated, this year as never before, the importance of this valuable adjunct.

Few deaths occurred and most of the children were sent home perfectly well or materially improved in health.

The domestic affairs of the household under the efficient supervision of Miss Smillie were administered with system and economy. During the season, 17,190 meals were served to adults and children at a cost of \$1,368.12—an average of less than eight cents per meal.

It is estimated that the monthly expenses of the Hospital at Oceanic, may be kept within the limits of one thousand dollars and it is sincerely hoped that the good work may never be hindered through lack of funds.

From year to year the Summer residents of this section have evinced a lively interest in its welfare and have contributed substantially to its support, and though the receipts this year have been smaller than usual, there is no reason for discouragement. The decrease may properly be attributed to the prevailing financial depression.

In conclusion the management extends its thanks to the officers and employees connected with the Hospital for faithful service and conscientious attention to duty.

CAROLINE E. G. KNOX,
President of the Board of Women Managers.

MEDICAL REPORT

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

The nineteenth year's work in The Babies' Hospital has been marked by no very striking occurrences. The internal workings of the Hospital have been satisfactory. The house staff has been better organized than before and its work is now most efficient. The work of the visiting nurse has been of great assistance both in following up to their homes patients discharged from the Hospital, and in conjunction with the service of the out-patient department. In general the results of treatment have been better than in former years, particularly with infant feeding. The cases of difficult nutrition make up so large a part of our work that the difference in the condition of these patients who leave the Hospital is very striking. The improvements in this department are due to increasing knowledge and experience in this very difficult problem. Each year adds something to our knowledge and the effect of the practical application of this knowledge is shown in the greatly increased number of young infants who thrive upon the bottle.

We always have a number of young infants with harelip and cleft palate under our care, and these have been altogether the most difficult subjects with which we have to deal in respect to feeding. To make a harelip baby thrive in a hospital may be fairly regarded as the supreme test of infant feeding. At present there are in the wards two of these children who are plump, rosy and in excellent health and who have gained steadily in spite of the fact that they have been artificially fed from the beginning, and have already been subjected to three or four different operations upon the mouth.

HOW WET-NURSES ARE USED

As in former years we have always had one wet nurse and sometimes two in the Hospital who have made it possible for us to save a considerable number of the premature infants who are brought to us, even those as small as three pounds in weight, and also many very delicate young infants.

The same nurse is made to do duty for a number of children. During the past year one has nursed seventeen different children, of whom fifteen were saved. Most of these were at the breast from one to two months. The method of procedure is to allow the child breast milk until it begins to gain in weight, and then

introduce one or two feedings from the bottle, gradually increasing the number until the child is placed upon the bottle entirely, while the wet nurse turns her attention to one whose needs are greater.

THE WORK OF THE YEAR

The number of admissions during the year just closed is somewhat below that of the previous twelve months; 924 against 1,031. This is chiefly owing to a house infection of last spring during which we were compelled to suspend admissions for several weeks. The average number of hospital days per patient was 20.3 as against 19 in the previous year, so that the total work for the year amounted to 19,941 days as against 20,221 days for the previous year.

The general mortality for the year was 29.6 per cent. as compared with 30.2 per cent. for the year 1906. This difference was largely due, I believe, as stated above, to the better results obtained with infant feeding. During the year 67 children, an unusually large number, were admitted practically in a dying condition, as they did not survive twenty-four hours after they were brought. Excluding these the general mortality was 23 per cent. The death rate is, as one would expect, the highest in the very young infants; this group includes the premature children, those with congenital debility and malformations and the very delicate infants. Of the 368 admitted under six months old the rate was 44.2 per cent.; while of 556 admitted who were over six months old the mortality was but 20 per cent., which compares not unfavorably with the results in hospitals receiving older children.

The number of new patients in the out-door department was 2,250 and the number of visits made 9,488. This is a very considerable increase over the figures of any previous year.

The number of cases of tuberculosis admitted while large is not quite so great as during the previous year. The frequency of tuberculosis in infancy has been only lately appreciated. This recognition is due to more accurate means of diagnosis which are now available. This subject has been made one of special investigation for the past two years. It has been found that if either parent is suffering from the disease or has recently died from it, the child is almost invariably infected, whether symptoms are present or not. Thus in many instances the presence of tuberculosis has been demonstrated in children who have no cough, no signs of disease in the chest, and who are brought for admission simply as feeding cases. The existence of tuberculosis has been determined sometimes by the finding of tubercle bacilli in the sputum, sometimes by the use of the tubercu-

lin test as applied in animals, and more recently by the dropping of a minute quantity of a solution of tuberculin into the eye. After this a characteristic reaction occurs in tubercular children which passes off in a few hours, but is not seen in other patients.

CASES REFUSED ADMISSION

Every year a considerable number of children apply to the Hospital who are not received. It has always been our aim to have as little red tape as possible in the reception of patients. During the past year a book has been kept in which is entered every child refused admission and the reasons therefor. Of 358 who were brought to the doors and not received the most important groups were the following:

One hundred and fifty-seven were refused because there was not a vacant bed in the Hospital at the time. Nearly all of these applications occurred during the months of July, August, September and October. During this period the applications are much greater than at any other time in the year.

Sixty children were not admitted for the reason that they were suffering from contagious disease when they applied; they could not be received as we have no accommodations for such cases.

Fifty-two were refused because we had contagion in the house at the time of application.

Thirty-one who applied were not suitable cases for our institution, but were referred to the hospitals to which they belonged, such as The Eye and Ear or Orthopedic Hospitals, etc. These children were not simply given the names of the institutions, but arrangements were made by telephone for their reception before leaving our doors.

In thirty-one cases the applications were for well children who simply needed a home.

It has been the aim of the medical officers of the Hospital to receive every child who can be benefited by hospital treatment if we have an empty bed, and no matter how alarming the symptoms or how hopeless the case, these are never considered reasons for not receiving the child.

REQUIREMENTS OF THE WORK DURING THE SUMMER

It has been thought that with the Country Branch at Oceanic open for the less acute cases, the keeping open of four of the six wards of the City Hospital would be sufficient for the warm months. However, such does not seem to be the

case. During the summer, 158 children, about the usual number, were sent to Oceanic and yet during the months of July, August and September, 102 children were refused admission simply for lack of room. It is interesting to note that the applications for admission for the four months of June, July, August and September exceed by five the applications during the other eight months of the year. If the requisite funds can be secured another year, the entire City Hospital should be open during the summer months.

A COLD WARD

One of the most interesting features of the work of the past year has been our experience with a cold ward. In the middle of January it was decided to make Ward B, containing ten beds, a cold ward for the rest of the winter. The windows were kept wide open day and night. A registering thermometer was hung in the ward, the effort being made to keep the temperature as near 50° F. as possible; the usual range was from 45° to 55° F. In this ward were treated a number of carefully selected cases of the following groups: acute lobar pneumonia, empyema, tuberculosis, acute meningitis, malnutrition and difficult feeding, severe anaemia, chronic intestinal diseases. In all 50 patients were treated from January 15th to April 30th when the outside temperature became so high that it could no longer be classed as a cold ward.

The results on the whole were most satisfactory. Of the 50 cases, 31 were improved or cured; 16 unimproved, of which 7 died; and in 3 no noticeable change took place. It is to be remembered that these patients were among the most serious acute cases in the Hospital. A cold ward is not so easily adapted to convalescent cases as to those very ill in bed. The improvement was seen not only in the results of treatment but in the change in symptoms which the children exhibited, notably, a disappearance of nervous symptoms, and improved appetite and general nutrition. In some of the individual cases this was very striking.

Very careful attention was given to the covering of the children. Through the kindness of the Clothing Committee long flannel wrappers were secured which were worn over the ordinary clothes of the children. Outside of these wrappers blankets were rolled snugly about the patients, and woolen caps used to cover the head and ears. Mittens were kept on the hands of the older children. When necessary, hot water bags were placed at the feet. In not a single case was a subnormal temperature observed and no child took cold during the period of its stay in the cold ward. They were removed only for dressing, bathing and the changing of napkins; the food was given in the ward.

It was thought at first that the nurses might strongly object to this lower temperature, but such was not the experience. Almost without exception they enjoyed the cold ward quite as much as the children. They were of course warmly dressed for this service. These nurses had fewer colds and sore throats than those elsewhere in the house. The experiment on the whole was considered most satisfactory and will be continued during this coming winter. The main point of success seemed to be a careful selection of cases.

SOME INSTANCES OF NEGLECT AND ABUSE OF YOUNG CHILDREN

A few examples of what are almost weekly occurrences in the Hospital may be of interest as showing some phases of life which an institution of this kind touches, as well as some of the needs it helps to meet.

A cold day in March a premature baby less than one hour old was brought for admission wrapped only in brown paper. It weighed but a little more than two pounds. In spite of the fact that it was nearly dead when first seen, it revived and lived seven weeks, ultimately dying of congenital feebleness.

In January, J. S. was admitted suffering from very extensive pneumonia. Although the infant had been ill for several days, the parents who were ignorant Italians had called no physician; and the one first summoned sent the child immediately to the Hospital. It lived but half an hour after admission.

That same month of January a colored man brought his wasted, half starved infant, since the mother's milk had failed, in consequence of her having little or no food. The father was a bright, intelligent man educated as a stenographer, but could get no employment on account of his color, and the result was that his family were literally starving. We took the baby and placed the man in communication with The Charity Organization Society, through which some kind of work was secured for him.

In March a barber brought his motherless baby of four months. His work kept him from home during the day and the child in consequence was shamefully neglected. To still its cries paregoric had been recommended by friends. When it came to us the child had been taking four teaspoonfuls of paregoric a day for several weeks. The father said he had paid more for paregoric than for milk for the baby. The child was in wretched condition, but under hospital care and feeding it gained $2\frac{1}{2}$ pounds and was taken home quite well.

A pair of twins, children of a tuberculous mother, were admitted in January. Neither of the children appeared as yet to have contracted the disease. One was very feeble and lived but two weeks. The other gained $2\frac{1}{2}$ pounds in weight and

was in splendid condition, but as no other place could be found for it, it had to go back to the mother, where we learned it also died a few weeks later.

In August, Mrs. H., a rather intelligent young woman, brought a wretched looking baby to the Hospital with the story, that, desiring to adopt a baby, she had answered an advertisement in one of the papers, relating to a healthy baby boy for adoption. No child was found at the address given, but after considerable questioning she was given another address where the child could be seen. This proved to be the home of a mid-wife who had babies for sale. The baby in question had been sold for \$10 to another woman, but it was returned after a few days "because he was sickly," it was reported. For \$7 the mid-wife finally agreed to give this baby to Mrs. H. For two days, she reported, the baby slept all the time and had no movement from the bowels. It was then brought to the Hospital with all the symptoms of opium poisoning and died the night after admission. On investigation the mid-wife denied that she sold the baby, but said the money paid was for the baby's clothes (!).

Not all the cases of neglect and suffering are so harrowing. In April a baby was brought whose mother had just died of typhoid fever. The child was so wasted and in such stupor that a diagnosis of tubercular meningitis had been made. With special nursing and careful feeding, little by little improvement took place; the nervous symptoms disappeared, and then a gain in weight began. The child was discharged at the end of three months having gained $8\frac{1}{2}$ pounds in weight, with good color, excellent digestion, and apparently in perfect health.

A wet-nurse's baby was admitted from another hospital in March, with a history of chronic indigestion and steady loss in weight. The child's vitality was very feeble and the digestive organs so deranged that for two months the child's life was despaired of. When four months old he weighed but 5 pounds. Tuberculosis was suspected and the tuberculin test applied, but the child did not react. Another change in the food was then made and soon improvement began, which continued until the child during the next eight weeks had gained nearly 4 pounds in weight and was discharged in excellent physical condition, digesting well.

In closing this report I desire to express my appreciation of the excellent work of Dr. Hemenway, the house physician, who has been untiring in her devotion to the needs of the service. Our thanks are also due to the consulting physicians and surgeons who have promptly and cheerfully responded whenever called upon.

L. EMMETT HOLT.

REPORT OF THE CRIBSIDE COMMITTEE

During the winter of 1906-1907, the Cribside Committee held its regular monthly meetings at the Hospital, at noon, on the first Wednesday of each month.

The following officers were elected:

MISS HESTER HONE,	Chairman.
MISS FRANCES HOWLAND,	Vice-Chairman.
MISS MARGARET D. GARDINER,	Treasurer.
MRS. SAMUEL R. OUTERBRIDGE,	Secretary.

Outside of the ordinary routine—reading of reports, election of officers and new members, etc.—one special piece of work was accomplished. Twenty-five hundred (\$2,500) dollars was turned over to the treasurer of the Hospital to be used towards the endowment of a second bed in perpetuity.

At the beginning of the year five hundred dollars was still needed to make up this amount. It was therefore arranged to have Prof. Underwood deliver his illustrated lecture on "The Life of a Little Bear." The entertainment was given in January, in Carnegie Lyceum, and was generally considered a great success. The required amount was raised.

The Sewing Class was again held during Lent and more than the usual quantity of work was accomplished—nearly 1,000 garments being made.

The Cribside Committee now consists of 32 active, and 25 associate members.

It has done good work in the past, and there is every reason to hope that its usefulness will continue.

ANNIE WILLETTS OUTERBRIDGE,
Secretary.

REPORT OF SUPERINTENDENT OF NURSES

Training School For Nursery Maids

Our Training School has now completed its seventeenth year. Judging from the many applications we receive from girls wishing to enter, and the demands made upon us for nurses, we are encouraged to continue the good work. We have from six to ten calls a day and they are from all parts of the country, as well as from New York and vicinity.

We have made several changes during the past year: the course which for some years has been eight months, has been made six months in the Hospital, and two months in a private family under the supervision of the Hospital. In this way we are able to admit a large number of girls for training, and can see how a nurse will do her work in a home before she is given her certificate.

We have at present twenty-seven pupils in the school. One of our graduates has charge of the Diet Kitchen. Each pupil nurse spends three weeks in this department and is instructed how to prepare the different kinds of food and assists in its actual preparation.

Class talks were given each week throughout the year, on the care of children sick and well, simple nursery remedies in case of emergency, etc. These talks were greatly enjoyed by the nurses and seemed to be of use to them as an aid in their work.

Our Kindergartner, Miss Shell, continues her classes Monday evenings and the interest shown is as great as ever and cannot fail to be a source of benefit to the nurses when they have charge of older children.

SCHEDULE OF INSTRUCTION

- I. Infant feeding.—The care of milk; modification, sterilization and pasteurization; care of bottles; preparation of food; with rules as to quantity and frequency.
- II. Bathing.—Daily bath; the use of hot, cold, bran and mustard baths.
- III. Hygiene of skin; care of mouth, eyes, ears, and nose.
- IV. Nursery hygiene.—Ventilation, temperature, cleanliness, care of napkins, flannels, etc.
- V. Training of children in proper bodily habits.
- VI. Miscellaneous.—Use of clinical thermometer; mustard paste; giving of enemata; gavage feeding.
- VII. Simple means of treatment in nursery emergencies.
- VIII. The rudiments of kindergarten work.

POST-GRADUATE COURSE FOR TRAINED NURSES

There has been inaugurated during the past year, a Post-Graduate course for Trained Nurses and we have at present four taking the eight months course. They act as Head Nurses in the wards, assisting the physicians, and in turn are instructed by them. Lectures are also given them by our Attending Physicians. The number of applications received indicates that such a course is appreciated. These have come from some of the best Hospitals in the country.

Wies, Mrs. G. A.,
3 afghans; 4 bands; 2 pr. slippers.

Williams, Miss.,
6 dresses.

Wiggins, Miss Mabel R.,
Toys; games; books; dolls.

*Deceased.

THE CHILDREN'S CHARITY

The Children's Charity is a group of children banded together in the common cause of doing whatever is possible to forward the work of the Hospital.

The dues are *one dollar* a year, the proceeds from this source being used for the actual needs of the babies in the Hospital.

It is surprising how scanty and worn is the clothing that covers some of the poor little ones who are sent to us for care. In a number of cases it has been almost impossible to use the same garments again because after they are thoroughly washed there is little left but rags. Of course all the babies under treatment must be properly and decently clothed and the outlay for this purpose is considerable.

We ask you children interested in the Hospital, to join the Children's Charity by sending one dollar with name and address, to Mrs. E. K. Beddall, 335 West Seventy-seventh Street, New York, and occasionally when savings are accumulated in your bank, to send a portion of them for the same purpose—that is, to buy clothing for the babies of the poor. We are sure if you do this you will feel happy that some child less fortunate than yourself is being benefited through your thoughtful kindness.

TEN FACTS OF INTEREST

1. The Babies' Hospital has been established over 20 years.
2. It has, up to October 1st, 1908, admitted and treated **10,342** babies in its wards.
3. It is the only Hospital of its kind in New York caring exclusively for babies.
4. It is carefully and economically managed and takes pride in not permitting the expenses of its work to exceed its current income.
5. It has a Summer Branch for convalescent patients at Oceanic, New Jersey.
6. It has directly, through its own efforts, saved the lives of **over 7,000** babies.
7. It operates a Dispensary where very poor patients may be treated free for any ordinary malady.
8. It furnishes clinical lectures concerning the treatment of babies, to the students of the College of Physicians & Surgeons.
9. Its School for Infants' Nurses fills a useful purpose and has graduated 398 pupils.
10. It offers an eight months' Post-Graduate course to Graduate Nurses from schools of good standing.

Acrostic

DEDICATED BY A FRIEND TO
THE BABIES' HOSPITAL

AN APPEAL FOR SICK BABIES

Both rich and poor need love and care,
A baby first of all ;
Begin your charities with us
In gifts both large and small,
Each dollar you can give our way
Some sick child needs, and needs to-day.

Have you a baby of your own,
On whom you lavish care ?
Sometimes consider the neglect —
Poor babies have to bear ;
In many homes where funds are low,
These babies cry in vain ;
An awful thing—when one might give
Love, care, and health again.

If you are interested send your contributions to

REPORT OF THE DIRECTORS

TO THE BOARD OF DIRECTORS
OF THE BABIES' HOSPITAL.

Gentlemen :

Notwithstanding the financial depression, the year just closed finds us with a considerable balance and a surplus over and above our expenses. In anticipation of difficulty in raising funds this year our Committee has used every means possible to prevent a deficit and much credit is due the members for their constant watchfulness on behalf of the Treasury. It is satisfactory to note that a number of new subscribers have contributed to our funds.

Unremitting care has also been exercised in the purchase of supplies and efforts towards economical management have not been relaxed with the result as stated. Never in our history has the old adage "Constant vigilance is the price of safety" been put to better use.

The character of our work has improved in a corresponding degree and in all departments it is not difficult to discern most satisfactory progress.

Last year 979 Hospital patients and 26 Private patients were treated. This year 1177 Hospital patients and 21 Private patients.

The Out Patient Department which is so often the target of abuse from unworthy applicants, has safe-guarded its administration by careful scrutiny of those who applied. The increase of 430 patients comes, we are assured, from the worthy poor whose interests we seek to conserve and for whom we are ever ready to extend a helping hand.

Our Visiting Nurse, so much in demand among the mothers in their homes, has had a busy season, 940 visits having been made and much good resulting.

Even the most critical person could not help but be impressed with the appreciation shown by the parents of some of our patients returned to their homes in an improved and often cured condition. We aim to lessen the dependence of the mother by teaching her how to properly care for her child and in doing this seek to prevent a repetition of visits to the Hospital for care, which otherwise might be extended to others.

Persons unacquainted with the conditions are not apt to believe how large a part ignorance and prejudice play in the serious illnesses of the tenement baby.

The influence we exert, both by personal visitation in the home and by clean and healthful surroundings in the hospital, is bearing fruit slowly but surely and those mothers who have learned and profited do not need a second lesson.

Regarding the general treatment of patients in the wards, the average daily number has been 62.

The report of Dr. L. Emmett Holt contains many interesting facts and is respectfully referred to your Board for fuller details relating to the Medical treatment of patients.

Our aim is, both this year and all years, to demonstrate our usefulness in cases of destitution—to serve a class of people who have no other means of obtaining help—and in doing this to exert a proper influence so that they may become the better and wiser for our contact with them.

The personnel of our Staff has seen few changes during the year.

A careful and painstaking Board has had charge of the Summer Branch at Oceanic, New Jersey, under the personal guidance of Mrs. Ira Barrows. To her and to the capable Committee selected—all in perfect harmony—a very large share of the success attending our institution is due.

We like to refer to the valuable service rendered by the Cribside Committee, whose constant and untiring efforts demand that something definite and useful shall be accomplished by them each year. At present these young ladies are completing the second endowed bed of \$5,000 in perpetuity so that sick children may take advantage of it.

Among the patients treated in the wards the chief cause of fatality comes from acute gastric troubles induced no doubt by pernicious feeding, the result of ignorance. Every step, therefore, to enlighten the mother and dispel this ignorance is in the right direction and who can tell whether one step or two steps means a life saved?

The illnesses that come under our care and observation, brought about by poor nourishment and strained conditions in the home, are apt to be severe and acute. To alleviate these conditions, help the physical ailments and prevent their recurrence, is the purpose of our existence. Whether we do it successfully and conscientiously the public must judge, and in judging we shall be satisfied if they mete out to us their measure of reward and encouragement by extending suitable aid to enable us to continue our work.

We lay no distinct claim to any one way of accomplishing results beyond that which emanates from a humane desire to aid the poor who seek our help. We ask all our friends to co-operate with us to this end, believing that the uplifting of the home hinges on the happiness and good health of the little ones.

To all those who have aided and made possible the carrying out of so much good during the past year we desire to extend grateful appreciation.

B. OGDEN CHISOLM,
Secretary.

JOHN SHERMAN HOYT,
President.

REPORT OF THE BOARD OF WOMEN MANAGERS

The Oceanic Branch of 'The Babies' Hospital was opened as usual for the reception of babies on June 1st.

During the three months from June 1st to September 1st, 193 babies were treated. Of this number all were cured or benefited excepting six who died shortly after their reception; two of these were diphtheria cases. In addition to these both mumps and measles developed (one case of each), but so thoroughly were these children isolated that the work of the Hospital was in no way hampered, thanks to Miss Göthson and her workers.

Because of these contagious diseases it was deemed expedient to hold the monthly meetings elsewhere.

The Summer Committee worked faithfully in the interest of the Hospital and special thanks are due them for the good results of the Summer work.

A Garden Party and Sale was held at the residence of the Summer Chairman, with the result of which together with the Summer contributions, amounted to a sum more than sufficient to defray the entire expenses of the season.

Thanks are also due to those who kindly at various times, sent contributions of clothing, vegetables, fruit and flowers.

CECELIA FITLER BARROWS,
Chairman, Summer Committee.

SUMMER BRANCH

At Oceanic, New Jersey.

Open from June 2nd to September 1st, 1908.

Gift of Dr. and Mrs. A. Blair Thaw, in memory of their two children.

MEDICAL REPORT

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

The Babies' Hospital has completed its twentieth year of work. This has not only been larger but in many respects better than that done in any previous year. The work steadily broadens with study and experience and new fields of usefulness are constantly being presented. All departments of the Hospital have worked harmoniously, and better team work than in any previous year has been the result. Especially has this been true in the co-ordination of the in-and out-patient service.

HOSPITAL EXTENSION WORK

Once a hospital was supposed to have done its whole duty when it gave the best possible care and treatment to patients admitted to its wards. Few of them were followed after they were discharged and no other obligation to the public was recognized. But around the hospital care of patients many other activities of great value and usefulness have grown up. The value of the teaching of nurses and of medical students has so often been commented upon that it needs only to be mentioned. Research in matters relat-

ing to the diagnosis and treatment of disease is fostered in this as in many hospitals and this year nearly the whole time of two workers, Dr. Wollstein and Dr. T. W. Clarke of the Rockefeller Institute, has been taken up with investigation of special problems relating to disease in infants.

Aside from these things which refer more especially to matters medical more is being done than ever before for the children as individuals both in their homes and elsewhere. On discharge mothers are given directions, usually in writing, regarding the preparation of food and method of feeding their infants

at home. If the family has a physician the case is referred back to him. If not, the visiting nurse goes to the house after two or three days have elapsed to see how the directions given are being carried out. This visit is accompanied by actual demonstration of the proper way to care for a child and prepare its food. The mother is then directed to bring the child to the Out-Patient Department for observation. If she does not report there at the end of a month a second visit is made by the nurse. In this way many things are accomplished. The good work done in the Hospital is continued at home. The mother generally responds to the interest manifested and is really helped in her difficult problem. Often the visits of the nurse to the home reveal other needs than those connected with the children to which she is able to minister. In a number of instances through her good offices work has been found for

mothers and other members of the family. Where the children have no homes or can receive no proper care at home a number have been placed in convalescent homes. A list of delicate children who have been seriously ill in the winter and spring is kept at the Hospital and many of these are sent to Oceanic for two weeks in the summer. Children living at a distance and even out of town are encouraged to come back and report whenever possible and many most gratifying

things regarding the ultimate benefit of the treatment received in the hospital come to light. In all these ways the effort is made to make those who come within its influence feel that the Hospital is a great agency in the community devoted to the physical welfare of children, and that its purpose is not only to relieve present needs but to train those who are in the future to care for and to treat children to do this in the best way.

The latest development of the Hospital extension work has been the organization of classes for the instruction of mothers. Last spring such classes were begun by the house officers and the informal talks and demonstrations were, judging by the interest displayed, greatly appreciated. They are being repeated this fall.

The following histories illustrate some of the points referred to in the foregoing paragraphs.

SOME LATE RESULTS IN FEEDING CASES

Case I. E. W., six months old, was admitted to the Hospital June 24, 1907, as a feeding case, suffering also from swollen glands. The child's general condition was very poor; weight $10\frac{1}{2}$

pounds, and digestion very much deranged. He remained in the Hospital for three weeks during which time the digestive symptoms disappeared under treatment, and he was sent home much improved, taking his food well, and having gained a few ounces though still much below the average weight. The mother lived out of town and nothing more was heard from the child until July of the

present year, nearly twelve months later, when she brought him back to the Hospital to exhibit him—a stout, robust child in the very best of health. After leaving the Hospital she had followed closely the directions given regarding his feeding. He had gained regularly in weight during the year and had kept quite well.

Case II. E. K., three weeks old, was admitted December 14, 1906. The child was very feeble and was brought because he was in a heavy stupor most of the time and could not be made to cry at all. His apathy was so great that he would not take a bottle, and all food had to be given by the stomach tube for over six weeks. The lungs were very imperfectly expanded; often the child was so blue and his breathing was so feeble that artificial respiration had to be resorted to. On account of the feeble expansion of the lungs the chest was greatly sunken in. The weight on admission was 6 pounds, 10 ounces, and it fell after a week or more to 6 pounds, 1 ounce. Under the influence of the general treatment and the feeding employed, the child improved considerably although for the first month he scarcely made an audible sound, and after that cried only very feebly. When he was sufficiently improved to take the bottle he was sent home, his digestion at that time being excellent. He was kept under observation at home and from time to time the mother has brought him to the Hospital. By September of the same year his weight was nearly 15 pounds, though he was still breathing with some embarrassment. The following May he was brought back running about in excellent condition. His

respiration was quite normal excepting a little embarrassment after crying. His color was excellent. The chest deformity had entirely disappeared.

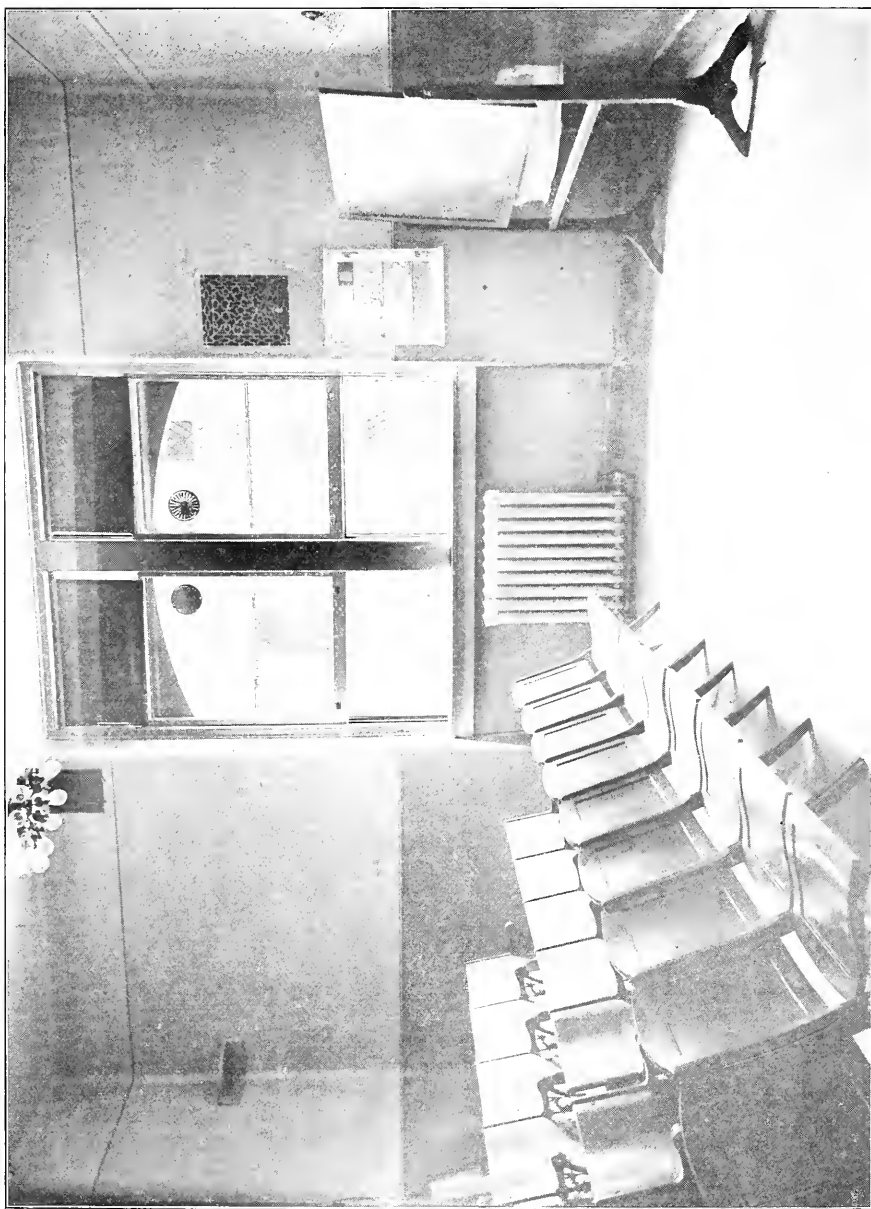

CASE III. D. W., three months old, was admitted January 30, 1907, and discharged after a stay of two and a half months. At the time of entrance his condition was extremely bad. His weight was $7\frac{1}{2}$ pounds and much of this was due to general dropsy which was present. At the time of his discharge his weight was only $7\frac{3}{4}$ pounds, but he was digesting his food well and was much improved in all other respects. This child was kept under observation. His gain in weight continued after he left the Hospital and he improved steadily in other respects. Fourteen months later he was brought back for observation in splendid condition, weighing 24 pounds.

BENEFICIAL EFFECTS OF TRANSFUSION

E. S., two years and two months old, was admitted September 3, of the present year. He was a pale delicate child, never having been very strong. A few weeks before admission the parents had noticed an abdominal tumor which had increased steadily in size. The child was losing rapidly in weight and had become so weak that he could hardly lift his head. He looked as though he could not possibly live more than a few days. The father consented to transfusion and on September 11th his artery was connected with the child's vein, the connection being maintained for forty minutes. The haemoglobin of the child's blood rose from 50 per cent to 85 per cent during this time. On the following day the child was so much improved that it was thought safe to remove the tumor by operation. It proved to be as large as a cocoanut. The child bore the operation well; the wound healed without complication and the case went on to uninterrupted recovery. The boy was discharged on October 18th having gained during the last few weeks $3\frac{1}{2}$ pounds in weight and looking like another child. His improvement continued after returning home, and he was brought back to the Hospital to report on November 7th, having gained nearly five pounds more. He was walking everywhere and looking extremely well.

WORK OF THE YEAR

There were admitted to the wards 1118 patients. These with 59 remaining and 21 private patients make a total of 1198 different children receiving treatment. This exceeds the number of the previous year by 192. The work

LECTURE ROOM.

done in the year is better represented by the number of hospital days which was 22,680, an increase of 14 per cent over the previous year. The general mortality, 34 per cent, is slightly larger than the previous year owing chiefly to two causes, the number of premature infants and the larger number of severe intestinal cases admitted during the summer which was an unusually hot one. During the month of August alone, 63 deaths occurred. There were 30 deaths among premature infants, the average weight of these children on admission being 2 pounds, 9 ounces; 16 of them lived less than twenty-four hours after admission.

The average stay of each child in the Hospital was 19.3 days.

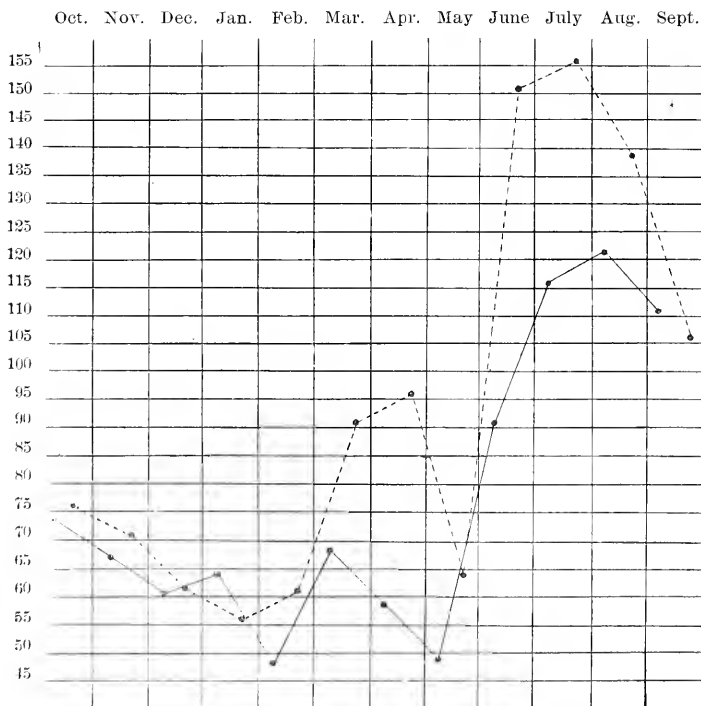

CHART SHOWING THE NUMBER OF ADMISSIONS BY MONTHS

----- For year 1907 - 1908.
 " " 1906 - 1907.

The accompanying chart shows the admissions by months for the past two years. The greater number in the summer months is of course in part due to the fact that both branches of the Hospital are in operation at this time. But quite apart from the children sent to Oceanic, the applications for the City alone during the summer far exceed those of any other time. The demands upon a babies' hospital are naturally greatest during the period of greatest infant mortality, and this is always the summer months. During the past summer one ward of ten beds was reserved for the reception of patients to be sent to the country. The rest of the wards were in full operation, and even then we could not begin to accommodate all who applied or who were in need of hospital treatment. In the four summer months more than 200 patients were turned away for no other reason than lack of room. These considerations show conclusively that hereafter the city hospital must be run to its full capacity during the summer. Repairs and alterations when required should be attended to when the service is least active.

At the time the Nineteenth Report was issued the newer tuberculin tests were being used for the first time in the Hospital. The method employed is to insert a drop of a solution of tuberculin into the eye or to introduce a minute amount into the skin of the arm by means of a tiny scratch. A slight inflammation follows in the course of twenty-four hours in children who are suffering from tuberculosis but not in others. In all, these tests have been used over 1,000 times without any untoward symptom or accident and they have proved of the greatest possible advantage in the recognition of early tuberculosis.

WORK OF THE OUT-PATIENT DEPARTMENT

By referring to the report of the Out-Patient Department on another page it will be seen that this part of the work has grown 20 per cent during the past year. This growth has not been merely one in size but in efficiency. The visiting nurse has made in seven months 460 visits to dispensary patients. The Out-Patient Department is now crowded beyond what is sanitary. In one single afternoon during the summer, 63 patients attended. The capacity of the waiting-room being about 35, the numbers are such that an overflow onto the sidewalk and into the street is common. There is a need of a larger reception room and urgent need of two additional examining rooms, and a room for the isolation of any contagious case that might come. The dispensary physicians are most enthusiastic in their work, but better facilities and

more room are required if they are to continue so. The stoppage of transfers on the crosstown lines has apparently diverted to the upper east side clinics, on the lines of the surface cars, many patients from the lower East side who formerly went to the College and hospital clinics on West 59th Street. This is likely to continue. The writer has had an opportunity recently of studying the operation of out-patient departments of several hospitals for children abroad and was impressed with the amount of work which is possible in these departments. There is no part of the work of the Hospital where so much is accomplished for so small an outlay. But we must increase our facilities.

The dispensary physicians desire to express their obligation to the Straus milk depots and to those of the New York Diet Kitchen upon which they have freely drawn for their patients, especially during the summer months.

WORK AT OCEANIC

The number of patients sent to Oceanic during the past summer was 193, as against 158 the previous year. During the absence of Dr. Kimball in Europe in June and July this service was in charge of Dr. Arthur W. Bingham. The Country Branch was opened on June 2nd and was operated most satisfactorily until September 1st when it had to be closed, somewhat earlier than usual, on account of an outbreak of diphtheria introduced from the outside, as the disease was prevailing at the time in the neighborhood.

Many applications for the summer are from former patients in the wards of the Hospital in the winter. The most acutely ill of those applying during the summer months are not transferred to the country, experience having shown that they can be better cared for in the city.

PRESENT NEEDS

From the medical point of view the Hospital has three pressing needs. The first is to provide increased facilities required for the Out-Patient Department. Our present equipment should be doubled.

The second is a ward specially constructed for the care of premature infants. These are now brought to the Hospital in such numbers that suitable provision for them must be made.

Third, a roof-garden with proper protection. This could be utilized in summer for our acute intestinal cases thus greatly enlarging our capacity at this time when extra beds are needed. During the cold months it could be

advantageously used for tuberculosis and other chronic pulmonary diseases.

The time has come when the lot adjoining the Hospital should be built upon and it is hoped that this may be accomplished during the next year.

The only change in the medical staff of the Hospital during the past year is the appointment of Dr. Frank Hartley who was elected to the position of Attending Surgeon in the place of Dr. Arthur L. Fisk, resigned.

In closing the Report I desire to express the appreciation not only of myself but of all the medical staff of the Hospital to Dr. Josephine Hemenway, house physician, and her assistants for their faithful and efficient work during the entire year.

L. EMMETT HOLT.

REPORT OF THE CRIBSIDE COMMITTEE

The Cribside Committee held its regular monthly meetings at the Hospital on the first Wednesday of each month, from November until May, during the year 1907-1908.

At the annual election the old officers were unanimously re-elected:

MRS. HENRY G. BARTOL,	-	-	Chairman.
MISS FRANCES L. HOWLAND,	-	-	Vice-Chairman.
MRS. SAMUEL R. OUTERBRIDGE,	-	-	Secretary.
MISS. MARGARET D. GARDINER,	-	-	Treasurer.

In February Mrs. Bartol was obliged to resign owing to absence from New York and the Vice-Chairman assumed her duties.

The regular work of the Lenten Sewing Class was again carried through under the direction of the following Committee:

MISS SAIDIE E. WILLIAMS, Chairman,	
Miss Maude H. Curtiss,	Miss Therese Smith,
Miss A. M. Dows,	Miss Katherine B. Lockwood

The meetings were held on Thursdays during Lent at houses loaned for the mornings by friends of the Hospital, and the hostesses very kindly provided bullion, sandwiches, etc. The meetings were pleasant and well attended, and between seven and eight hundred garments were turned over to the Hospital.

The Clothing Committee of the Hospital asked for help from the Cribside to do mending in the wards, and each month some of the members volunteered.

The Cribside pledged itself to add \$2,500 to the same amount which had already been given to endow a Second Hospital bed in perpetuity. This year they gave \$400., which with the amount already given, brings their donation up to \$2,900.

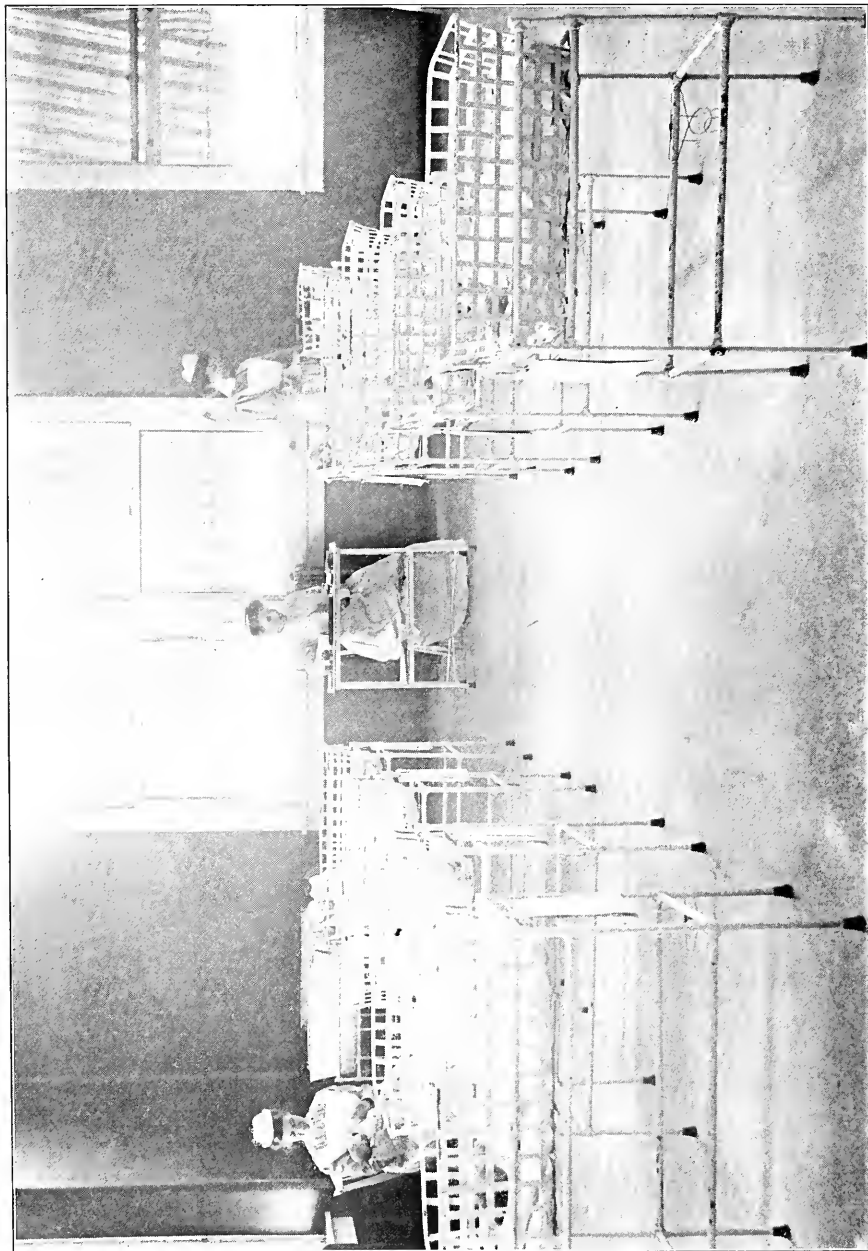

To raise money for this and other purposes a bag sale was held in April. Miss M. L. Fowler was chairman of the committee, and Mrs. Benjamin Brewster very kindly loaned her house for the afternoon of the sale.

The work of The Children's Charity, which has been carried on for so long by Mrs. E. K. Beddall, was turned over to the Cribside. The following Committee undertook to carry it on:

MISS ELEANOR ROBINSON, Chairman,	
Miss E. N. Tremain,	Miss M. L. Fowler,
Miss Maude H. Curtiss,	Miss Helen Le Roy Glover
Miss Helen Clucas,	Mrs. Samuel R. Outerbridge.

The plan was to appeal to each child on the list for the gift of one dollar and to send an acknowledgement in the form of a certificate of membership. It was hoped to enlarge the list by asking each Cribside member to send the printed form to her particular child friends. This was undertaken late in the spring and this year it is planned to perfect the details.

ANNIE WILLETT'S OUTERBRIDGE, *Secretary.*

A BUSY SUMMER MORNING.

LIST OF MEMBERS OF THE CRIBSIDE COMMITTEE

ACTIVE MEMBERS

Miss Ellen Louise Adee,	Mrs. Eugene Lentilhon,
Miss Zoe E. Banks,	Miss Katherine B. Lockwood
Mrs. Henry Belt,	Miss Mary St. J. Mairs,
Miss Anna Gray Carter,	Miss Mary Martin,
Mrs. André Chéronnet-Champollion,	Miss Mary Mortimer,
Miss Nina R. Chisolm,	Miss E. B. Oakley,
Miss Helen Clucas,	Mrs. Samuel R. Outerbridge,
Miss Emily Coddington,	Miss Josephine Paddock,
Miss Maude H. Curtiss,	Miss Eleanor Robinson,
Miss Louise P. Davenport,	Miss Dorothy Salisbury,
Miss Dorothy Dean,	Miss E. B. Sanford,
Miss A. M. Dows,	Miss M. Therese Smith
Miss Pauline Fiske,	Mrs. Robert Sterling,
Miss M. L. Fowler,	Miss Edith C. Thompson,
Miss Margaret D. Gardiner,	Miss E. N. Tremain,
Miss Helen Le Roy Glover,	Miss Ellen M. Turnbull,
Miss Frances L. Howland,	Miss Ethel Turnbull,
Miss E. V. C. Jay,	Miss Marion Willetts,
Miss A. J. Koop,	Miss Saidie E. Williams.

ASSOCIATE MEMBERS

Mrs. Ernest R. Adee,	Miss M. V. Hungerford,
Mrs. Henry M. Alexander, Jr.,	Mrs. Oliver G. Jennings,
Miss L. H. Bernard,	Miss M. M. Kemp,
Mrs. Henry G. Bartol,	Mrs. R. Hall McCormick, Jr.,
Miss E. L. Burke,	Mrs. Joseph Meyers,
Mrs. D. Fairfax Bush,	Mrs. H. B. Montgomery,
Mrs. J. Morris Butler,	Miss Caroline Morgan,
Mrs. Arthur Brooks,	Miss Harriet Norris,
Mrs. Knight D. Cheney, Jr.,	Mrs. Samuel Riker, Jr.,
Mrs. George L. Curtis,	Mrs. Kenneth D. Robinson,
Miss H. G. Ferguson,	Miss Lucy Talmadge,
Mrs. Harold Fitzgerald,	Mrs. Henry G. Trevor,
Mrs. H. G. Granniss,	Miss M. M. K. Wilson.

REPORT OF THE TRAINING SCHOOL FOR INFANTS' NURSES

TO THE BOARD OF DIRECTORS:

In October, 1907, the eight months' course of instruction was changed to six months in the Hospital and two months in a private family under the supervision of the Hospital. The service in a home is a probationary one; the agreement with the Hospital is, that if the work and the deportment of the nurse is satisfactory she is retained indefinitely, the employer paying the Hospital \$20. per month, for the two months. If the nurse does not prove satisfactory, she is given another trial. This change gives pupils the same training previously given, but has necessitated a more systematic arrangement of the work.

During the year, 61 pupils have entered on probation; 17 were rejected as not fitted for the work; 8 did not complete their training for various reasons; and 41 graduated.

The practical instruction and talks on responsibilities have been given by Miss Göthson, Assistant Superintendent, and considering the increase in the number of patients admitted to the wards this year, over any previous year, we feel that the work done by our nursing staff has been very satisfactory.

The Kindergarten instruction which is given weekly from October to May, is a valuable help to our nurses in their future work.

Our graduate infants' nurses continue to fill a very important place in a home, caring for young children. During the year we have received many more calls than we have been able to fill, and the reports of the work of our nurses, have been very gratifying.

MARY AGNES SMITH,
Superintendent.

WANTED

CONTRIBUTIONS

For the support of

THE BABIES' HOSPITAL OF THE CITY OF NEW YORK.

¶ Are you interested in the actual saving of a baby's life ?

¶ Are you interested in giving many children the opportunity for a sound and healthy body instead of a life of semi-invalidism ?

¶ Are you interested in the spread of the knowledge, how properly to care for and nourish the future citizen ?

¶ This is a photograph of a baby in this hospital, age 14 months, weight 11 pounds—one half that of a normal child of his age—due to faulty feeding and the ignorance of his mother. He is the type of many that we help.

If you are interested send your contribution to

MRS. J. B. CALVERT, Treasurer,
Lexington Ave. and 55th St., New York.

REPORT OF THE VISITING NURSE COMMITTEE

For the past two years The Babies' Hospital has employed a graduate trained nurse in connection with its out-patient department. Her duties are to meet every patient discharged from the hospital so as to see that the baby has proper care during its convalescence, to assist the doctors in the dispensary every afternoon, and to investigate and treat as many of the dispensary cases as possible. The mothers are taught during these calls of investigation how to prepare the baby's food and the importance of cleanliness and fresh air. While assisting in the clinic takes much of the nurse's time away from visiting it is on the other hand of considerable benefit to her when making her subsequent visits, as it identifies her in the mind of the parents with the treatment already given in the dispensary.

We hope in time to have a sufficient number of nurses to investigate every Dispensary case, but at present this is impossible as the patients come to us from various parts of Greater New York, Long Island and New Jersey, nevertheless much good work has been accomplished during the past nine months by our visiting nurse, Miss Mary C. Whitman, and many babies are better off to-day because of the practical instruction their mothers have received.

In connection with this work there is necessarily more or less Relief Work to be done, and while we refer such cases to the various charitable societies, still immediate assistance is sometimes necessary and for this purpose a small fund of money and clothing for both old and young could be used to good advantage.

RUTH LAMBERT CHENEY,
Chairman.

POST-GRADUATE COURSE FOR TRAINED NURSES

The Post-Graduate course of eight months for Trained Nurses, which was inaugurated April 1, 1907, has proved to be very satisfactory.

We have many opportunities to recommend our Post-Graduate Nurses for positions in charge of Children's or Babies' wards. The experience received here is a valuable aid to them in such work.

The following nurses have received diplomas :

MRS. MARY HARRINGTON,
Buffalo State Hospital,
Buffalo, New York.

MISS BERTHA MOERI,
German Hospital,
New York City, New York.

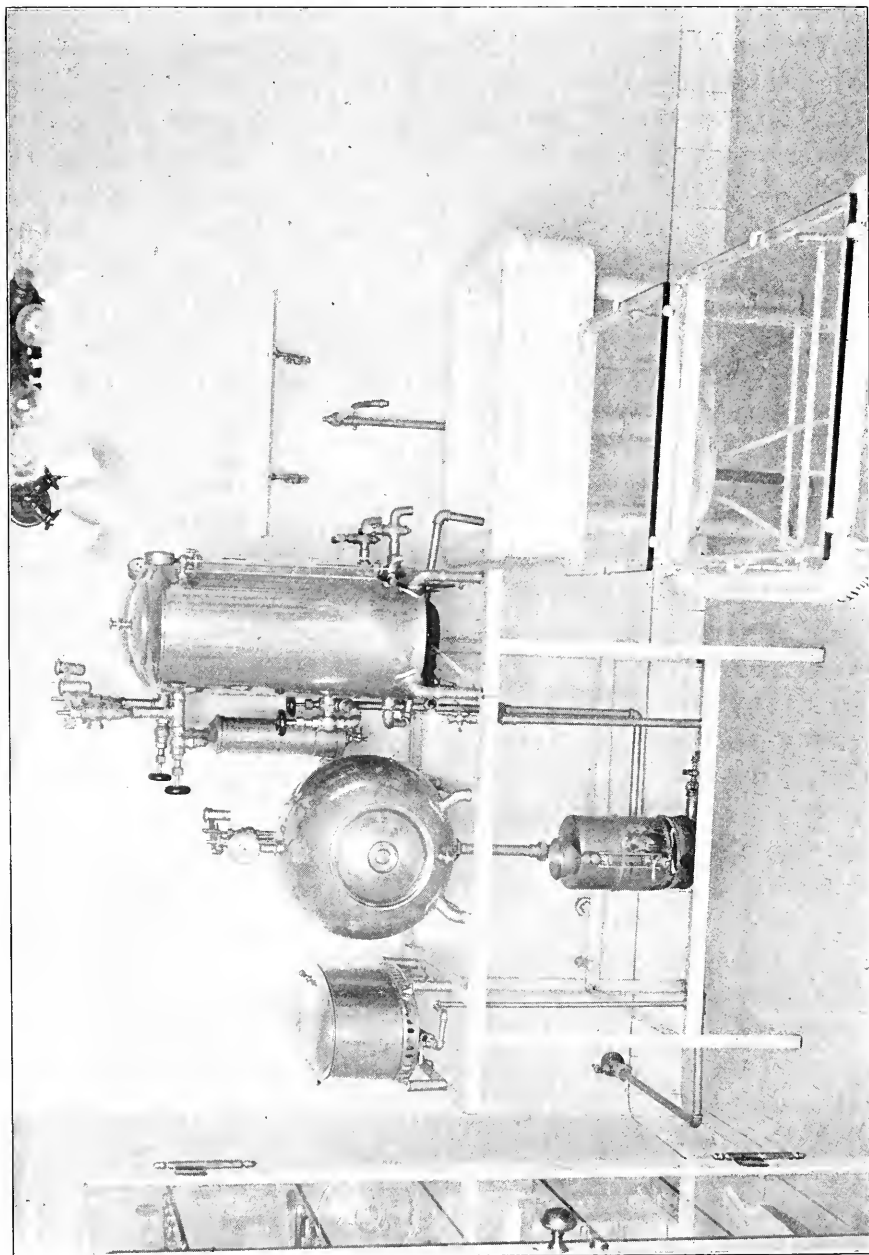

MISS JULIA SAUNDERS,
James Walker Memorial Hospital,
Wilmington, North Carolina.

MISS ELIZABETH NEYMAN,
Pennsylvania Hospital,
Philadelphia, Pa.

MISS HELEN B. MONTEITH,
Miami Valley Hospital,
Dayton, Ohio.

MISS ELLEN G. GIBSON,
Royal Hospital for Sick Children,
Edinburgh, Scotland.

MISS MABEL RICH,
Rhode Island Hospital
Providence, Rhode Island.

SOME MODERN APPLIANCES.

- Western Chemical Co., The,
1 bottle Karholix; 1 bottle Creoxil.
- Womens Christian Temperance Union, of
Stockbridge, Mass.
100 small bunches of flowers.

"THE CHILDREN'S CHARITY"

TO OUR LITTLE FRIENDS :

You know, don't you, what it means to be ill—to feel queer and hot, and have to go to bed, and then the doctor comes and puts a thermometer in your

mouth, and leaves medicine that has to be swallowed perhaps once every hour. In some ways it isn't much fun, but there are some nice things about it. You very often can have both mother and nurse all to yourself, and the getting better is very nice indeed. When so much is done to make you happy that you can say,

with the little boy that Stevenson wrote about :

"When I was sick and lay abed
I had two pillows at my head,
And all my toys beside me lay
To keep me happy all the day.

"And sometimes for an hour or so
I watched the leaden soldiers go,
With different uniforms and drills
Among the bed-clothes, through the hills.

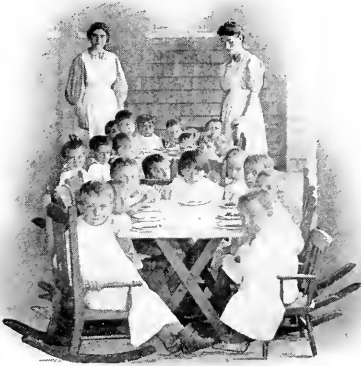

"And sometimes sent my ships in fleets
All up and down among the sheets;
Or brought my trees and houses out,
And planted cities all about.

"I was the giant, great and still
That sits upon the pillow-hill
And sees before him, dale and plain,
The pleasant land of counter pane."

But did you ever think of the thousands of little boys and girls in New York, who are not as lucky as you are, and whose father and mother too

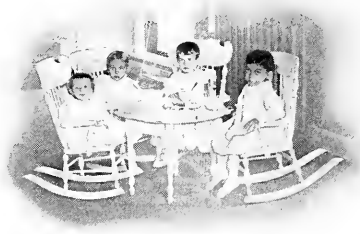

have to go out every day to work. Then when the children are sick, how are they to be taken care of and what is to be done for medicine and doctor's

bills? Some of these youngsters, I am afraid, don't know the pleasant land of "Counterpane."

But there are ways in which these poor people are helped, and one of the best things that can happen to the sick children is to be taken to "The Babies' Hospital." There, are nurses and doctors, who know all the best ways to make little people comfortable, and help them to get well and strong again.

It costs a great deal of money to run such a big hospital. (Last year there were in all 1,177 babies in the wards.) Will you join the children's charity, and so help the sick babies? To do so send your name and address, with one dollar, to Miss Robinson. A dollar that you have earned yourself, or saved up from your allowance may do more good than you will ever know to some poor sick baby.

Sincerely yours,

"THE CHILDREN'S CHARITY."

MISS ELEANOR ROBINSON, Treasurer,
Hotel Gotham,
New York City, N. Y.

TEN FACTS OF INTEREST

1. The Babies' Hospital has been established over 21 years.
2. It has, up to October 1st, 1909, admitted and treated 11,462 babies in its wards.
3. It is the only Hospital of its kind in New York caring exclusively for babies.
4. It is carefully and economically managed and takes pride in not permitting the expenses of its work to exceed its current income.
5. It has a Summer Branch for convalescent patients at Oceanic, New Jersey.
6. It has directly, through its own efforts, saved the lives of over 7,500 babies.
7. It operates a Dispensary where very poor patients may be treated free for any ordinary malady.
8. It furnishes clinical lectures concerning the treatment of babies, to the students of the College of Physicians & Surgeons.
9. Its School for Infants' Nurses fills a useful purpose and has graduated 441 pupils.
10. It offers an eight months' Post-Graduate course to Graduate Nurses from schools of good standing.

NO COLLECTORS EMPLOYED.

Acrostic

DEDICATED BY A FRIEND TO
THE BABIES' HOSPITAL
AN APPEAL FOR SICK BABIES

Both rich and poor need love and care,
A baby first of all;
Begin your charity with us
In gifts both large and small,
Each dollar you can give our way
Some sick child needs, and needs to-day.

Have you a baby of your own,
On whom you lavish care?
Sometimes consider the neglect—
Poor babies have to bear;
In many homes where funds are low,
These babies cry in vain;
An awful thing—when one might give
Love, care, and health again.

If you are interested send your contributions to
MRG. J. B. CALVERT, Treasurer, Lexington Ave. and 55th St., N. Y.

REPORT OF THE DIRECTORS

TO THE BOARD OF DIRECTORS
OF THE BABIES' HOSPITAL.

Gentlemen:—

We wish in this twenty-first yearly report to show that the year just passed has been the most satisfactory in the history of the Hospital in all departments. The work accomplished has been greater than ever before.

During the year we have treated 1,182 Hospital patients and 28 Private patients, as against 1,177 Hospital and 21 Private patients last year. In the Out-Patient Department we have treated 3,103 new patients, an increase of 423 over last year.

Our Visiting Nurse has done very efficient work in teaching the parents the first principles of hygiene, thereby very greatly preventing the repetition of visits to the Hospital. Her work also permits returning the convalescent baby home sooner than could be otherwise done, thereby increasing the efficiency of the Hospital.

The work at the Summer Branch at Oceanic, N. J., has been remarkably well done and unique in that there was not a single death in the course of the whole summer.

The Cribside Committee have continued their very valuable and efficient work and it is a real pleasure to be able to voice the spirit of co-operation which exists between all the different parts of the oversight work of the Hospital, as it is only by having this co-operation that it is possible to do the work demanded and carry out the trust and responsibility imposed on us.

Some years ago, realizing that we had reached the capacity of the present building, we purchased No. 661 Lexington Avenue, which adjoins the Hospital on the north, with the hope that in the future we would be in a position to enlarge our work and complete in equipment what was lacking in our present building. Last Spring we started on this new enterprise and, owing to the very generous support of our friends, we have raised the money necessary for this, the contracts have been let and the work is well under way, so that before

many months we will have the addition complete and will, with the added room in this new building, have among other improvements the three following, all of which have been greatly needed.

1st. Increased facilities in the Out-Patient Department, which for some time has been greatly overcrowded, and our new building will practically double this department.

2nd. A special ward for premature infants, as this class of babies is being brought to the Hospital in greater numbers each year.

3rd. A roof garden with proper protection.

All of these needs we have found are pressing and our work has been handicapped thereby, so we look forward to the completion of the addition with the satisfaction that we will be able to more efficiently do the work entrusted to us and which has been made possible by the generosity of our friends, to all of whom we desire to extend our thanks.

JOHN SHERMAN HOYT,

President.

B. OGDEN CHISOLM,

Secretary.

SUMMER BRANCH

At Oceanic, New Jersey.

Open from June 5th to September 4th, 1909.

COMMITTEE.

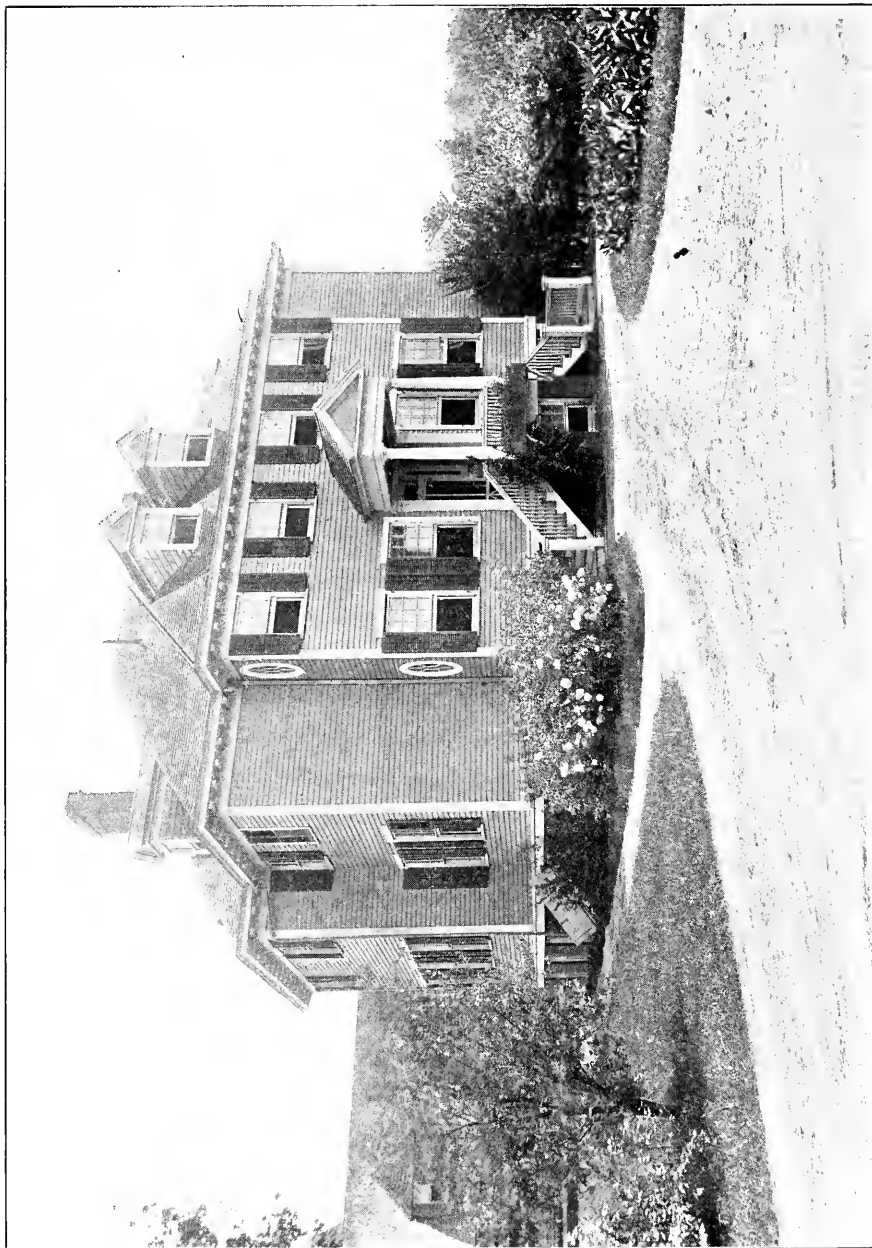

DURING SUMMER OF 1909.

Chairman,	-	-	-	-	-	-	MRS. IRA BARROWS,

MEDICAL REPORT

TO THE DIRECTORS AND THE BOARD OF MANAGERS OF THE BABIES' HOSPITAL.

The Babies' Hospital has attained its majority. The year just closed completes the twenty-first of its existence. During this period it has grown from a humble, almost insignificant beginning in a small twenty-foot dwelling house just opening its doors to sick infants, to an institution which last year cared for over 1,200 sick infants within its walls and treated over 3,000 more in its Out-Patient Department. The work of the last year shows a considerable increase in practically all departments over that of the previous year or of any other year as shown by the following table:

	1909	1908
Patients treated.	1,210	1,198
Days of Hospital treatment.	23,055	22,680
New Out-Patients.	3,103	2,680
Out-Patient visits.	12,475	11,488
Laboratory examinations.	5,273	2,959
Children sent to Oceanic.	209	183

These bare figures give but a small idea of the amount of work done.

THE LABORATORY.

I desire especially to call attention to the large amount of work done in this department. The total number of laboratory examinations, it is seen above, was nearly twice that made in the previous year. This means an average of 17 each day and these require a great deal of time and labor; but they are indispensable to the work of a modern hospital. This work is done by the pathologist, Dr. Wollstein, and the House Physician and her assistants. Scientifically the work is of a high order and is so recognized everywhere. These laboratory examinations aid greatly in diagnosis. They are also of much value in determining the effect of treatment. They furnish a guide to the necessity for quarantine and its duration. In fact, wherever it can be applied, the laboratory gives definiteness and certainty to what was once,

in many diseased conditions, indefinite and very uncertain. It clears up many doubtful questions. The burden of the work thus imposed is great and increasing and if present efficiency is maintained additional help in this department will shortly become a necessity.

As an illustration of the importance of the laboratory work the help it has given in the diagnosis of tuberculosis may be cited. A careful routine examination of the spinal fluid in cases of meningitis and of the sputum in cases admitted with symptoms of acute pneumonia has revealed a large number of cases of tuberculosis not previously suspected. This is especially true of the pulmonary cases. This is not generally appreciated. Thus the vital statistics for New York City show that only 1.8 per cent. of the deaths under one year are due to tuberculosis. Our Hospital figures show that 5.6 per cent. of the deaths under one year are due to tuberculosis. Since in most other respects the mortality figures for the Hospital correspond with those of the city generally, I think we are justified in saying that infantile tuberculosis is three times as frequent as is generally believed. Of the deaths under three years in the Hospital 10 per cent. are due to some form of tuberculosis. This apparent increase is simply the result of more accurate diagnosis. The importance of the recognition of these cases in order that proper isolation may be secured is very apparent.

THE OUT-PATIENT DEPARTMENT.

The statistics of this department are given on another page. They show an increase in total attendance of 9 per cent. over the previous year. The continued growth of the Out-Patient service emphasizes the necessity for the larger quarters planned for this work in the addition to the Hospital now under way. During the summer especially the capacity of the place was taxed to its utmost and the physicians were often required to double their hours of duty in order to see all who attended.

The importance of the work of the visiting nurse as an adjunct to the Out-Patient Department is more and more apparent every year. Through her efforts also patients were put in communication with various charitable organiza-

tions and much needed relief thereby obtained, and vacations and country outings were arranged for many delicate children. Never since the organization of the Hospital has the Out-Patient service been more efficient than now.

The total cost of the Out-Patient work is very small when compared with the expenses of the rest of the Hospital. Calculating roughly, the average cost of each ward patient is about thirty-three dollars, while the cost of treatment of each Out-Patient is barely thirty-three cents, even when we include in the dispensary charges the proper share of heat, light and service, and the

salary of the visiting nurse. Such a comparison is interesting and suggestive, but must not be taken too seriously. It would be perhaps unfair to say that one hundred times as much was accomplished for ward patients as for out-patients. Both of these forms of activity are needed and each occupies a separate field and fills different requirements; each supplements the other. The point I wish now to emphasize is the large service rendered in the Out-Patient Department and the very insignificant cost of the same.

SURGICAL WORK.

The Surgical Department of the Hospital has been much more important this last year than previously. Not only have a larger number of surgical cases been admitted, but now that this department is becoming better known, many difficult and unusual cases requiring surgical operations in infants are referred to the Hospital. Ward D on the fifth floor has been set apart for surgical patients and has been kept filled with operative cases the greater part of the time. This has become a very important department in the work of the Hospital. There were 177 surgical operations performed as compared with 129 during the previous year.

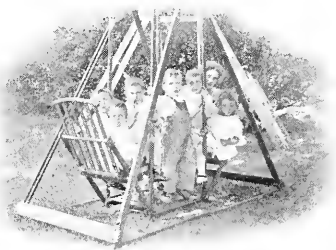

WORK AT OCEANIC.

The number of children sent to the country branch was 209, the largest for many years. For the first time in the history of the summer Hospital

no deaths occurred, although many children who were very seriously ill were transferred to this branch. As is well known, it has not been the policy to send the desperate summer cases there, experience having shown that they do not stand the fatigue of the trip. An experiment was made this summer of having a number of the most delicate infants sleep entirely in the open air. This was carried out with 32 children, 24 of whom slept out for two weeks or more. Only four failed to show improvement, these being children very ill with diarrhoeal disease. The greatest benefit was shown in cases of malnutrition and anæmia. Marked improvement was noted in 28 cases in the general condition, weight, appetite and digestion.

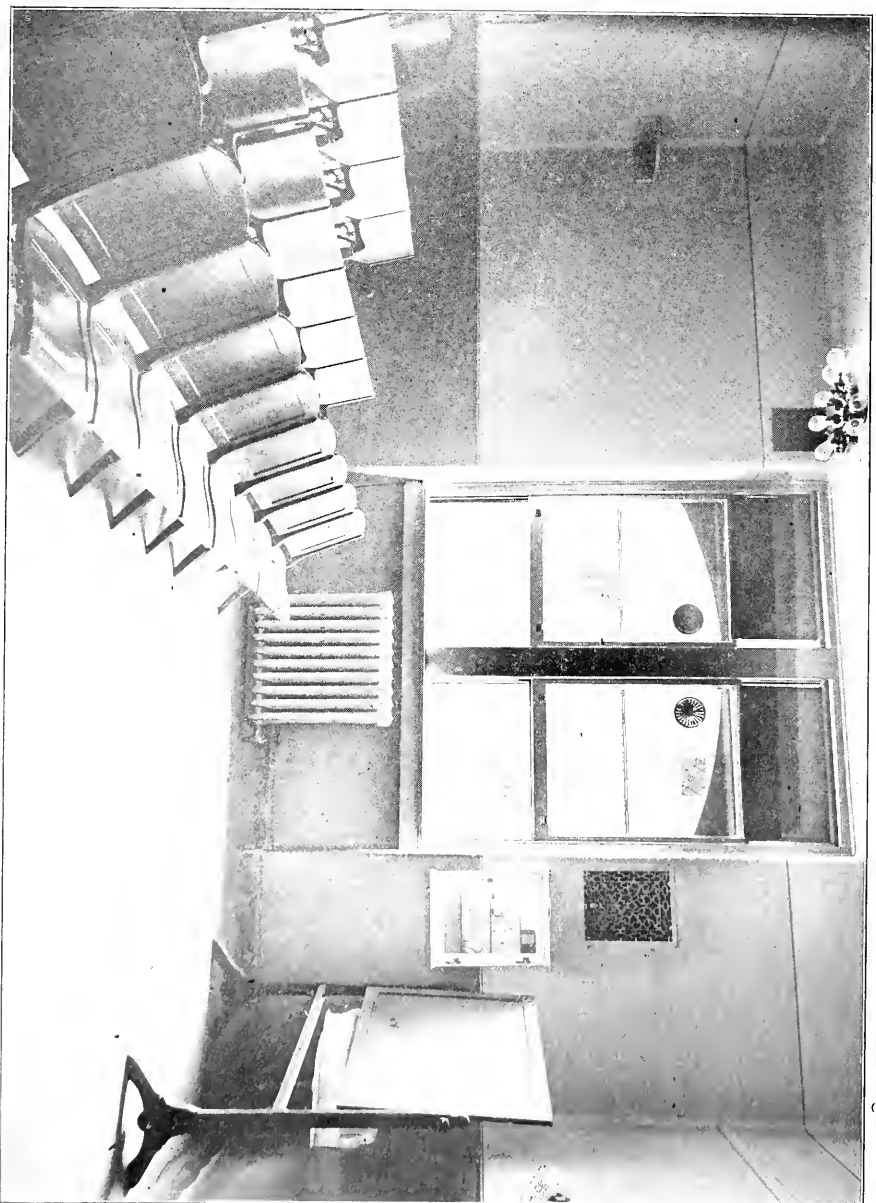

HOUSE INFECTIONS.

To prevent and cure these has always been and is still one of the most difficult problems in the Hospital management of infants and young children. Not only are such diseases as measles, scarlet fever and diphtheria to be feared, but constant local infections such as diseases of throat, skin, eyes, nose etc., and many others. Particular attention has been given through the past year to the infections of the respiratory tract. With this end in view, cultures have been made from the bronchial secretion of all children with

coughs, to ascertain the type of infection, to determine, if possible, the degree of contagion, and how these children can best be separated. This work has already yielded most valuable results and in the future is likely to prove of even greater assistance. At present the practice is followed of taking a culture from the throat and bronchial secretion of every child admitted. Those who

show influenza bacilli, pneumococci or other organisms which are especially infective are closely watched. So far as possible they are separated from other patients in the ward by screens or in alcoves or they are put in a ward by themselves. A special observation ward and the increased quarantine facilities which the addition to the Hospital will give will, we believe, make it possible to do much more to prevent the spreading of these infections. A single case sometimes will start an epidemic of catarrhal colds which in some delicate children are pretty certain to terminate in pneumonia. In addition to these

LECTURE ROOM

precautions, routine cultures are taken at regular intervals from the bronchial secretion of all the patients and nurses in the wards of the Hospital. In some cases it has been shown that nurses were apparently the source from which infection came. This separation of patients in the ward has been facilitated by the construction of a number of alcoves, each of which holds a single crib. These have been made by setting several marble slabs about 5x5 ft. in the floor and side wall of the ward. These are substantial and easier to keep clean than glass. Infants in the alcoves do not mingle with the other inmates of the ward in the dressing rooms or elsewhere, and are attended by a special nurse. While this is not complete isolation, it really seems to accomplish a good deal in separating patients.

SOME INTERESTING CASES.

Young infants often become desperately sick in a short time without serious organic lesions being present. I refer to cases of convulsions, and many varieties of acute intoxication, especially those arising from the intestinal tract. These cases require not only prompt treatment but during the critical period the almost continuous attention of a physician if they are to be saved. Many such come into the Hospital especially during the summer months. Of course many die because brought too late, but a considerable number are saved whose condition on admission seemed hopeless.

F. B., aged two months, had been moderately ill with gastro-intestinal symptoms for three days and desperately ill for one day before admission. There had been no medical advice until the child was brought to the Dispensary from which it was immediately admitted to the Hospital. Condition on admission: extreme prostration, no pulse at the wrist, subnormal temperature, surface of the body blue, extremities cold, vomiting almost continuous. The child was considered moribund and looked as if it would live but a few hours. Under the treatment by hot baths, hypodermic stimulation, saline injections in the bowel and saline injections under the skin, some slight reaction was seen. For five days the child's life hung by a thread and it hardly seemed possible that it could survive. But with constant care and treatment finally the tide turned and improvement, at first slow and then rapid, took place. No food could be retained until the sixth day. The child was then put on the Hospital wet-nurse; great improvement now took place and ten days after admission the child was discharged in excellent condition, good color, normal digestion, having gained 5 ounces in weight. This case has been followed at the house by

the visiting nurse for two weeks after discharge and the improvement was continued.

F. B., one year old, had been ill for three days with slight cough, and very great prostration, intense cyanosis with severe intestinal symptoms, but little fever. The child was thought by the mother to be dying when she brought it to the Hospital, and so, indeed, it appeared on examination. It was pulseless; the face, extremities and, in fact, the skin everywhere was of a deep blue, almost purple color; the breath sounds were so feeble that they were scarcely audible, and a hardness of the skin which betokens early dissolution was already apparent. Repeated hot baths and mustard packs were given, with irrigation of the bowels and other stimulation, and little by little the symptoms improved. At the end of three days the child was smiling, beginning to take food and the intestinal symptoms had quite disappeared. On the eleventh day it was discharged in excellent condition, having gained 14 ounces in weight. The child has been since visited by the nurse and at the last report had gained two pounds since the discharge from the Hospital, and to all appearances was entirely well.

T. P., aged eleven months, was admitted after four days' illness with severe gastrointestinal symptoms. He was brought to the Hospital in a stupor so profound that cerebral disease was at first suspected. The child was completely comatose with general relaxation, and it looked as if meningitis might be present. The temperature was 103° and continued high for two days. The stupor lasted for five days, then gradually passed away. All the food was given by the stomach tube; repeated saline injections by the bowel and hot baths and hypodermic stimulation. At the end of five days the patient did not look like the same child. At the end of a week all symptoms had cleared up and the child was convalescent. Discharged on seventeenth day in apparently perfect health. This case was followed for two months by the visiting nurse at the home and improvement continued during that time.

I believe that all these children would have died in a few hours but for the relief given at the Hospital.

Last July the attention of a gentleman was attracted several successive mornings by a poor woman whom he saw taking a child to one of the recreation piers. The conditions were evidently so distressing that finally he stopped her and learned that the child, though seriously ill, had had no physician. He called up Dr. Kerley upon the telephone who promptly referred her to the Hospital. The condition on admission seemed almost hopeless. The child was

emaciated to a degree; was unable to stand; its face was wrinkled and drawn and the little one looked as if she were eighty years old. On examination it was found that she had had a pneumonia which had not yet cleared up. Her weight was but 13 pounds, though she was 19 months old. Tuberculosis was suspected but excluded after a few days' observation. Under Hospital care and with the open air treatment the child slowly improved in weight and general condition until August, when she developed disease of the mastoid which necessitated an operation. It hardly seemed possible that she could survive this, yet she did and afterward improved steadily up to the time of her discharge, November 11th, when she was able to stand and almost walk alone, looked quite well and had gained five pounds in weight. The father had been out of work for months; the mother also could get no work and was in extreme destitution at the time of her discovery. The gentleman who had first become interested found some light work for her, which paid her well, and she is now prosperous and happy. To use her own words her experience "did not seem real, but just like a story out of a book."

A touching instance of transferred affection and childish devotion was witnessed at Oceanic last summer. Three children of one family, aged $4\frac{1}{2}$ years, $2\frac{1}{2}$ years and 15 months, respectively, were sent down for two weeks. But the baby developed a local infection and had to be returned to the city in a few days. About the same time another little girl of 18 months was sent down and for the first day or two she seemed very lonely and homesick. Whereupon the little boy and girl whose sister had been removed, on their own volition adopted her as their own. They gave her her food; they washed her face; they dried her tears; they took her out to play in her carriage, and in every way they watched over her as protector and nurse. They were constant and assiduous in their attentions and soon the little one was changed to a happy, contented child. This devotion continued for the entire three weeks they were together at the Hospital. It is another illustration of the development which comes to some of these young children from the responsibilities which conditions compel them to assume at home.

There have been no changes in the consulting or attending staff in the past year. The Resident Staff have devoted themselves to the work with an enthusiasm most commendable. They deserve the cordial thanks of the officers of the Hospital for their faithful service.

L. EMMETT HOLT.

REPORT OF CRIBSIDE COMMITTEE

The Cribside Committee held its regular monthly meetings at the Hospital on the first Wednesday of each month from November until May during the year 1908-1909 with an average attendance of fifteen members.

At the annual election the following officers were unanimously elected:

Mrs. S. R. OUTERBRIDGE,	-	-	-	Chairman.
Miss FRANCIS L. HOWLAND,	-	-	-	Vice-Chairman.
Miss PAULINE FISKE,	-	-	-	Secretary.
Miss ELSIE SANFORD,	-	-	-	Treasurer.

The regular work of the Lenten Sewing Class was again carried through under the direction of the following committee:

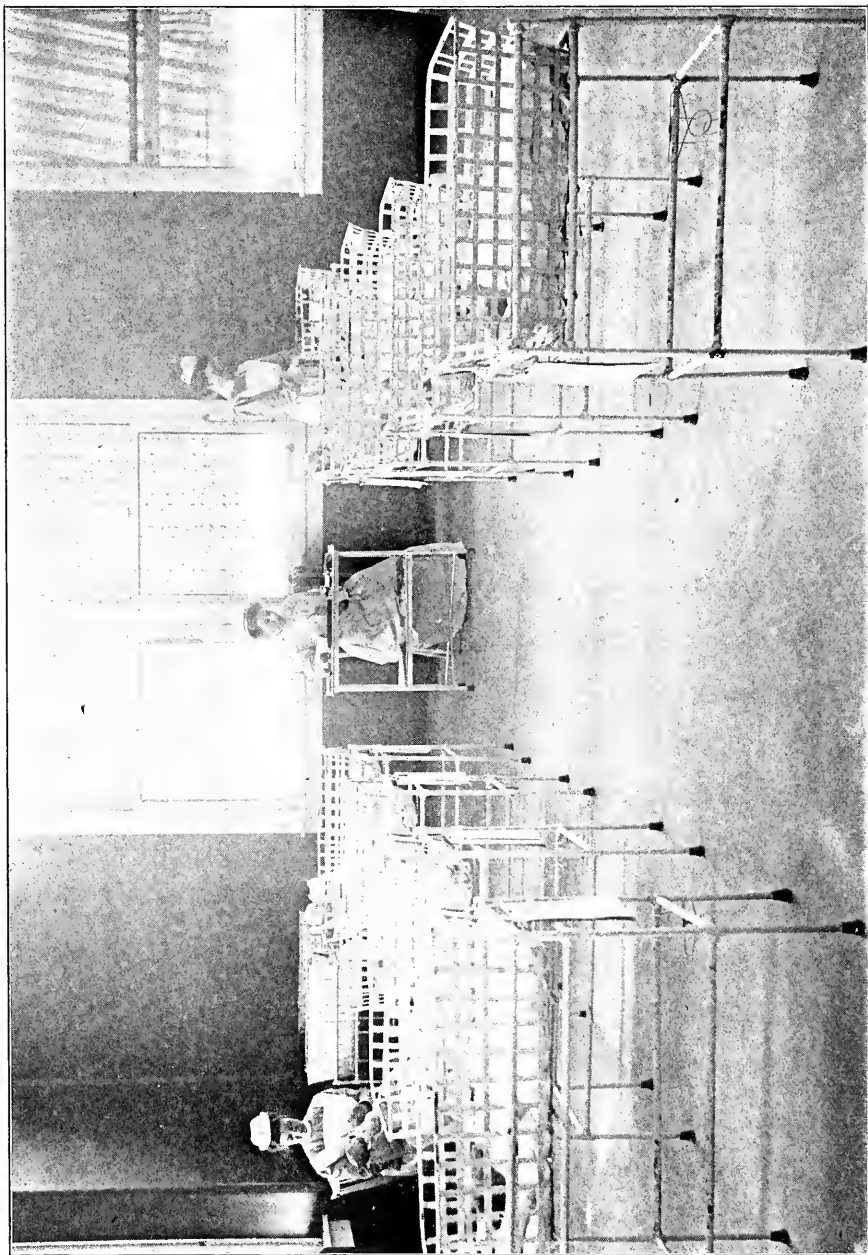

Miss MAUDE H. CURTISS, Chairman,				
Miss OAKLEY,				Miss TREMAIN,
Miss FISKE,				Miss SMITH,
Miss DEAN,				Miss LOCKWOOD.

The meetings were held on Thursday mornings during Lent at houses kindly loaned by friends of the Hospital. The hostesses were very thoughtful in providing bouillon, sandwiches etc. Between four and five hundred garments were turned over to the Hospital.

The Clothing Committee of the Hospital asked for help from the Cribside to do mending in the wards, and each month some of the members volunteered.

The proceeds of the Café Chantant held at the Hotel Gotham in February were pledged to aid in the erection of the new building adjoining the Hospital on Lexington Avenue.

PAULINE FISKE,
Secretary.

REPORT OF TRAINING SCHOOL FOR INFANTS' NURSES

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

There has been no important change in the course of instruction of our pupil nurses. The plan of the six months' training in the Hospital and two months in a private family continues to work satisfactorily; but during the increased work in June, July and August it has been found necessary to keep some nurses on duty in the Hospital for the full eight months.

During the year 64 pupils were entered for probation; 9 were rejected as not fitted for the work; 12 did not complete their training for various reasons, and 43 were graduated.

Miss Göthson, Assistant Superintendent, resigned from her position July 1st, 1909. Miss Ida Benzon, who had completed the Post-Graduate course, filled the vacancy until October 1st, when Miss Helen M. Duff, of York Hospital, York, Pa., was appointed.

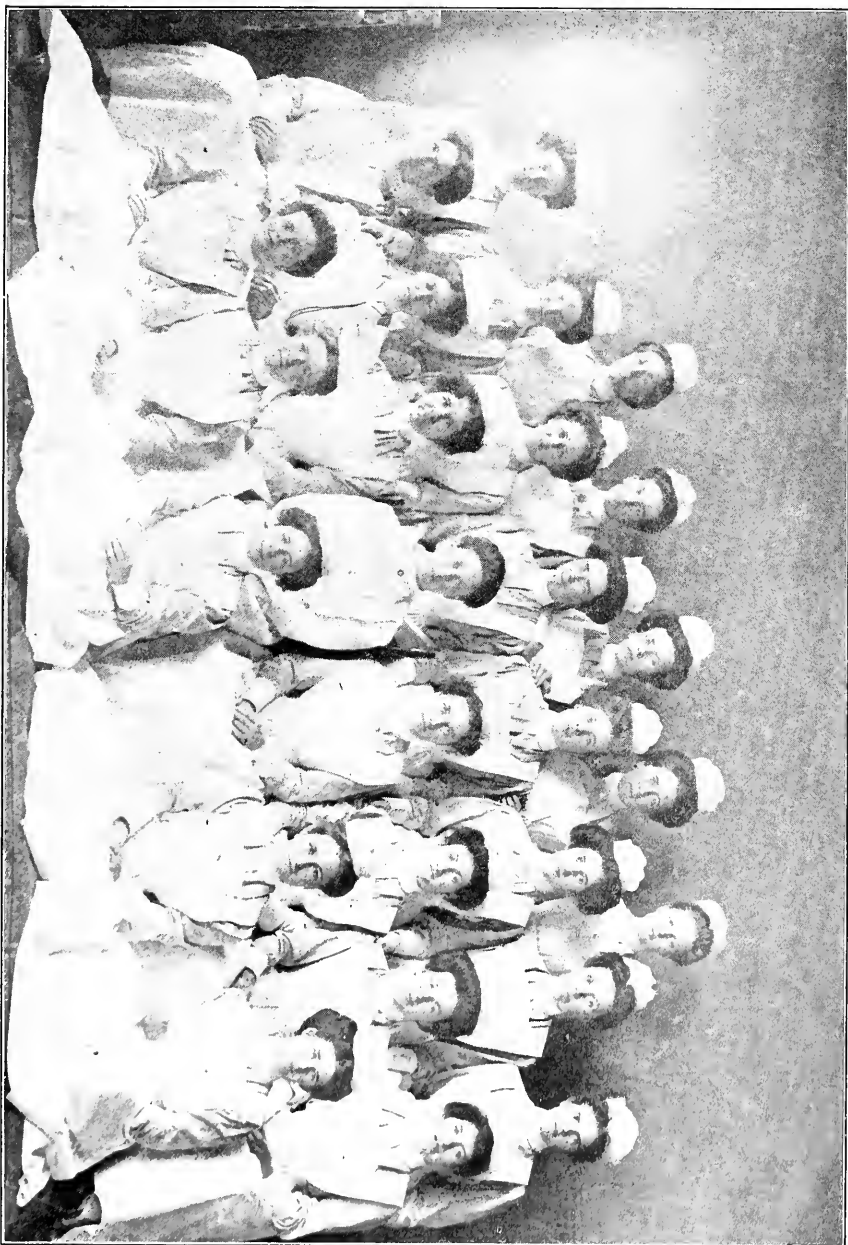

Miss Schell continues to give Kindergarten instruction each week from October until May to our pupils.

It is with regret we report the death of two of our pupil nurses—Mary Kennedy and Elizabeth von Sternberger.

We beg to thank Dr. Philip Van Ingen for his kind care and attention to our sick nurses.

While the new quarters are being constructed our nurses are comfortably settled in a house which we have rented at 307 East 50th St.

MARY AGNES SMITH,
Superintendent.

CLASS OF GRADUATES

POST-GRADUATE COURSE FOR TRAINED NURSES

Many more applications than heretofore have come to us from Graduate Nurses desiring to take the eight months' Post-Graduate course.

Ward instruction and practical demonstrations are given by the Assistant Superintendent and lectures by the Resident Physician.

Most of the nurses who have taken the course are now occupying Hospital positions, and we are continually in receipt of requests from Hospitals desiring, for the positions of Superintendents, Head Nurses and various other heads of departments, nurses who have received instruction here.

During the year the following nurses have received diplomas:

MISS MARY E. WAYNE,
Rhode Island Hospital,
Providence, Rhode Island.

MISS IDA BENZON,
Copenhagen, Denmark.

MISS ANNA B. ROBINSON,
Homeopathic Hospital,
Pittsburg, Pa.

MISS SUSAN MATHEWSON,
St. Christopher's Hospital,
Philadelphia, Pa.

REPORT OF THE VISITING NURSE COMMITTEE

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

For the last three years The Babies' Hospital has employed a graduate trained nurse for the following purposes: To look after babies discharged from the Hospital during their period of convalescence; to visit in the homes the patients under treatment in the Dispensary, and to assist at the afternoon clinics.

During the past year 924 visits were made in the houses by our visiting nurse. In considering the number of visits made by the nurse during the year it must be remembered that babies are brought to our Hospital for treatment from all parts of Greater New York, so that the distances to be covered by the nurse are often very great.

If the district nursing of the Hospital is to be done thoroughly we shall need more nurses in this department for the work. Every case under treatment in the Dispensary should be at least investigated by the nurse; and every patient discharged from the Hospital should be visited during the first week or so of their convalescence.

No small part of the visiting nurse's work is the instructing of mothers in the general care of their sick babies. In feeding cases especially these visits in the homes have proved most beneficial to the babies, and at the same time most helpful to the doctors in charge of the case, as a much quicker and more satisfactory result can be obtained after a mother has had practical instruction in the preparing of the food.

Before closing my report I wish, in behalf of the Hospital, to extend its most sincere thanks to the Straus Milk Company and to the New York Diet Kitchen for milk given when applied for.

RUTH LAMBERT CHENEY,
Chairman.

WANTED

CONTRIBUTIONS

For the support of

THE BABIES' HOSPITAL. OF THE CITY OF NEW YORK.

¶ Are you interested in the actual saving of a baby's life?

¶ Are you interested in giving many children the opportunity for a sound and healthy body instead of a life of semi-invalidism?

¶ Are you interested in the spread of the knowledge, how properly to care for and nourish the future citizen?

¶ This is a photograph of a baby in this hospital, age 14 months, weight 11 pounds—one half that of a normal child of his age—due to faulty feeding and the ignorance of his mother. He is the type of many that we help.

If you are interested send your contribution to

MRS. J. B. CALVERT, Treasurer,

Lexington Ave. and 55th St., New York.

Christmas gifts for the children.
Women's Society of the Alexander Avenue Baptist Church,
23 diapers; 7 wrappers; 36 sheets; 27 bibs.

"THE CHILDREN'S CHARITY"

TO OUR LITTLE FRIENDS:

You know, don't you, what it means to be ill—to feel queer and hot, and have to go to bed, and then the doctor comes and puts a thermometer in your mouth, and leaves medicine that has to be swallowed perhaps once every hour. In some ways it isn't much fun, but there are some nice things about it. You very often can have both mother and nurse all to yourself, and the getting better is very nice indeed. When so much is done to make you happy that you can say, with the little boy that Stevenson wrote about:

"When I was sick and lay abed
I had two pillows at my head,
And all my toys beside me lay
To keep me happy all the day.

"And sometimes for an hour or so
I watched the leaden soldiers go,
With different uniforms and drills
Among the bed-clothes, through the hills.

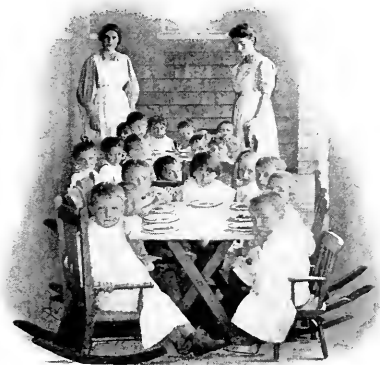

"And sometimes sent my ships in fleets
All up and down among the sheets;
Or brought my trees and houses out,
And planted cities all about.

"I was the giant, great and still
That sits upon the pillow-hill
And sees before him, dale and plain,
The pleasant land of counterpane."

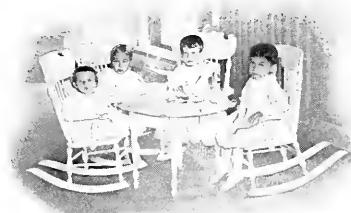

But did you ever think of the thousands of little boys and girls in New York, who are not as lucky as you are, and whose father and mother too

have to go out every day to work. Then when the children are sick, how are they to be taken care of and what is to be done for medicine and doctor's bills? Some of these youngsters, I am afraid, don't know the pleasant land of "Counterpane."

But there are ways in which these poor people are helped, and one of the best things that can happen to the sick children is to be taken to "The Babies' Hospital." There are nurses and doctors, who know all the best ways to make little people comfortable, and help them to get well and strong again. It costs a great deal of money to run

such a big hospital. (Last year there were in all 1,182 babies in the wards.) Will you join the children's charity, and so help the sick babies? To do so send your name and address, with one dollar, to Miss Robinson. A dollar that you have earned yourself, or saved up from your allowance may do more good than you will ever know to some poor sick baby.

Sincerely yours,

"THE CHILDREN'S CHARITY."

APPETIZING MEALS BEING CAREFULLY PREPARED

GENERAL RULES

- 1.—The beds of the Hospital are free to the needy poor. Others are charged, according to their means, from \$3.50 to \$7 a week for board.
- 2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.
- 3.—Applications for admission should be made at the Hospital during the day, from 9 to 5, although emergency cases are received at any time.
- 4.—The Out-Patient Department is open daily throughout the year, from 10 to 11 A. M., and from 2 to 3 P. M., excepting on Sundays and holidays.
- 5.—Visiting day, for friends of patients, is Thursday, from 11 A. M. to 3 P. M.
- 6.—Visitors to the Hospital are welcome any afternoon, between 3 and 5.

HOSPITAL CALENDAR

- ANNUAL BOARD AND CORPORATION MEETING, third Tuesday in January.
- REGULAR BOARD OF DIRECTORS MEETINGS, third Tuesday in October, January and April.
- EXECUTIVE COMMITTEE, third Tuesday in November, December, February, March and May.
- ANNUAL MEETING OF THE WOMEN'S BOARD, second Tuesday in December.
- WOMEN'S BOARD, second Tuesday of every month, from October to May, both inclusive.
- WOMEN'S BOARD—EXECUTIVE COMMITTEE, monthly, except during months of June, July, August and September.
- HOUSE COMMITTEE, monthly, from October to May, both inclusive.
- NURSES' COMMITTEE, monthly, from October to May, both inclusive.
- SUMMER COMMITTEE, monthly, during June, July, August and September.
- MEDICAL BOARD, first Monday in January.
- CRIBSIDE COMMITTEE, annual meeting in November.

FORM OF BEQUEST TO THE

Babies' Hospital

OF THE CITY OF NEW YORK

(Incorporated Sept. 14th, 1887
Under the laws of the State of New York)

I give and bequeath to THE BABIES'
HOSPITAL OF THE CITY OF NEW YORK the
sum of _____ dollars,
to be applied to the uses and purposes of
said Institution.

Incorporated 1887

TEN FACTS OF INTEREST

1. The Babies' Hospital has been established over 22 years.
2. It has, up to October 1, 1910, admitted and treated 12,674 babies in its wards.
3. It is the only Hospital of its kind in New York caring exclusively for babies.
4. It is carefully and economically managed and takes pride in not permitting the expenses of its work to exceed its current income.
5. It has a Summer Branch for convalescent patients at Oceanic, New Jersey.
6. It has directly, through its own efforts, saved the lives of over 8,500 babies.
7. It operates a Dispensary where very poor patients may be treated free for any ordinary malady.
8. It furnishes clinical lectures concerning the treatment of babies, to the students of the College of Physicians and Surgeons.
9. Its School for Infants' Nurses fills a useful purpose and has graduated 486 pupils.
10. It offers an eight months' Post-Graduate course to Graduate Nurses from schools of good standing.

Acrostic

DEDICATED BY A FRIEND TO
THE BABIES' HOSPITAL
AN APPEAL FOR SICK BABIES

Both rich and poor need love and care,
A baby first of all ;
Begin your charity with us
In gifts both large and small,
Each dollar you can give our way
Some sick child needs, and needs to-day.

Have you a baby of your own,
On whom you lavish care ?
Sometimes consider the neglect —
Poor babies have to bear;
In many homes where funds are low,
These babies cry in vain;
An awful thing —when one might give
Love, care, and health again.

If you are interested send your contributions to
Mrs. JOHN B. CALVERT, Treasurer, Lexington Ave. and 55th St., N. Y.

REPORT OF THE DIRECTORS

TO THE DIRECTORS OF THE BABIES' HOSPITAL:

Gentlemen:

The latter end of the year 1910 finds us in a better position regarding equipment than we had hoped to reach for a number of years, owing chiefly to the fact that the addition constructed upon our adjacent property, at 661 Lexington avenue, has been completed and has been put to use. Our Hospital now measures 60 feet on Lexington avenue and 80 feet on Fifty-fifth street, making a structure that has convenient proportions throughout, furnishing sunlight and ample accommodations for the different departments.

During the present year we have also had certain parts of the older Hospital re-arranged and repainted to conform with the recently completed addition, so that our entire plant is in the best condition for effective work—a unit of modern construction.

These re-arrangements consist chiefly in improving or supplying certain features that were needed to complete our organization—more economical methods of operation being one of our aims.

Our laundry, for instance, in the old building, was insupportably hot, the temperature sometimes rising to 110 degrees F. during the summer months. This seemed to us the first change required, and we now have an entirely new laundry in the basement of the addition on Lexington avenue, fitted up with every modern convenience and properly lighted and ventilated throughout.

Our kitchen, storerooms, and other portions of the building pertaining to the practical work, have been improved by certain changes effected.

We have devoted a part of our re-arranged space on the upper floors to the Premature Ward. This ward is kept at a constant temperature of 90 degrees, and is used not only as the name implies, but in emergency cases as well—possibly for such patients as come to us with sub-normal temperatures, or any other exceptional cases requiring an excessively warm atmosphere. Special mention of this matter is made in the report of our Attending Physician. We have also a ward which is designed to prevent, so far as possible, bed-to-bed infection, accomplished by the erection of marble slabs, forming alcoves, in each one of which there is sufficient space for a crib. Excellent results have come from this experiment.

Our Roof Garden, or Out-Door Ward, for the treatment of special cases, has been enlarged and improved, occupying the entire southerly side of the building on the eighth floor. It is covered with a canvas roof, and protected on the sides by drop awnings. With these new features it is readily seen that we have different temperatures available for use, according to the requirements of the patients.

The space occupied by our Out-Door Department has been more than doubled in the new addition, and while in the former years we were crowded beyond our capacity, making matters rather uncomfortable for our applicants, we now have seating capacity for those who apply for relief, and the various rooms connected with this department occupied by the doctors and nurses are conveniently and pleasantly located. Our new addition furnishes rooms for thirty-four nurses, making it unnecessary for us to hire additional accommodations outside for those who work in the Hospital.

When we review the work which has been done during the past year, we feel that the results have justified all the efforts expended by us.

It is unfortunate that mothers wait so long before they bring their babies to us for treatment. Often the idea gets fixed in their minds that they should try some other plan of feeding or treatment, such as may be suggested by a friend who has had

experience. This, in some cases, would be all right, but in many others it might prove fatal to the patient. We think that this tardiness on the part of the mother, sometimes the result of prejudice against hospital treatment, is less than it was some years ago, but the fact remains that we do receive many babies in a well nigh exhausted condition, whose physical vitality has been sapped by improper feeding and ignorant or careless treatment.

Our City Hospital is now kept open all summer, which in former years was not the case, and the results of the summer work—both at Oceanic, New Jersey, and in New York—are most gratifying.

During the twelve months ending October 1, 1910, we treated in the Hospital, 1,361 patients, the average stay of which was seventeen days. In the Out-Patient Department there was a large increase, the number of visits made being 15,518.

The Training School for Infants' Nurses has graduated a class of forty-five young women during the past year; and a few special nurses have taken a Post-Graduate course, which has afforded them the opportunity of seeing the kind of work done in our Hospital wards among the babies. The experience thus gained by an outside nurse is, we think, one of peculiar value, and in past years many have availed themselves of it.

It is interesting to note the decrease in twenty years of infant mortality in this great metropolitan city with its heterogeneous population. The reason for this decrease is, we believe, largely due to the efforts of a few men who have made a special study of the illnesses and conditions surrounding infant life. In 1888 the deaths of children under one year were 68 per 10,000 of population; in 1908 the deaths of children under one year were 39 per 10,000 of population—a remarkable fact, owing largely to more intimate knowledge and improved methods of treatment.

The officers are indeed grateful to Dr. and Mrs. L. Emmett Holt for their gift of \$5,000 in memory of Kenneth M. Holt; and also to Mr. Edwin Clarence Moller for his gift of \$5,000 endowing a Bed in Perpetuity in memory of Peter Moller. Also to Mrs. Sigmund Neustadt in memory of Sigmund Neustadt, \$1,000. These funds have been invested so as to yield an income for the future.

We are also largely indebted during the current year for many kind gifts towards the Building Fund, chief among which is that of Mr. John D. Rockefeller, \$25,000, and from Mrs. Herbert L. Terrell, \$1,000, and other amounts from Mrs. C. W. Hammill and Mrs. John B. Calvert.

In conclusion we wish to extend our profound gratitude to all those who have taken part in our work during the past year. It is only with the help of these faithful laborers in the vineyard that we can reap the harvest which it is our good fortune to produce, and the efficiency of our workers furnishes the basis of this result.

It would not be proper for us to close our report for the year without a word of thanks to our contributors who have responded in such a willing and sincere way to our appeals.

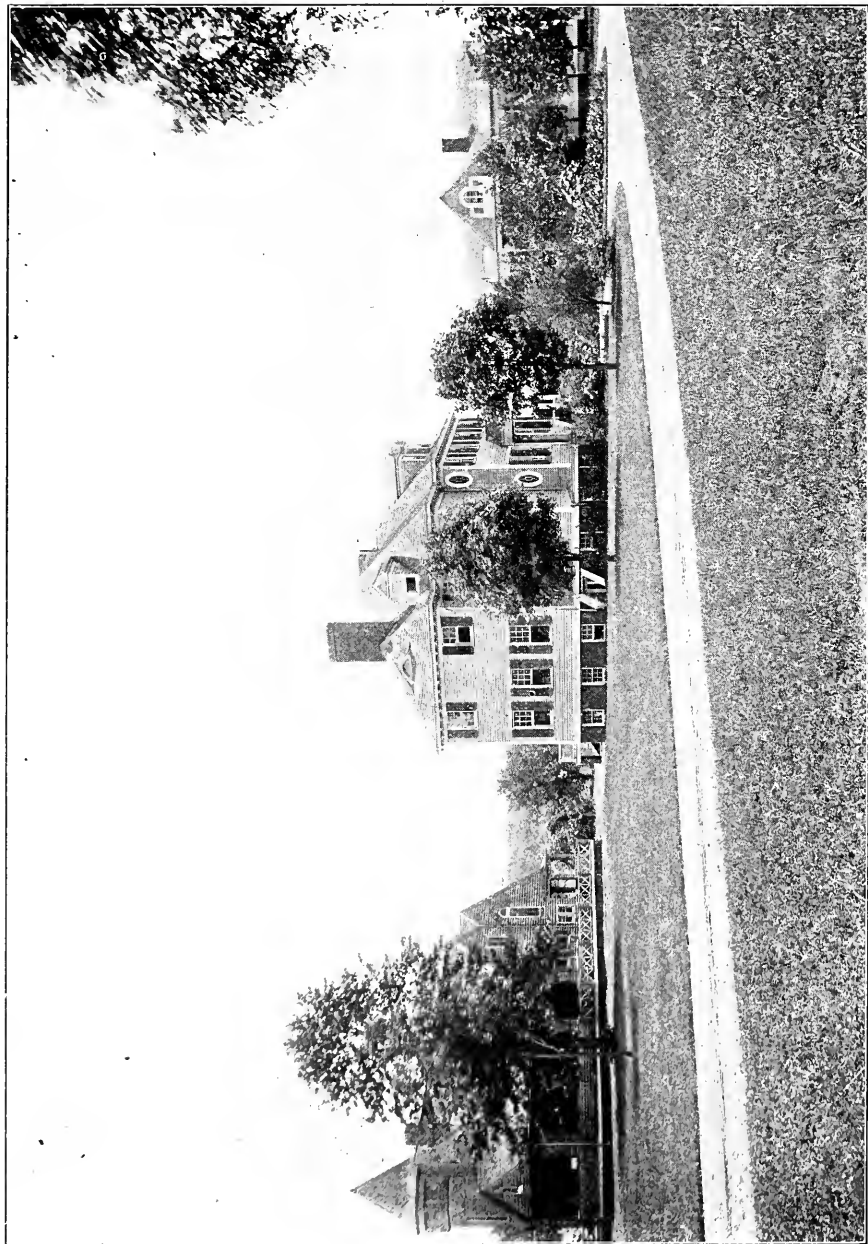

It is hoped that we may merit their support more and more as the years go by.

B. OGDEN CHISOLM,

Secretary.

JOHN SHERMAN HOYT,

President.

OUR SUMMER HOME, OCEANIC N. J.,

REPORT OF THE SUMMER COMMITTEE

TO THE DIRECTORS AND BOARD OF MANAGERS OF THE BABIES' HOSPITAL:

The Chairman of The Summer Committee reports a most successful season at the Oceanic, New Jersey, Branch of The Babies' Hospital.

Its work was characterized by harmonious and united action on the part of its members, and at no time in its history has there been manifested such certain evidence that it would retain its hold upon the interest and affection of the people in this community.

The increased cost of all supplies made it difficult to keep within the usual bounds of expenditure, but the strict economy of the Superintendent, and her careful supervision of all domestic details, resulted in a showing which compares favorably with that of other years.

The Hospital was open from May 31st to August 31st, during which time 233 patients were treated. No deaths occurred.

A Sale and Open-Air Entertainment was held at the residence of Mrs. John Jay Knox, from which the sum of about \$4,180 was realized, which more than cared for the summer outlay.

Thanks are due the Members of the Committee and a generous public, for the earnest co-operation which made possible this substantial result.

CECELIA FITLER BARROWS, *Chairman.*

MEDICAL REPORT

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

The twenty-second year of the Babies' Hospital has been one of great activity in every department. The medical work has been interfered with to some degree by the construction of the addition to the Hospital building, but not as much as was feared. The greatest embarrassment was suffered in the Out-Patient Department during the summer months. Now, happily, all these difficulties are adjusted and the Hospital again is in full working order. In spite of the disadvantages noted, the work of the year was larger than that of the previous year, as shown in the following comparative table:

	1909	1910
Patients treated in Hospital.....	1,210	1,361
Days of Hospital treatment.....	23,055	23,310
New Out-Patients	3,103	3,855
Out-Patient visits	12,475	15,518
Laboratory examinations	5,273	7,439
Children sent to Oceanic.....	209	233

The additions to the building will supply several important needs. The warm room constructed for premature infants, which is described in the report of the President, is proving to be of very great service along lines which were not previously foreseen. Almost every day during the cold season, young infants are admitted after being exposed for several hours in the street, frequently with temperatures which are three or four degrees below normal. The difficulties in the way of bringing about suitable reaction are

very great. In the past this has been accomplished by the use of hot baths, friction to the skin, surrounding the child in a padded crib with several hot water bags, and the judicious administration of stimulants internally. Recently it has been found that simply to place these children in this room, which is kept at a temperature of from 90° to 95° F., and to leave them there for two or three hours accomplishes far more and with no disturbance whatever to the patient. The temperatures of such infants taken at half-hour intervals show that under the influence of these favorable surroundings the temperature

rises steadily and the child's pulse, color and general vigor improves quite as promptly. This is better for the baby and lightens the labor of the nurse; it avoids much active disturbance to the child and is every day proving of the greatest possible advantage. Such children are left in the warm room from two to four

hours according to the requirements, and when a good reaction is established, they are transferred to the wards. A baby with a temperature of 94.6° F. was placed in the room at 8:00; by 8:30 the temperature was 96.2° F., and by 9:00 it had risen to normal, 98.6° F.

Almost every day at morning rounds one or two children are discovered with feeble circulation and sub-normal temperature and a removal of them to the warm room for a few hours is followed by the same improvement noted in the other cases. We have still much to learn about the use of the higher room temperatures, but it promises to be a great resource.

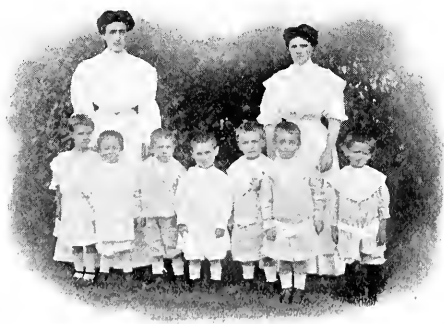

The new roof garden is also filling a need which we had long felt. It is twenty feet wide and eighty feet long; is protected on the north by the wall of the main building, which extends one story higher; it is surrounded by a heavy wire network and protected on the top and sides by awnings. Here, except during storms or extreme cold, it is possible for us to keep cases

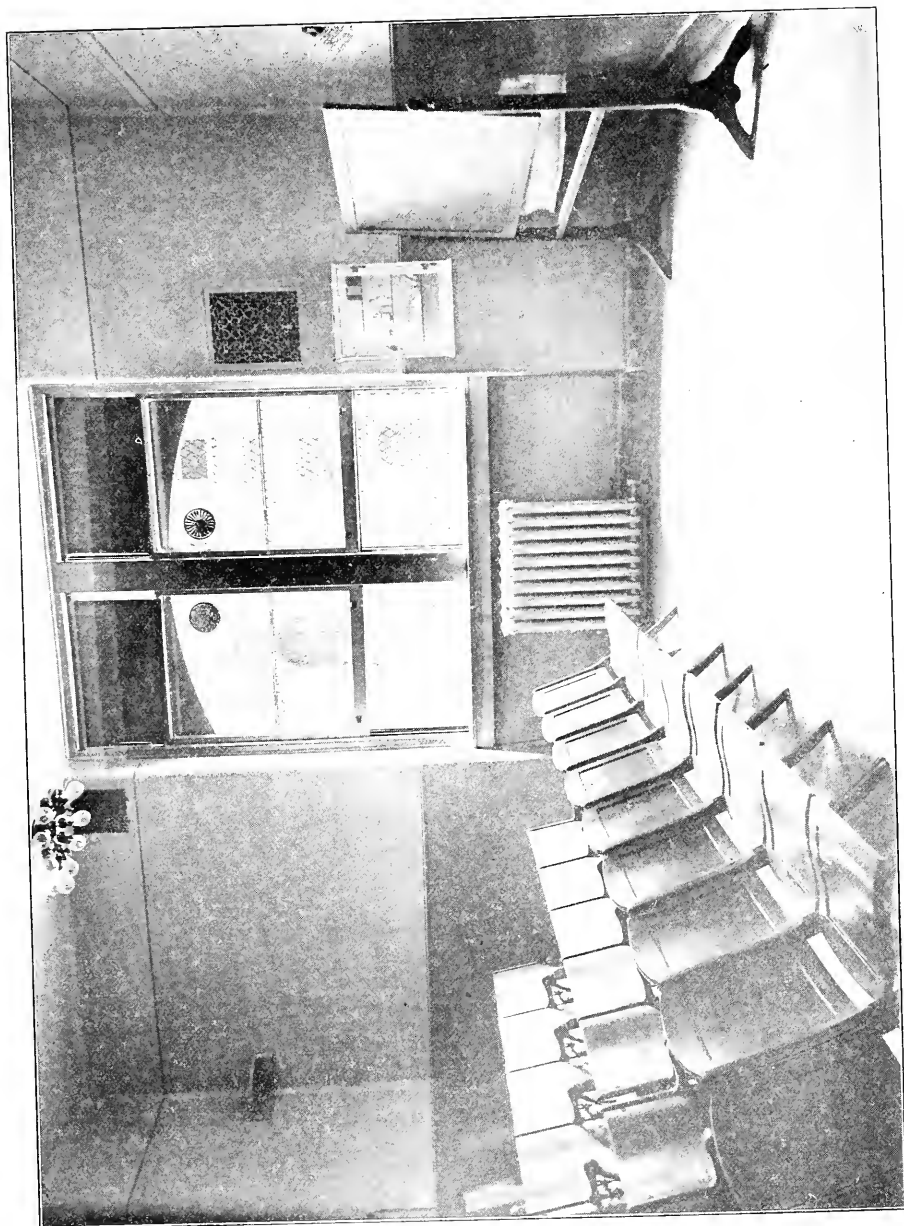

adapted to the cold air treatment. Such we have found to be: Certain forms of pneumonia, empyema, pulmonary tuberculosis and tuberculous peritonitis, anæmia, malnutrition and surgical cases. Some of these are kept during twelve hours out of the twenty-four and some for a longer time. In their little beds, thoroughly protected by hoods and flannel wrappers, these children seem greatly to enjoy the fresh air and are doing well under it. On the milder days young infants and cases of almost every description are sent to the roof, but on cold days the young infants and very delicate patients are not benefited by it.

We are thus supplied at the present time with three temperatures at which infants may be treated: The ordinary room temperature of the wards, the cold air of the roof garden, and the warm room. A place will be found for each one of these methods of treatment in many of the difficult conditions which we are called to face with these feeble patients. It is yet too soon to tell what the results with premature infants, for which the room was specially designed, will be under the more favorable conditions which we can now furnish.

In addition to the regular routine work of the Hospital, caring for patients, training nurses and teaching students, one or more research problems are always on hand for special study and investigation.

The most important research work done in the Hospital during the past year has been on the subject of influenza. It has long been our belief that the influenza bacillus played a more important part in the respiratory infections of these children and for over two years now cultures from the bronchial secretion have been made from all children with pneumonia, bronchitis

LECTURE ROOM

and, in fact, a cough of every description. During the past year 2,647 cultures of this kind were made. Some interesting results have been obtained. It has been found that throughout the cold season the influenza infection was constantly with us and continued to be until warm weather came. In the spring of 1909 it disappeared very rapidly and permanently in the latter part of May. Exactly the same thing happened during the spring of 1910; in the summer and early fall no influenza has been found. It began to appear again in the fall of 1909 about the middle of October. During the present season it has come later and has been much less frequent than one year ago. When influenza infection is present it has been found greatly to modify the course of *pneumonia* and usually to add to the severity of the cases of pneumonia. We have sought every means to prevent its spread in the wards. The alcoves constructed in several wards have proven of very considerable value in accomplishing this, and we are quite convinced of the wisdom of making them a part of the Hospital outfit.

The necessity of having a certain amount of breast milk becomes more apparent with each year. Only by this method of feeding can many of our most desperate cases be saved. Some of these are feeding-cases, infants only a few weeks old. To such, three or four breast feedings a day are given for a few weeks until they have made a start. They are then placed entirely upon the bottle, in most cases without trouble. A single wet-nurse can in this way furnish all that is needed for three or four infants at a time. We have had a number of successful operations in young infants upon the stomach for obstruction which we could not possibly have saved without a supply of breast milk. If the need for this were appreciated by the public we feel sure that there are many persons who would do what four patients of Dr. La Fetra's have done during the past year, viz.: Send breast milk to the Hospital when they could. From one wet-nurse who had an excessive secretion, the family were able to send one pint of breast milk daily for two weeks; others have sent smaller amounts for longer periods. In a number of cases a life has been saved by having this food to give at critical times.

During the past year there has been fitted up in a room adjoining the pathological department a chemical laboratory in which Miss Courtney, one of the staff of workers of the Rockefeller Institute, is engaged, in co-operation with the physicians of the Hospital, in studying the problem of infant feed-

ing. The advantage of the co-operation of the Institute in the solution of a problem like this, where a skilled analytical chemist is so necessary, is very great. Miss Courtney's salary is borne by the Institute. The work is full of promise for the future.

As will be seen by the table at the beginning of this report, the work of the pathological laboratory is growing faster than that of any other branch of the Hospital. This increase cannot go much further unless a special appointment is made of some one to devote the entire time to this work. The expansion of the work done in the Hospital in every direction has thrown upon the three internes greatly added responsibilities and if this increase continues we must soon consider an increase in the medical staff.

The work at Oceanic was conducted along the usual lines this last summer and was very successful.

A great expansion in the Hospital during the past year has been in the Out-Patient Department, the figures of which are given in the statistical tables contained elsewhere. The facilities provided for this department will be sufficient for twice as large a service as that which now exists.

The Hospital enters upon its twenty-third year better equipped in point of facilities than ever before and with more enthusiasm on the part of its workers in every department than it has known since the institution was organized. There has been no change in the attending staff or assistants since the last report. It is a pleasure to refer again to the excellent work done by the Resident Physician, Dr. Hemenway, and her assistants during the year.

L. EMMETT HOLT.

REPORT OF THE CRIBSIDE COMMITTEE

The Cribside Committee of The Babies' Hospital held its regular monthly meetings at the Hospital on the first Wednesday of each month, from November until May during the year 1909-1910, with an average attendance of thirteen members.

At the annual election the following officers were unanimously elected:

MISS FRANCES L. HOWLAND,	-	-	-	Chairman.
MISS LOUISE P. DAVENPORT,	-	-	-	Vice-Chairman.
MISS PAULINE FISKE	-	-	-	Secretary.
MRS. HENRY L. BOGERT, JR.,	-	-	-	Treasurer.

The regular work of the Lenten Sewing Class was again carried through under the direction of the following committee:

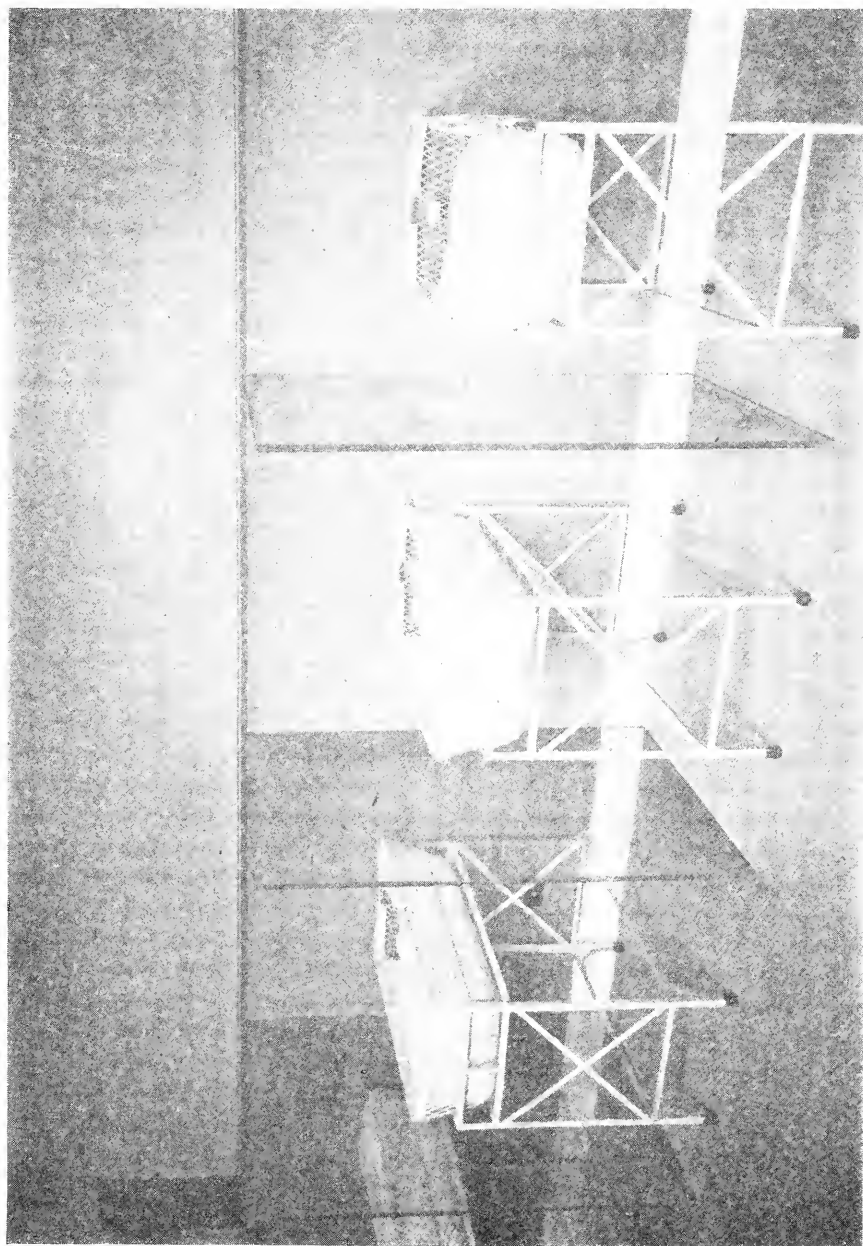

MISS MAUDE H. CURTISS, Chairman,	
MISS FREEMAN,	MRS. STERLING.

The meetings were held on Thursday mornings during Lent at houses that were very kindly loaned by friends of the committee. The hostesses were very thoughtful in providing bouillon, sandwiches, etc. Between six and seven hundred garments were turned over to the Hospital.

The Clothing Committee of the Hospital asked help from the Cribside to assist with the mending in the wards, so each month some of our members volunteered.

A lecture was given by Mr. Underwood at the Berkeley Lyceum on the afternoon of April 8th, the proceeds of which are to aid in endowing a bed in the Hospital.

PAULINE FISKE,
Secretary.

PREMATURE WARD
Kept at a constant temperature of 90° F.

LIST OF MEMBERS OF THE CRIBSIDE COMMITTEE

ACTIVE MEMBERS

Mrs. Henry Belt,
Mrs. Henry L. Bogert, Jr.,
Miss Catherine S. Burton,
Miss Anna Gray Carter,
Mrs. Walter H. Close,
Miss Nina R. Chisolm,
Miss Emily Coddington,
Miss Maude H. Curtiss,
Miss Louise P. Davenport,
Miss Dorothy Dean,
Miss Shirley Dean,
Miss Pauline Fiske,
Miss Mary L. Fowler,
Miss Elizabeth Godwin,
Miss Frances L. Howland,
Miss Edith V. C. Jay,

Miss Katherine Le Boutillier,
Miss Katherine B. Lockwood,
Miss Mary St. John Mairs,
Miss Mary Martin,
Miss Isabel F. McCready,
Miss Elizabeth B. Oakley,
Mrs. Samuel R. Outerbridge,
Miss H. Eleanor Robinson,
Miss M. Therese Smith,
Miss Eugenia Bethune Stein,
Mrs. Robert Sterling,
Miss Edith C. Thompson,
Miss Emily N. Tremain,
Miss Ethel Turnbull,
Miss S. E. Williams,
Mrs. Morgan Wing.

ASSOCIATE MEMBERS

Miss Ellen Louise Adee,
Mrs. Ernest R. Adee,
Mrs. Henry M. Alexander, Jr.,
Miss L. H. Barnard,
Mrs. Henry G. Bartol,
Miss E. L. Burke,
Mrs. Arthur Brooks,
Mrs. D. Fairfax Bush,
Mrs. J. Morris Butler,
Mrs. André Champollion,
Mrs. Knight D. Cheney, Jr.,
Mrs. George S. Curtis,
Mrs. H. G. Ferguson,

Mrs. Harold Fitzgerald,
Miss Margaret Gardiner,
Miss H. G. Grannis,
Mrs. Oliver G. Jennings,
Mrs. R. H. McCormick, Jr.,
Mrs. Joseph Meyers,
Mrs. H. B. Montgomery,
Miss Caroline L. Morgan,
Mrs. Samuel Riker,
Mrs. Kenneth D. Robinson,
Miss Lucy Talmadge,
Mrs. Henry G. Trevor,
Miss M. M. K. Wilson.

Treasurer.

REPORT OF THE OUT-PATIENT DEPARTMENT

Attendance by Months

	New Cases	Visits
October, 1909	297	1,281
November	239	1,180
December	211	1,021
January, 1910	206	932
February	236	1,051
March	392	1,508
April	289	1,308
May	302	1,242
June	336	1,264
July	467	1,597
August	477	1,673
September	403	1,461
Total.....	3,855	15,518
Vaccinations	70	
Prescriptions	19,279	

Morning Clinics: New Patients, 1,091; visits, 4,582.

Afternoon Clinics: New Patients, 2,764; visits, 10,936.

The average daily attendance was 50.

A special clinic for the treatment of vaginitis was continued throughout the year on three afternoons each week. At this clinic 714 treatments were given.

Physicians in Charge.

Days of Attendance.

J. HERBERT LAWSON, M.D.....Monday, Wednesday and Friday mornings.
 PHILIP VAN INGEN, M.D.....Monday, Wednesday and Friday afternoons.
 HENRY E. HALE, M.D.....Tuesday, Thursday and Saturday mornings.
 THOMAS S. SOUTHWORTH, M.D.....Tuesday, Thursday and Saturday afternoons.

REPORT OF THE PATHOLOGICAL LABORATORY

AUTOPSIES :

REPORT OF THE TRAINING SCHOOL FOR INFANTS' NURSES

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

During the past year the pupils of the Training School have occupied the temporary Home at 307 East 50th Street.

In stormy weather it was very inconvenient, but the year was one in which we had no serious illness, and the general health of the nurses was much improved by the daily exercise.

We are now in the Nurses' quarters in the New Annex and find it very comfortable and complete in its construction.

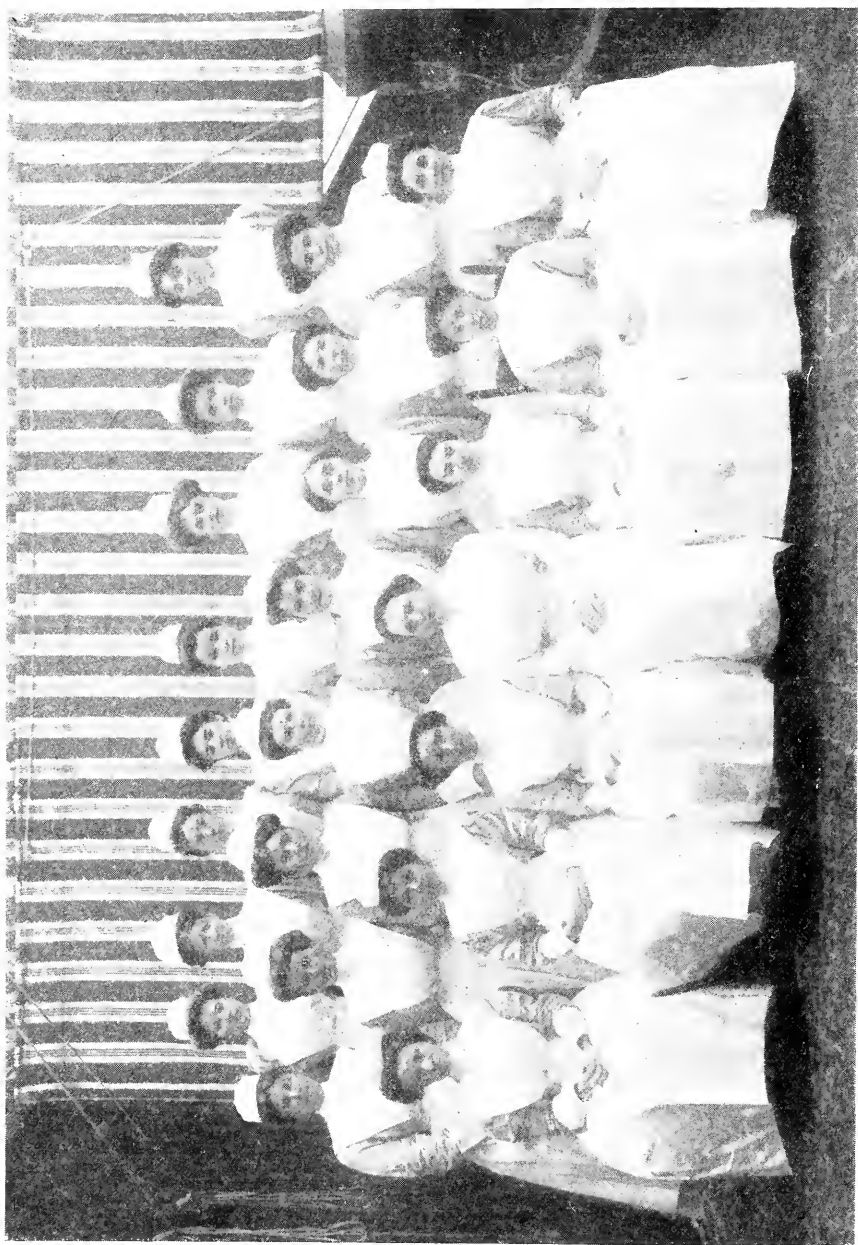

It is a pleasure to report that 38 nurses received the Hospital pins, which are given only when an employer sends a letter to the Hospital saying the nurse has proven satisfactory and has remained in her place one year. Some of these letters were very gratifying, expressing the appreciation of the untiring work of the nurses and their devotion to the babies.

There were 66 probationers entered the School this year; 47 were accepted as pupils; 8 resigned; 11 were rejected as unfitted for the work. Forty-five nurses graduated during the year.

Kindergarten instruction is given each week and enjoyed by our nurses.

We wish to express our thanks to Mrs. Oliver G. Jennings for the Christmas gifts to our Training School pupils; and again to thank Dr. Van Ingen for the valuable time he gives to the Training School, making physical examinations of all pupils before acceptance.

MARY AGNES SMITH,
Superintendent.

REPORT OF THE POST-GRADUATE COURSE FOR TRAINED NURSES

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

Although we had ten Graduate Nurses enter our Post-Graduate course, only three completed the term. Four were obliged to leave on account of illness in their homes; one was not accepted, and two resigned. This has been very disappointing to us, as the nurse is taught our methods of feeding and treatment and becomes helpful in the Hospital, when she leaves and another comes in her place. We hope the coming year will be a more satisfactory one in this respect, for these interruptions interfere with the general work.

We are continually receiving letters from other hospitals and institutions desiring capable women who have had special training in infants' feeding and nursing, and we are pleased to report that most of the nurses who have had our Post-Graduate course are now occupying responsible positions. In July, 1909, we recommended Miss Bertha Moeri, one of the first of our nurses, to the Consul-General of the Peruvian Government, to go to Lima in charge of a Babies' Hospital. She went in September, 1909, took with her one of our Graduate Infants' Nurses, and together these women are doing pioneer work in the saving of babies and teaching of mothers in South America. A small Training School for native girls has been established and many reforms have been introduced.

The following nurses received diplomas:

MISS ALICE O'GARA,
St. Luke's Hospital,
Ottawa, Canada.

MISS E. VICTORIA BRIGGS,
Waltham Hospital,
Waltham, Mass.

MISS LYDIA STRATTON,
Lebanon Hospital,
New York, N. Y.

REPORT OF THE VISITING NURSE COMMITTEE

TO THE DIRECTORS AND THE BOARD OF MANAGERS
OF THE BABIES' HOSPITAL:

For the past four years a graduate nurse has been employed by the hospital, giving half of her time to visiting the babies who have been under treatment in the hospital or in the dispensary. The morning hours are given to this work, and the nurse is on duty in the dispensary each afternoon to help in caring for the patients there. The work in the dispensary is growing steadily, some afternoons as many as 80 patients being cared for.

The duties of the nurse are varied, for she is expected to give useful general advice, as well as to offer professional skill. She is often obliged to teach the mother the most elementary rules of hygiene. She instructs the mother in the preparation of foods, in the continued administration of drugs, and the giving of baths to infants. When wounds are to be dressed, the nurse herself does this. This nurse, who is also a so-called Social Service worker, is often called upon to refer families to the Charity Organization Society, the A. I. C. P., or other societies for aid, and always receives a hearty co-operation. At other times she is able to secure a two weeks' sojourn in the country at a convalescent home, and often for a longer time, several cases having been referred to the Speedwell Society, the Committee paying \$10 a month for such cases.

In the summer these sick or ailing babies and their mothers are often sent to the country to a fresh air home, through the helpful services of the nurse, or given a day's outing on a boat excursion.

It is readily to be seen that such a person is not only of inestimable value to the families, but also to the doctors and hospital authorities, for a much more satisfactory and rapid result can be obtained when such instruction and co-operation are given.

The number of visits made during the year were 1,430.

HELEN F. DRAPER,

Chairman.

WANTED

CONTRIBUTIONS

For the support of

THE BABIES' HOSPITAL OF THE CITY OF NEW YORK.

☐ Are you interested in the actual saving of a baby's life?

☐ Are you interested in giving many children the opportunity for a sound and healthy body instead of a life of semi-invalidism?

☐ Are you interested in the spread of the knowledge, how properly to care for and nourish the future citizen?

☐ This is a photograph of a baby in this hospital, age 14 months, weight 11 pounds—one half that of a normal child of his age—due to faulty feeding and the ignorance of his mother. He is the type of many that we help.

If you are interested send your contribution to

MRS. JOHN B. CALVERT, Treas.
Lexington Ave. and 55th St., New York.

5 slips; bundle of clothing.
- Wiggins, Miss Mabel R.,
Toys for Christmas.
- Williams, Mrs. Waldron,
3 night dresses; 4 gertrudes.

“THE CHILDREN’S CHARITY”

TO OUR LITTLE FRIENDS:

I don’t know how you feel, but I do know how I feel whenever I see a little child that is ill, or whenever I hear about a baby quite helpless and unable to do anything for itself. I simply must get there at once and see if some help cannot be given.

Now let us see how the baby feels: Sick and uncomfortable usually, with some pain somewhere—can’t enjoy its food, can’t sleep, keeps on crying—and altogether is very miserable. Now that isn’t much fun, is it?—and there are a great many nicer feelings than some of those I refer to. Maybe some of you who are reading this may remember how you felt

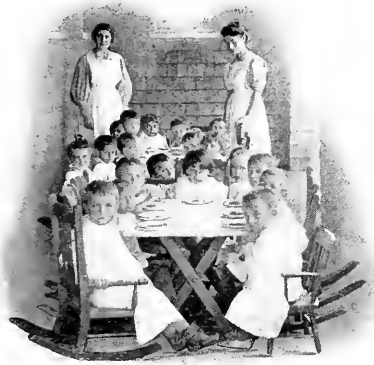

when you were babies, and how kind your mother was or how thoughtful your aunt was who came so often to see you and brought you nice picture-books or a toy or something that made you forget, for a while at least, some of your pains or the taste of that horrid medicine the doctor gave you. Now, when you got better, things all looked so much happier. Didn’t they?

Do you realize that there are hundreds of little babies who are sick, and feverish, and restless all the time? They have no kind mother or thoughtful aunt to make things easier and happier for them.

The Children’s Charity tries to do what it can for the little ones in our Hospital. It tries to make them happier and to bring a little cheer to the homes of the babies. So, my dear friends, don’t forget this little work of ours. Remember, it is only \$1.00—which I am sure you can spare—and that it means much towards helping to cheer up a sick child.

Listen to what that wonderful poet, Robert Louis Stevenson, wrote about a sick child :

"When I was sick and lay abed
I had two pillows at my head,
And all my toys beside me lay
To keep me happy all the day.

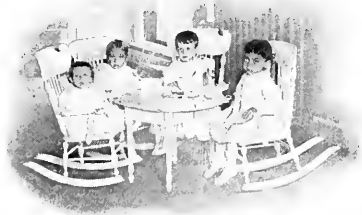

"And sometimes for an hour or so
I watched the leaden soldiers go,
With different uniforms and drills
Among the bed-clothes, through the hills.

"And sometimes sent my ships in fleets
All up and down among the sheets;
Or brought my trees and houses out,
And planted cities all about.

"I was the giant, great and still
That sits upon the pillow-hill
And sees before him, dale and plain,
The pleasant land of counterpane."

Having read this, don't you think there are ways in which you can help—because the trouble that comes to these poor babies they are not to blame for. It is so often that they are born weak and sickly, or maybe the milk was sour and their mother did not know it, or maybe they took cold because they had no clothes. This happens lots of times.

Last year we took care of 1,333 babies—a very big family you will say—but then you see New York is a very large place. It did cost a lot of money to feed and clothe all these babies, and if you care to do so you can certainly help us. Just put \$1.00 in an envelope and mail it to the Hospital, and be sure and write your name and address plainly—or maybe your mother will send a check by mail—but anyway don't forget it.

Sincerely yours,

A Friend of The Children's Charity.

PREPARING BABIES FOOD NEEDS UTMOST CARE

GENERAL RULES

1.—The beds of the Hospital are free to the needy poor. Others are charged, according to their means, from \$3.50 to \$7 a week for board.

2.—Sick children under three years of age are admitted, excepting those suffering from contagious diseases.

3.—Applications for admission should be made at the Hospital during the day, from 9 to 5, although emergency cases are received at any time.

4.—The Out-Patient Department is open daily throughout the year, from 10 to 11 A. M., and from 2 to 3 P. M., excepting on Sundays and holidays.

5.—Visiting day, for friends of patients, is Thursday, from 11 A. M. to 3 P. M.

6.—Visitors to the Hospital are welcome any afternoon, between 3 and 5.

HOSPITAL CALENDAR

ANNUAL BOARD AND CORPORATION MEETING, third Tuesday in January.

REGULAR BOARD OF DIRECTORS MEETINGS, third Tuesday in October, January and April.

EXECUTIVE COMMITTEE, third Tuesday in November, December, February, March and May.

ANNUAL MEETING OF THE WOMEN'S BOARD, second Tuesday in December.

WOMEN'S BOARD, second Tuesday of every month, from October to May, both inclusive.

WOMEN'S BOARD—EXECUTIVE COMMITTEE, monthly, except during months of June, July, August and September.

HOUSE COMMITTEE, monthly, from October to May, both inclusive.

NURSES' COMMITTEE, monthly, from October to May, both inclusive.

SUMMER COMMITTEE, monthly, during June, July, August and September.

MEDICAL BOARD, first Monday in January.

CRIBSIDE COMMITTEE, annual meeting in November.
